

Exam C_CPI_2506 Testking, Key C_CPI_2506 Concepts

C_CPI_2506 AUG UPDATED 90%

1. WHAT ARE SOME ADVANTAGES OF CREATING AN ODATA INTERFACE THROUGH AN API PROVIDER?
 - A. AUTOMATIC CREATION OF AN OPENAPI SPECIFICATION
 - B. AUTOMATIC CREATION OF A RAML SPECIFICATION
 - C. AUTOMATIC CREATION OF A SWAGGER UI
 - D. AUTOMATIC CREATION OF A WSDL SPECIFICATION
 ANSWER: A AND C

2. WHAT AUTHENTICATION METHOD DOES THE SERVICE KEY USE TO GRANT ACCESS WHEN YOU GENERATE A SERVICE KEY FOR AN SAP INTEGRATION SUITE EVENT MESSAGE CLIENT?
 - A. X.509 CLIENT CERTIFICATES
 - B. API KEY AUTHENTICATION
 - C. BASIC AUTHENTICATION
 - D. OAUTH 2.0 CLIENT AUTHENTICATION
 ANSWER: D

3. HOW DOES THE INCREASED NUMBER OF API CALLS IN A MICROSERVICES ARCHITECTURE IMPACT API MANAGEMENT AND MONITORING WITHIN AN SAP INTEGRATION SUITE LANDSCAPE?
 - A. INCREASED API CALLS NECESSITATE LESS ROBUST API MANAGEMENT TOOLS AND SIMPLIFIED MONITORING CAPABILITIES
 - B. INCREASED API CALLS NECESSITATE MORE ROBUST API MANAGEMENT TOOLS AND COMPREHENSIVE MONITORING CAPABILITIES
 - C. REDUCED API CALLS SIMPLIFY API MANAGEMENT AND MINIMIZE MONITORING NEEDS
 - D. INCREASED API CALLS IMPROVE API MANAGEMENT EFFICIENCY AND REDUCE THE NEED FOR EXTENSIVE MONITORING
 ANSWER: B

4. WHICH EXPRESSION LANGUAGE CAN YOU USE TO ACCESS THE CONTENT OF A MESSAGE IN AN INTEGRATION FLOW?
 - A. SIMPLE EXPRESSION LANGUAGE
 - B. XML EXPRESSION LANGUAGE
 - C. SPRING EXPRESSION LANGUAGE
 - D. JAVASCRIPT EXPRESSION LANGUAGE
 ANSWER: A

5. WHICH SAP OFFERING MANAGES INTEGRATIONS ACROSS HYBRID AND MULTICLOUD ENVIRONMENTS?
 - A. SAP PROCESS ORCHESTRATION
 - B. SAP CLOUD PLATFORM INTEGRATION
 - C. SAP INTEGRATION SUITE
 - D. SAP BUSINESS TECHNOLOGY PLATFORM
 ANSWER: C

6. WHAT DOES THE MESSAGING MODEL OF THE APACHE CAMEL DATA MODEL CONSIST OF?
 - A. HEADER, BODY, ATTACHMENT
 - B. HEADER, BODY, PROPERTIES

P.S. Free & New C_CPI_2506 dumps are available on Google Drive shared by ExamcollectionPass:
<https://drive.google.com/open?id=19QuunFbJXlGkThfWvAqEl1EmcdVdOyyd>

The C_CPI_2506 study guide provided by the ExamcollectionPass is available, affordable, updated and of best quality to help you overcome difficulties in the actual test. We continue to update our dumps in accord with C_CPI_2506 real exam by checking the updated information every day. The contents of C_CPI_2506 Free Download Pdf will cover the 99% important points in your actual test. In case you fail on the first try of your exam with our C_CPI_2506 free practice torrent, we will give you a full refund on your purchase.

SAP C_CPI_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.
Topic 2	<ul style="list-style-type: none"> SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.

Topic 3	<ul style="list-style-type: none"> • Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.
Topic 4	<ul style="list-style-type: none"> • Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.

