C_ACDET_2506 Actual Test Pdf & C_ACDET_2506 Certification Test Questions

Our C_ACDET_2506 practice materials not only apply to students, but also apply to office workers; not only apply to veterans in the workplace, but also apply to newly recruited newcomers. Our C_ACDET_2506 study materials use a very simple and understandable language, to ensure that all people can learn and understand. Our C_ACDET_2506 real test also allows you to avoid the boring of textbook reading, but let you master all the important knowledge in the process of doing exercises. And the high pass rate of our C_ACDET_2506 exam questions is more than 98%. Why not have a try on our C_ACDET_2506 study guide?

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q26-Q31):

NEW QUESTION # 26

A migration is performed for a Greenfield deployment to production, and the status of the Template configuration type indicates it

failed. What actions do you take to make the failed template(s) available in production?

- A. Import the missing data in production and then import the template in production
- B. Request SAP intervention
- C. The template must always be rebuilt in production
- D. Import the template in production

Answer: A

Explanation:

When template migration fails in Greenfield deployment, it often means required master data like Flex Master Data or enumerations are missing in Production. The recommended resolution is to manually load the missing master data into Production first, then manually import the failed templates via the Production import tools. Requesting SAP intervention is unnecessary as this is a customer-side activity.

Importing templates without missing data causes repeated failures, and rebuilding templates is not always required if proper data exists.

NEW QUESTION # 27

Which document must be returned to SAP before a Deployment Lead can be assigned to the project?

- A. Solution Design Matrix
- B. Enablement Workbook
- C. Deployment Overview
- D. Delivery Engagement Readiness Checklist

Answer: D

Explanation:

The Delivery Engagement Readiness Checklist is a critical gatekeeper document that confirms all prerequisites and readiness criteria have been met before SAP assigns a Deployment Lead to a project. This checklist ensures project scope, resourcing, access, and other foundational elements are in place to proceed.

Other documents like Deployment Overview and Enablement Workbook are informative or internal project management tools but do not formally trigger Deployment Lead assignment. The Solution Design Matrix is a design artifact and not a staffing gating document.

This process supports structured project governance and resource allocation within SAP.

NEW QUESTION # 28

Which of the following can be used to define relation types and establish a custom relationship? Note: There are 2 correct answers to this question.

- A. A custom Flex Master Data Template such as vrealm1936.fmd_58984.Hospital
- B. A custom Enumeration such as Contracts_Contract Type
- C. A standard class such as ariba.basic.core.CommodityCode
- D. A custom Form Template such as vrealm1936.formDoc_18697.Lessons Learned

Answer: A,D

NEW QUESTION # 29

You have a custom string field with a list of values. The values are represented as an Enumeration. Which of the following applies?

- A. The display order in the drop down matches the order defined in the enumeration file
- B. The display order of the values is alphabetical
- C. The user can filter the values using the search box in the chooser
- D. In the enumeration file, the Value column must only contain whole numbers

Answer: A

Explanation:

For single-select enumeration fields, the dropdown list order in SAP Ariba exactly follows the order in which values are defined in the enumeration file, not alphabetical. Alphabetical sorting applies only to multi-select chooser fields. The Value column can be text or integers depending on field type, and search/filter boxes are available only on chooser (multi-select) fields, not single-select dropdowns.

NEW QUESTION # 30

Which of the following is NOT mentioned as a configuration type migrated by the Intelligent Configuration Manager?

- A. Template - project templates such as Contract templates
- B. AMLExtension - AML customizations such as custom fields
- C. SupplierContact - contacts for the suppliers
- D. DynamicForm - custom form templates (dForms)

Answer: C

NEW QUESTION # 31

.....
