P.S. Free 2026 Cisco 300-620 dumps are available on Google Drive shared by Exams4Collection: <https://drive.google.com/open?id=1IXcor-k2nMuxAmO28W7dQbjrMuUF5Mos>

The 300-620 exam questions that Exams4Collection provide with you is compiled by professionals elaborately and boosts varied versions: PDF version, Soft version and APP version, which aimed to help you pass the 300-620 exam by the method which is convenient for you. Our 300-620 training braindump is not only cheaper than other dumps but also more effective. The high pass rate of our 300-620 study materials has been approved by thousands of candidates, they recognized our website as only study tool to pass 300-620 exam.

The reason behind our confidence is the hard work of our professionals. We have hired a team who analyze past papers, Cisco Implementing Cisco Application Centric Infrastructure Exam examination syllabus and add the most probable Cisco 300-620 exam questions in three easy-to-use formats. These formats include 300-620 Pdf Dumps file, web-based Implementing Cisco Application Centric Infrastructure practice test, and desktop practice exam software. Keep reading to find the specifications of our 300-620 exam practice material's three formats.

Quiz Cisco - 300-620 - Implementing Cisco Application Centric Infrastructure Unparalleled Free Learning Cram

If you buy Exams4Collection's Cisco certification 300-620 exam practice questions and answers, you can not only pass Cisco certification 300-620 exam, but also enjoy a year of free update service. If you fail your exam, Exams4Collection will full refund to you. You can free download part of practice questions and answers about Cisco Certification 300-620 Exam as a try to test the reliability of Exams4Collection's products.

Cisco Implementing Cisco Application Centric Infrastructure Sample Questions (Q52-Q57):

NEW QUESTION # 52

A Cisco ACI fabric has 10 standalone leaf switches. The requirement is for the APIC to select the odd switches as a VPC group and select even switches as another VPC group automatically.

Which VPC protection type must be configured to accomplish this goal?

- A. serial
- **B. reciprocal**
- C. consecutive
- D. explicit

Answer: B

Explanation:

In Cisco ACI, VPC protection groups define how leaf switches are paired for VPC domain creation. The protection type determines how APIC automatically groups the switches:

Serial - Switches are paired in ascending order (1-2, 3-4, etc.).

Consecutive - Similar to serial; ensures consecutive node IDs form pairs.

Reciprocal - Switches are grouped based on odd/even distribution (odd nodes together, even nodes together).

Explicit - Manual configuration; you explicitly assign which switches belong to which VPC pair.

Since the requirement is to have all odd-numbered switches grouped together and all even-numbered switches grouped together automatically, the correct type is reciprocal.

NEW QUESTION # 53

Which Cisco ACI setting corresponds to the VMware MAC pinning?

- A. route based on MAC hash
- **B. route based on originating virtual port**
- C. route based on physical NIC load
- D. route based on IP hash

Answer: B

NEW QUESTION # 54

An engineer is implementing Cisco ACI at a large platform-as-a-service provider using APIC controllers, 9396PX leaf switches, and 9336PQ spine switches. The leaf switch ports are configured as IEEE 802.1p ports. Where does the traffic exit from the EPG in IEEE 802.1p mode in this configuration?

- A. from leaf ports untagged
- **B. from leaf ports tagged as VLAN 0**
- C. from leaf ports tagged as VLAN 1
- D. from leaf ports tagged as VLAN 4094

Answer: B

Explanation:

The VLAN 0 Priority Tagging feature enables 802.1Q Ethernet frames to be transmitted with the VLAN ID set to zero. These frames are called priority tagged frames. Setting the VLAN ID tag to zero allows the VLAN ID tag to be ignored and the Ethernet

frame to be processed according to the priority configured in the 802.1P bits of the 802.1Q Ethernet frame header.
https://www.cisco.com/c/en/us/td/docs/switches/connectedgrid/cg-switch-sw-master/software/configuration/guide/vlan0/b_vlan_0.html

NEW QUESTION # 55

Which setting prevents the learning of Endpoint IP addresses whose subnet does not match the bridge domain subnet?

- A. "Limit IP learning to network" setting within the bridge domain.
- B. "Limit IP learning to network" setting within the EPG.
- C. "Limit IP learning to subnet" setting within the bridge domain.
- D. "Limit IP learning to subnet" setting within the EPG.

Answer: C

Explanation:

The setting that prevents the learning of Endpoint IP addresses whose subnet does not match the bridge domain subnet is the "Limit IP learning to subnet" setting within the bridge domain. This setting ensures that only IP addresses belonging to the subnets configured on the bridge domain are learned, preventing mis-learning of IP addresses that may not belong to the fabric.

NEW QUESTION # 56

Which two actions extend a Layer 2 domain beyond the ACI fabric? (Choose two.)

- A. extending the bridge domain out of the ACI fabric
- B. creating a single homed Layer 3 Out
- C. extending the EPG out of the ACI fabric
- D. creating an external physical network
- E. extending the routed domain out of the ACI fabric

Answer: A,C

NEW QUESTION # 57

.....

Many learners feel that they have choice phobia disorder while they are choosing reliable 300-620 test guide on the internet. If so you can choose our 300-620 certification materials. We are the leading position in this field and our company is growing faster and faster because of our professional and high pass-rate 300-620 Exam Torrent materials. Every year more than thousands of candidates choose our reliable 300-620 test guide materials we help more than 98% of candidates clear exams, we are proud of our 300-620 exam questions.