Exam C_CPI_2506 Testking - How to Prepare for SAP C_CPI_2506 Exam

Our product is revised and updated according to the change of the syllabus and the latest development situation in the theory and the practice. The C_CPI_2506 Exam Torrent is compiled elaborately by the experienced professionals and of high quality. The contents of C_CPI_2506 guide questions are easy to master and simplify the important information. It conveys more important information with less answers and questions, thus the learning is easy and efficient. The language is easy to be understood makes any learners have no obstacles.

SAP Certified Associate - Integration Developer Sample Questions (Q44-Q49):

NEW QUESTION # 44

What does the messaging model of the Apache Camel Data Model consist of?

- A. Header, body, properties
- B. Header, body, attachment
- C. Header, Exchange ID, in-message
- D. Header, properties, attachment

Answer: A

Explanation:

The Apache Camel Data Model, which underpins SAP Cloud Integration's message processing model, consists of:
Header # Metadata about the message (e.g., content type, correlation IDs).

Body # Main payload of the message.

Properties # Exchange-level metadata, persisted throughout processing but not transferred with the message.

Other options mix in elements like attachments or exchange IDs, but the standard messaging model is header, body, properties.

NEW QUESTION # 45

What are the key capabilities of the SAP BTP Integration Suite? Note: There are 2 correct answers to this question.

- A. SAP Business Application Studio
- B. Open Connectors
- C. Connectivity Service
- D. API Management

Answer: C,D

Explanation:

The key capabilities of the SAP BTP Integration Suite include API Management and Connectivity Service. API Management allows you to create, publish, monitor, and secure APIs across different environments and platforms. Connectivity Service enables you to establish secure and reliable connections between cloud applications and on-premise systems using various protocols and adapters.

NEW QUESTION # 46

Which architectural pattern in an event-driven architecture allows direct communication between two parties without an intermediary?

- A. Message Queue
- B. Event Sourcing
- C. Publish-Subscribe
- **D. Point-to-Point**

Answer: D

Explanation:

References

In an event-driven architecture (EDA), several messaging patterns exist:

Point-to-Point # Enables direct communication between exactly two parties (sender and receiver) without intermediaries.

Publish-Subscribe # Multiple consumers subscribe to events; requires a broker/intermediary (like Event Mesh).

Message Queue # Relies on a queue as an intermediary between producer and consumer.

Event Sourcing # Refers to storing state changes as events, not a communication pattern.

Therefore, the only pattern allowing direct communication without an intermediary is Point-to-Point.

NEW QUESTION # 47

You have set up a basic authentication policy, but the API proxy returns an HTTP status of 401. What could be a reason?

- **A. In the AssignMessage policy, the Assign To tag has the type="response"**
- B. In the AssignMessage policy, the AssignTo tag has the type="postFlow"
- C. In the AssignMessage policy, the AssignTo tag has the type="preflow"
- D. In the AssignMessage policy, the AssignTo tag has the type="request"

Answer: A

Explanation:

A possible reason why the API proxy returns an HTTP status of 401 after setting up a basic authentication policy is that in the AssignMessage policy, the AssignTo tag has the type="response". This means that the basic authentication value is assigned to the response header instead of the request header. This will cause an authentication failure when calling the backend server or service that requires basic authentication. To fix this issue, you should change the type attribute of the AssignTo tag to type="request". This will ensure that the basic authentication value is assigned to the request header before sending it to the target endpoint. Reference: Basic Authentication | SAP Help Portal, Assign Message Policy | SAP Help Portal

NEW QUESTION # 48

You are creating an API proxy. Which of the following is a valid path prefix?

- A. /sap/odu/odata
- **B. /sap/opu/odata**
- C. /sap/opo/odata
- D. /soap/opu/odata

Answer: B

Explanation:

In SAP systems (e.g., S/4HANA, SAP Gateway), OData services follow a standard URL path:

/sap/opu/odata # The valid and official prefix for OData services.

Example: /sap/opu/odata/sap/API_BUSINESS_PARTNER

Other options:

/sap/opo/odata and /sap/odu/odata # Typographical variations, not valid.

/soap/opu/odata # Incorrect, since OData is not SOAP-based.

Thus, the valid prefix is /sap/opu/odata.
