問題 #63

Universal Containers introduced a new product and wants to track all associated cases that get logged. They are looking for an automated solution that would give the product's two lead engineers read/write access to all new cases that reference the new product.

What should an administrator do to satisfy this requirement?

- A. Create a queue and a criteria-based sharing rule.
- B. Create a user-based sharing rule and an ad-hoc case team.
- C. Create an auto-response rule and a public group.
- D. Create a predefined case team and an assignment rule.

答案： A

解題說明：

Explanation

To track all cases that reference the new product and give read/write access to the product's two lead engineers, the administrator should create a queue and a criteria-based sharing rule. The queue will allow assigning cases that meet certain criteria, such as having a specific value in the Product field, to a group of users. The criteria-based sharing rule will grant read/write access to the queue members for cases that match the same criteria. References:

問題 #64

An administrator at Cloud Kicks wants to deactivate a User who has left the company.

What are two reasons that would prevent a user from being deactivated?

Choose 2 answers

- A. The User is assigned in workflow email alert.
- B. The User is in a Custom hierarchy field.
- C. The User is the highest role in the role hierarchy
- D. The user is part of a territory hierarchy.

答案： A,D

問題 #65

An administrator has been asked to change the data type of an auto number to text field.

What should the administrator be aware of before changing the field?

- A. Existing field values will be deleted.
- B. Existing field values will be Converted.
- C. Existing field values will remain unchanged.
- D. Existing auto number field to Text is prevented.

答案： D

解題說明：

Explanation

One thing that an administrator should be aware of before changing an auto-number field to text field is that this change is prevented by Salesforce; it cannot be done because it would cause data loss and inconsistency.

Auto-number fields are fields that automatically assign unique numeric values to each record; they cannot be changed to text fields because text fields do not have this functionality and may allow duplicate or invalid values. Existing field values remaining unchanged, being converted, or being deleted are not things that would happen before changing an auto-number field to text field because this change cannot happen at all.

問題 #66

A team of support users at Cloud Kicks is helping inside sales reps make follow-up calls to prospects that filled out an interest form online. The team currently does not have access to the lead object.

How should an administrator provide proper access?

- A. Set Up Manual Sharing
- B. Create a new profile
- C. Configure permission sets.
- D. Assign a new role.

答案：C

解題說明：

Explanation

Permission sets are a flexible way to grant additional access to users without changing their profiles. To provide access to the lead object for a team of support users, create a permission set that includes the appropriate object and field permissions for leads, and then assign it to the users.

問題 #67

Which two objects are customizable the Stage Setup Flow?

Choose 2 answers

- A. Campaigns
- **B. Opportunities**
- C. Campaign Members
- **D. Leads**

答案：B,D

問題 #68
