The Tableau TDA-C01 Certification Exam is also designed to help individuals gain a deeper understanding of Tableau Desktop and its capabilities. It provides a framework for professionals to develop their skills and stay up-to-date with the latest trends and practices in data analytics and visualization.

Tableau Certified Data Analyst Sample Questions (Q76-Q81):

NEW QUESTION # 76

You have the following chart that shows profits and discounts over time.

You need to combine the lines to appear as shown in the following chart.

What should you do?

- A. Drag Discount to the Columns shelf
- **B. Set Discount to Dual Axis**
- C. Convert Discount to Discrete
- D. Drag Discount to Color on the Marks card

Answer: B

Explanation:

To combine the lines to appear as shown in the second chart, you should set Discount to Dual Axis. Dual Axis is a feature that allows you to show two measures on two separate axes on one chart. You can create a dual axis by right-clicking on a measure on any shelf and selecting Dual Axis from the menu. This will create two axes on one chart and synchronize their scales.

In this case, you want to show Profit and Discount on two separate axes on one chart. You can right-click on Discount on any shelf and select Dual Axis from the menu. This will create a dual axis chart that shows Profit and Discount as two lines with different colors.

The other options are not correct for this scenario. Dragging Discount to Color on the Marks card will change the color of Profit based on Discount, but it will not show two lines. Converting Discount to Discrete will change Discount from a green pill to a blue pill, but it will not affect how it appears on the chart. Dragging Discount to Columns shelf will create two separate charts for Profit and Discount, but it will not combine them. NEW QUESTION # 77

A Data Analyst is given the following table and asked to create a flow that adds a date field to the data. This field should automatically update as new dates (months) are added to the original table.

Which technique should the analyst use as the first step to achieve this in Tableau Prep?

- A. An Aggregate step to reshape the data
- **B. A wildcard search to pivot in the Pivot step**
- C. A wildcard search for multiple tables in the Input step
- D. A Rows to Columns Pivot step

Answer: B

NEW QUESTION # 78

You create the following worksheet

The Pick Measure parameter contains the following list of values

Users can select a value from Pick Measure to change the visualization to show either the Sales measure or the Profit measure. Which formula is used in the Selected Measure calculated field to switch between measures?

- **A. Case STFMEPick Measure])
WHEN "Sales" then ([Sales])
WHEN "Profit" then ([Profit]) e::i**
- B. Case [Pick Measure:
WHEN [Sales] then 1
WHEN [Profit] then 2 END
- C. Case AVG([Pick Measure])
WHEN [Sales] then 1
WHEN [Profit] then 2
END
- D. Case [Pick Measure]
WHEN 1 then ([Sales])
WHEN 2 then ([Profit]) END

Answer: A

NEW QUESTION # 79

In a dataset, you have a string field named Name that contains unnecessary semicolons.

Which function should you use to remove the semicolons from the Name field?

- A. SPLIT

- B. CONTAINS
- **C. REPLACE**
- D. TRIM

Answer: C

Explanation:

The REPLACE function is used to replace all occurrences of a substring within a string with another substring. In this case, it can be used to remove the semicolons from the Name field by replacing them with an empty string. For example, REPLACE ("John;Doe", ";", "") = "JohnDoe". Reference: The information is based on the following sources:

Remove special characters and add a semi colon in a word - Tableau

NEW QUESTION # 80

Open the Link to Book1 found on the desktop. Open Map worksheet and use Superstore data source.

Create a filled map to show the distribution of total Sales by State across the United States.

Answer:

Explanation:

check the steps below in explanation.

Explanation:

To create a filled map to show the distribution of total Sales by State across the United States, you need to do the following steps:

- * Open the link to Book1 found on the desktop. This will open the Tableau workbook that uses the Superstore data source.
- * Click on the Map tab at the bottom of the workbook to open the Map worksheet. You will see a blank worksheet with no marks.
- * Drag State from the Dimensions pane to Detail on the Marks card. This will create a map that shows each state as a mark. You may need to zoom in or out to see the whole map.
- * Drag Sales from the Measures pane to Color on the Marks card. This will create a filled map that shows the distribution of total Sales by State across the United States. The color legend will show you the range of values and colors for Sales.
- * Optionally, you can adjust the color scheme, transparency, size, and borders of the marks by clicking on the Color menu on the Marks card. You can also add labels, tooltips, or filters to enhance your map.
