In order to help the customers solve the problem at any moment, our server staff will be online all the time.

ASIS Physical Security Professional Exam Sample Questions (Q175-Q180):

NEW QUESTION # 175

Those who are delegated authority in the direct chain of command to accomplish specific organizational objectives are known as:

- A. Line executives
- B. Stockholders
- C. Authorized directives
- D. Management

Answer: A

Explanation:

Line executives are individuals in the direct chain of command who are responsible for achieving the core objectives of an

organization. They have authority over subordinate personnel and direct responsibility for organizational results. They differ from staff personnel, who provide advice or support but do not directly manage line functions.

Management (A) is a broader term that includes both line and staff.

Authorized directives (B) are formal instructions, not people.

Stockholders (D) are owners, not organizational authorities.

NEW QUESTION # 176

A change review board generally consists of:

- A. A project manager, an architect, and contractors
- B. A program manager, a customer representative, and local officials
- **C. Representatives from each of the project's primary partners**
- D. Representatives from manufacturers and subcontractors

Answer: C

Explanation:

A Change Review Board (CRB) is typically composed of key stakeholders representing the major interests involved in a project-engineering, operations, security, IT, procurement, and other relevant departments.

This cross-functional group ensures that proposed changes are reviewed, justified, and approved collaboratively.

A, C, and D list some roles, but they don't fully represent the project's key partners in a typical governance model.

NEW QUESTION # 177

Which of the following is NOT of the basic trends of security services?

- A. Regulate training and standards
- B. Attract better qualified individuals
- **C. Disarm security personnel**
- D. All of the above

Answer: C

Explanation:

ern trends in the private security industry focus on:

Regulating training and licensing standards (Answer A),

Attracting better-qualified individuals to raise professionalism (Answer B).

Disarming security personnel (Answer C) is generally not a trend. In fact, depending on threat levels and environments, armed security may be increased rather than reduced.

NEW QUESTION # 178

A good risk management program involves:

- A. Identify risks or specific vulnerabilities
- B. Analyze and study risks, including likelihood and degree of danger of an event
- **C. All of the above**
- D. Study of security programs

Answer: C

Explanation:

A good risk management program incorporates multiple stages:

Identifying risks or vulnerabilities (e.g., threats to assets or processes) Analyzing risks based on likelihood and potential impact (quantitative or qualitative assessment) Evaluating and aligning existing or proposed security programs to determine adequacy and needed improvements All three elements are part of a systematic approach to managing security and organizational risk effectively. NEW QUESTION # 179

During project management, which of the following deliverables are part of the design phase?

- A. Cost evaluations and due-diligence results
- **B. Equipment lists**
- C. Implementation schedule, bidder instructions, and security-device schedules
- D. Recommended safeguards and sole-source justification

Answer: B

Explanation:

In the design phase of a security project, key deliverables include detailed equipment lists, drawings, system specifications, and layout plans. These elements guide the eventual procurement and installation processes.

A, B, and C include elements from other project phases like planning (A), procurement (B), and feasibility (C).
