Moreover, we offer free Huawei H35-211_V2.5 Exam Questions updates if the H35-211_V2.5 actual test content changes within 12 months of your buying. Our H35-211_V2.5 guide questions have helped many people obtain an international certificate. In this industry, our products are in a leading position in all aspects.

Thousands of HCIP-Access V2.5 exam aspirants have already passed their Huawei H35-211_V2.5 certification exam and they all got help from top-notch and easy-to-use Huawei H35-211_V2.5 Exam Questions. You can also use the Prep4SureReview H35-211_V2.5 exam questions and earn the badge of Huawei H35-211_V2.5 certification easily.

H35-211_V2.5 Flexible Learning Mode & Exam H35-211_V2.5 Labs

These formats save you from going through sleepless preparation nights and hectic H35-211_V2.5 test practice. Prep4SureReview H35-211_V2.5 practice exams come in these two versions: desktop software and web-based test. A team of experts has approved this H35-211_V2.5 practice test after a thorough analysis of the interface and content. The Huawei H35-211_V2.5 Mock Test has a built-in tracker which keeps a record of your progress in each take for you to easily analyze and improve your Huawei H35-211_V2.5 preparation.

Huawei HCIP-Access V2.5 Sample Questions (Q46-Q51):

NEW QUESTION # 46

(Single-choice) HSI service uses VLAM tags to bind users precisely, if there are 5K FTTH hanging under the LT Users, which VLAN switching scheme is recommended?

- A. User VLAN->C^VLAN->S+CVLAN
- B. c>S
- C. C>S+C
- D. S+C>S+C
- E. C>S+C

Answer: A

NEW QUESTION # 47

The total downstream bandwidth of the 10G EPON PONI port is the sum of the EPON downstream bandwidth and the 10G EPON downstream bandwidth.

- A. False
- B. True

Answer: A

Explanation:

According to Huawei HCIP-Access V2.5 learning materials and official Huawei Access Network product documentation, a 10G EPON PON1 port supports both EPON (1.25 Gbit/s) and 10G EPON (10 Gbit/s) transmission modes.

These two modes are not combined - they operate on different wavelengths and serve different types of Optical Network Units (ONUs):

EPON uses a 1490 nm wavelength for downstream transmission with a rate of 1.25 Gbit/s.

10G EPON uses a 1577 nm wavelength for downstream transmission with a rate of 10 Gbit/s.

When an OLT (Optical Line Terminal) port supports dual-mode operation, it automatically adapts to the connected ONU type - but it does not aggregate the bandwidth of both technologies. Each ONU communicates using only one rate (either EPON or 10G EPON).

Therefore, the total downstream bandwidth is not the sum of both rates. It depends solely on the ONU's operational mode. Hence, the statement is False.

NEW QUESTION # 48

(Multiple choice) Which of the following measures can be adopted by GPON for traffic control?

- A. Flow-CAR
- B. GEM-CAR
- C. T-CONT-CAR
- D. GEM mapping

Answer: A,B,C

Explanation:

Huawei GPON implements hierarchical traffic control. CAR (Committed Access Rate) can be applied at multiple layers: GEM-port level (GEM-CAR), per-flow (Flow-CAR), and T-CONT level (T-CONT-CAR) for upstream bandwidth policing/shaping and guaranteeing QoS. GEM mapping is a classification/association mechanism (service # GEM/T-CONT) rather than a traffic-control action, so it is not a CAR measure.

References: HCIP-Access V2.5 Study Guide - GPON Service Bearing and QoS (T-CONT, GEM, CAR and hierarchical traffic control).

NEW QUESTION # 49

(Single choice) When planning QoS, it is necessary to plan reasonably according to the service, and adopt the () scheduling mode for high-priority services.

- A. DRR
- B. RR
- C. WFQ
- D. WRR

Answer: D

Explanation:

In campus/access QoS planning on Huawei devices, queue scheduling commonly supports RR, WRR/DRR, and (optionally) strict-priority. WRR (Weighted Round Robin) assigns larger weights to high-priority queues so they receive more transmission opportunities and bandwidth than lower-priority queues while still serving all queues. Therefore, when ensuring better treatment for high-priority services under round-robin-type scheduling, WRR is the recommended choice.

References: HCIP-Access V2.5 Study Guide - QoS Overview and Queue Scheduling (RR/WRR/DRR concepts and use).

NEW QUESTION # 50

(Multi-select) VLAN planning principles need to be considered

- A. The networking topology of the OLT
- B. Customer type and number of users
- C. Uplink networking mode
- D. Type and type of business
- E. The total number of VLANs

Answer: A,B,C,D,E

NEW QUESTION # 51
