

Latest EX280 Dumps Sheet, Training EX280 For Exam

📄 **Get the Greatest RedHat EX280 Exam PDF Questions**
— Clear on Your First Effort!

Are you aiming to achieve the RedHat EX280 exam questions on your very first try? Certification exams in 2025 are demanding than ever, demanding extensive knowledge and practical experience. To increase your chances of triumph, you need exact and latest learning materials. **HelloDumps** provides [RedHat EX280 dumps](#) and expert-reviewed study materials to help you practice effectively. The optimal part? You can now enjoy an exclusive 35% offer on all study materials!

Why Choose HelloDumps for Your EX280 Exam Preparation?

✅ **Real EX280 Exam Questions – Secure an Superiority Over Others**
HelloDumps offers actual exam-like questions, closely synchronized with the latest EX280 layout, difficulty level, and syllabus of the Red Hat Certified OpenShift Administrator certification. Practicing these questions helps you understand the test structure and enhances your effectiveness.

🔑 **Access Red Hat Certified OpenShift Administrator Exam Questions 2025 Here:** <https://hellodumps.com/ex280-pdf-dumps.html>

✅ **Three Practical Learning Formats**
We provide study materials in various formats to suit different learning styles:

- 📄 **PDF Composition** – Study on any device, anytime, anywhere.
- 💻 **Desktop Preparation Test** – Simulates real exam conditions with customizable mock tests.
- 🌐 **Web-Based Preparation Test** – No installation required—practice directly from your browser.

What's more, part of that Exam4Docs EX280 dumps now are free: <https://drive.google.com/open?id=1FYWalcQLLMV5ZgJeVAVV3mOivvEt3Ss5>

Allowing for the different bents of exam candidate, we offer three versions of our EX280 learning braindumps for you. They are app, software and pdf versions of our EX280 training questions. All crucial points are included in the EX280 Exam Materials with equivocal contents for your reference with stalwart faith. And we also have the according three free demos of the EX280 practice engine for you to download before your purchase.

The Red Hat EX280 certification exam is a performance-based exam that requires candidates to complete real-world tasks in a simulated OpenShift environment. EX280 exam consists of a series of hands-on exercises that test the candidate's ability to perform common OpenShift Administration tasks. EX280 Exam is timed and candidates must complete all tasks within the allotted time to pass the exam.

Pass Guaranteed 2026 RedHat EX280: Latest Red Hat Certified Specialist in OpenShift Administration exam Dumps Sheet

To be the best global supplier of electronic EX280 study materials for our customers through innovation and enhancement of our customers' satisfaction has always been our common pursuit. The advantages of our EX280 study guide are more than you can count. As the most important factor that our worthy customers will consider—the pass rate, we are proud to tell you that we have a pass rate high as 98% to 100% on our EX280 training engine, which is also unique in the market. And our price of the EX280 practice guide is also reasonable.

What are some of the prerequisites for taking the RedHat EX280 Exam?

The Red Hat Certified System Administrator (EX280) exam is an entry-level exam for system administrators seeking to verify their knowledge of the fundamentals of administering Linux systems.

The Red Hat Certified System Administrator (RHCSA) certification is a prerequisite for the Red Hat Certified Engineer (RHCE) certification. The RHCE certification is a prerequisite for the Red Hat Certified Architect (RHCAA) certification.

RedHat Red Hat Certified Specialist in OpenShift Administration exam Sample Questions (Q31-Q36):

NEW QUESTION # 31

Scale an application automatically

Automatically scale the hydra application deployment configuration in the lerna project with the following requirements:

Minimum number of replicas: 6 Maximum number of replicas: 9

Target average CPU utilization: 60 percent Container CPU resource request: 25m Container CPU resource limit: 100m

Answer:

Explanation:

See the solution below in Explanation.

Explanation:

Solution:

```
$ oc project lerna
```

```
$ oc get pods
```

```
$ oc get all | grep deployment
```

```
$ oc autoscale deployment.apps/hydra --max=9 --min=6 --cpu-percent=60
```

```
$ oc get hpa
```

```
$ oc set resources deployment.apps/hydra --limits=cpu=100m -- requests=cpu=25m
```

```
$ oc describe deployment.apps/hydra | grep Limits -A3
```

NEW QUESTION # 32

Autoscale of Pods

Task information Details:

Create an HPA for httpd with min=2 , max=9 , and CPU target 60% .

Set resource requests on the httpd deployment so autoscaling can function properly.

Answer:

Explanation:

See the solution below in Explanation.

Explanation:

Solution:

* Set resource requests on the deployment:

```
oc set resources deployment httpd --requests=cpu=50m,memory=100Mi
```

* Create the HPA:

```
oc autoscale deployment httpd --min=2 --max=9 --cpu-percent=60
```

* Verify:

```
oc get hpa
```

```
oc describe hpa httpd
```

```
oc get deployment httpd -o yaml
```

Why resource requests matter:

* HPA CPU utilization is calculated against requested CPU.

* Without requests, percentage-based autoscaling is incomplete or invalid.

This task focuses on autoscaling prerequisites and policy creation.

NEW QUESTION # 33

Configure quotas

Configure your OpenShift cluster to use quotas in the manhattan project with the following requirements:

The name of the ResourceQuota resource is: ex280-quota

The amount of memory consumed across all containers may not exceed 1Gi

The total amount of CPU usage consumed across all containers may not exceed

2 full cores

The maximum number of replication controllers does not exceed 3 The maximum number of pods does not exceed 3 The maximum number of services does not exceed 6

Answer:

Explanation:

See the solution below in Explanation.

Explanation:

Solution:

```
$ oc project manhattan
```

```
$ oc create quota ex280-quota -- hard=memory=1Gi,cpu=2,pods=3,services=6,replicationcontrollers=3
```

```
$ oc get resourcequota
```

NEW QUESTION # 34

Collect Cluster Information

Task information Details:

Run must-gather and archive the gathered data into a tar file.

Answer:

Explanation:

See the solution below in Explanation.

Explanation:

Solution:

* Run must-gather:

```
oc adm must-gather
```

* Confirm the directory created, usually something like:

```
ls
```

* Archive the directory:

```
tar -cvzf system10-4ktjl-l4kj5l-lk45j.tar.gz must-gather.local.*
```

* Verify:

```
ls -lh *.tar.gz
```

Notes:

* The lab text shows a tar command without source paths. A valid tar command must include the source directory or files.

* Use the actual must-gather output directory generated in your environment.

This task validates support-data collection and cluster diagnostics handling.

NEW QUESTION # 35

Deploy an application

Deploy the application called oranges in the apples project so that the following conditions are true:

The application uses the ex280sa service account

No additional configuration components have been added or removed The application produces output

Answer:

Explanation:

See the solution below in Explanation.

Explanation:

Solution:

```
$ oc project mercury
```

```
$ oc get pods
```

```
$ oc get all | grep deploy
```

```
$ oc describe deployment.apps/atlas | grep -L memory
```

```
$ oc set resources deployment.apps/atlas --resources=memory=80Mi
```
