

# 100% Pass 2026 Professional Analytics-DA-201: Salesforce Certified Tableau Data Analyst Cert Exam

2026 Latest Real4Prep Analytics-DA-201 PDF Dumps and Analytics-DA-201 Exam Engine Free Share:  
<https://drive.google.com/open?id=1joJG2NBoS4pfhXHDA5FoWH2lrSVZcR3A>

Overall, Analytics-DA-201 is committed to helping candidates achieve success in the Salesforce Analytics-DA-201 exam. Their goal is to save students time and money, and they guarantee that candidates who use their product will pass the Analytics-DA-201 Exam on their first try. With the right study material and support team, passing the exam at the first attempt is an achievable goal.

## Salesforce Analytics-DA-201 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Core ABAP Programming: This part of the exam assesses the foundational programming skills of the SAP S</li><li>4HANA Technical Consultant. It includes knowledge of syntax, control structures, modularization, and internal tables in ABAP. The section aims to validate the candidate's proficiency in writing clean, efficient ABAP code using best practices.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Object-Oriented Design: This section of the exam evaluates the SAP ABAP Cloud Developer's understanding of object-oriented principles in the ABAP context. It focuses on class-based programming, inheritance, interfaces, and polymorphism, all crucial for building modular and maintainable ABAP cloud applications.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>ABAP RESTful Application Programming Model: This section of the exam evaluates the capabilities of the SAP S</li><li>4HANA Technical Consultant in using the ABAP RESTful Application Programming Model (RAP). It focuses on understanding the structure and components of RAP, including behavior definitions, service bindings, and metadata extension. The goal is to validate the ability to develop modern and scalable applications using RAP.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>ABAP SQL and Code Pushdown: This section of the exam measures the competencies of the SAP ABAP Cloud Developer related to performance optimization through ABAP SQL and code pushdown techniques. It ensures that the developer understands how to shift logic to the database layer using efficient SQL scripting to enhance performance in data-intensive applications.</li></ul>

## Analytics-DA-201 Latest Test Dumps - New Analytics-DA-201 Exam Online

By using Real4Prep Analytics-DA-201 exam questions, you will be able to understand the real exam Analytics-DA-201 scenario. It will help you get verified Analytics-DA-201 answers and you will be able to judge your Analytics-DA-201 preparation level for the Analytics-DA-201 exam. More importantly, it will help you understand the real Analytics-DA-201 exam feel. You will be able to check the real exam scenario by using this specific Analytics-DA-201 Exam PDF questions. Our Salesforce experts are continuously working on including new Analytics-DA-201 questions material and we provide a guarantee that you will be able to pass the Analytics-DA-201 exam on the first attempt.

### Salesforce Certified Tableau Data Analyst Sample Questions (Q113-Q118):

#### NEW QUESTION # 113

You have the following tiled dashboard that has one sheet.

You want to replace the sheet with Sheet2.

What should you do?

- A. From the context menu of Sheet3. select Deselect
- B. From the context menu of Sheet3. select Remove Dashboard item
- **C. Drag Sheet2 to the dashboard.**
- D. Right-click Sheet2 and select Add to Dashboard.
- E. Select Sheet3 and click the Swap Sheet button next to Sheet2.

#### Answer: C

Explanation:

In Tableau, to replace a sheet on a dashboard, you can simply drag the desired sheet (Sheet2 in this case) from the sheets list onto the dashboard area where the current sheet (Sheet3) resides. This action will replace the existing sheet with the new one. Right-clicking and adding to the dashboard adds an additional sheet rather than replacing, and the context menu options mentioned in the other choices are not the standard methods for replacing sheets within a dashboard.

#### NEW QUESTION # 114

You have the following visualization.

The Last() calculation is set to compute using Table (across)

Which value will appear in the crosstab for the Consumer segment of the year 2018 if you change compute to use Order Date?

- A. 0
- **B. 1**
- C. 2
- D. 3

#### Answer: B

Explanation:

The LAST() function in Tableau returns the number of rows from the current row to the last row in the partition. When you compute using 'Order Date', it will change the partitioning of the calculation. If

'Consumer' in '2018' is the last row in its partition when computed by 'Order Date', then LAST() will return 0 for that cell.

The LAST() function in Tableau is a table calculation that returns the number of rows from the current row to the last row in the partition. The value of LAST() is 0 for the last row, increases by 1 for each row above the last row, and can be negative for rows below the current row if there are such rows in the partition.

In the provided visualization, LAST() is set to compute using Table (across). Changing the compute mode to use "Order Date" will adjust the partitioning of the data upon which the LAST() function is calculated. Since

"Order Date" is likely to be a unique value per row (assuming each order has a unique date), each row becomes its own partition. For the Consumer segment of the year 2018, if "Order Date" is unique for each row, then the last row in each partition (in this case, each individual row) will have a LAST() value of 0 because there are no other rows in the partition - it's the last row of its own partition.

Therefore, when you change the compute mode of LAST() to use "Order Date", each cell under the Consumer segment for the year 2018 will have the LAST() value of 0, because each order date creates a partition of one, making every row the last in its partition.

### NEW QUESTION # 115

You have the following visualization.

□

**Answer:**

Explanation:

□

Explanation:

□

### NEW QUESTION # 116

Which option must a Data Analyst enable to build the following table to add quarterly totals?

□

- A. Add All Subtotals
- B. Add Pane Totals
- C. Show Row Grand Totals
- D. Show Column Grand Totals

**Answer: A**

### NEW QUESTION # 117

Open the link to Book1 found on the desktop. Open Disciplines worksheet.

Filter the table to show the Top 10 NOC based on the number of medals won.

**Answer:**

Explanation:

check the steps below in explanation.

Explanation:

To filter the table to show the Top 10 NOC based on the number of medals won, you need to do the following steps:

\* Open the link to Book1 found on the desktop. This will open the Tableau workbook that contains the Disciplines worksheet.

\* Click on the Disciplines tab at the bottom of the workbook to open the worksheet. You will see a table that shows the NOC, discipline, and medals for each country.

\* Drag Medals from the Measures pane to the Filters shelf. This will open a dialog box that allows you to filter by different criteria.

\* Select Top from the dialog box. This will show you options to filter by the top or bottom values of a field.

\* Enter 10 in the text box next to By field. This will filter by the top 10 values of Medals.

\* Select NOC from the drop-down list next to By field. This will filter by the top 10 values of NOC based on Medals.

\* Click OK to apply the filter. You will see that the table now shows only 10 rows, one for each NOC with the highest number of medals.
