

EX200 Exam Preparatory: Red Hat Certified System Administrator - RHCSA & EX200 Test Questions

Red Hat Certified System Administrator (RHCSA) Exam objectives (EX200)

This guide provides information candidates may use in preparing to take the Red Hat® Certified System Administrator (RHCSA) exam on Red Hat Enterprise Linux® 6. Red Hat is not responsible for the content or accuracy of other guides, books, online resources, or any other information provided by organizations or individuals other than Red Hat Training and Certification. Red Hat reserves the right to change this guide when appropriate. Candidates who have enrolled in forthcoming classes or exams are advised to check this guide periodically for changes.

Prospective employers of a candidate holding RHCSA certification should verify any and all claims by people claiming to hold this credential by requesting the certificate number and verifying it using the Red Hat [certification verification tool](#).

Employers or candidates interested in understanding exam objectives for the Red Hat Certified Technician (RHCT) exam on Red Hat Enterprise Linux 5 should consult the past [RHCT/Red Hat Certified Engineer \(RHCE®\) exam objectives](#).

Performance-based exams

The RHCSA exam is a performance-based evaluation of Red Hat Enterprise Linux system administration skills and knowledge. Candidates perform a number of routine system administration tasks and are evaluated on whether they have met specific objective criteria. Performance-based testing means that candidates must perform tasks similar to what they must perform on the job.

Authorized training partners

Only Red Hat and Red Hat Certified Training Partners administer the RHCSA exam. Prospective candidates should exercise due diligence when purchasing a seat in an RHCSA exam from a provider other than Red Hat itself. They should verify that the provider is, in fact, an authorized training partner or reseller in good standing. Please notify training@redhat.com about organizations that purport to offer the RHCSA exam but are not Red Hat Certified Training Partners.

Scores and reporting

Official scores for the RHCSA exams come exclusively from Red Hat Certification Central. Red Hat does not authorize examiners, training partners, or other departments or individuals within Red Hat to report results to candidates. Scores on the exam are reported within 5 US business days.

Red Hat does not report performance on individual items, nor will it provide additional information upon request. This policy helps ensure impartiality and fairness for all candidates worldwide. Scores are used to establish whether certification should be issued and are reported for the benefit of candidates. Red Hat makes no representations regarding the use of scores for any other purpose, such as ranking or comparing candidates.

Format of the RHCSA exam

The RHCSA exam is a hands-on, practical exam that lasts 2.5 hours. Internet access is not provided during the exam. Outside materials are not permitted. Documentation that ships with Red Hat Enterprise Linux is available during the exam. Red Hat reserves the right to make changes to format, including timing and the policies above. Such changes will be made public in advance through revisions to this document.

Red Hat Certified Engineer (EX200) is Red Hat's independent certification for system administrator candidates who contribute to the needs of complex enterprise systems.

RedHat Red Hat Certified System Administrator - RHCSA Sample Questions (Q125-Q130):

NEW QUESTION # 125

We are working on /data initially the size is 2GB. The /dev/test0/lvtestvolume is mount on /data. Now you required more space on /data but you already added all disks belong to physical volume. You saw that you have unallocated space around 5 GB on your harddisk. Increase the size of lvtestvolume by 5GB.

Answer:

Explanation:

see explanation below.

- * Create a partition having size 5 GB and change the system id '8e'.
- * use partprobe command
- * pvcreate /dev/hda9 Suppose your partition number is hda9.
- * vgextend test0 /dev/hda9 vgextend command add the physical disk on volume group.
- * lvextend -L+5120M /dev/test0/lvtestvolume
- * verify using lvdisplay /dev/test0/lvtestvolume.

NEW QUESTION # 126

Configure a HTTP server, which can be accessed through <http://station.domain40.example.com>

Please download the released page from <http://ip/dir/example.html>.

Answer:

Explanation:

```
# yum install -y httpd
# chkconfig httpd on
# cd /var/www/html
# wget http://ip/dir/example.html
# cp example.com index.html
# vim /etc/httpd/conf/httpd.conf
NameVirtualHost 192.168.0.254:80
<VirtualHost 192.168.0.254:80>
DocumentRoot /var/www/html/
ServerName station.domain40.example.com
</VirtualHost>
```

NEW QUESTION # 127

There is a server having 172.24.254.254 and 172.25.254.254. Your System lies on 172.24.0.0/16. Make successfully ping to 172.25.254.254 by Assigning following IP: 172.24.0.x where x is your station number.

Answer:

Explanation:

Use netconfig command

Enter the IP Address as given station number by your examiner: example: 172.24.0.1 Enter Subnet Mask Enter Default Gateway and primary name server press on ok ifdown eth0 ifup eth0 verify using ifconfig In the lab server is playing the role of router, IP forwarding is enabled. Just set the Correct IP and gateway, you can ping to 172.25.254.254.

NEW QUESTION # 128

Your System is configured in 192.168.0.0/24 Network and your nameserver is 192.168.0.254. Make successfully resolve to server1.example.com.

Answer:

Explanation:

nameserver is specified in question,

1. Vi /etc/resolv.conf

nameserver 192.168.0.254

2. host server1.example.com

NEW QUESTION # 129

Create a swap space, set the size is 600 MB, and make it be mounted automatically after rebooting the system (permanent mount).

Answer:

Explanation:

see explanation below.

Explanation

* `if=/dev/zero of=/swapfile bs=1M count=600 mkswap /swapfile`

/etc/fstab:

```
/swapfile swap swap defaults 0 0 mount -a
```
