Salesforce Salesforce-Slack-Administrator Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Workspace Administration: This domain assesses the competencies of Salesforce administrators in creating and managing Slack workspaces to meet organizational needs. Candidates will determine when a new workspace should be created and manage the approval process for workspace creation.
Thema 2	• Channel and User Group Administration: This section measures the skills of Salesforce Administrators in setting up and managing Slack channels. Candidates will learn when to use channels versus direct messages or group DMs, as well as when to opt for public or private channels.
Thema 3	• Security: This domain targets Salesforce Security specialists in identifying Slack product security features that meet organizational needs. Candidates will describe how Slack addresses security governance, risk management, and compliance while recommending features that protect sensitive data.
Thema 4	• Enabling Slack Success: This section focuses on the skills of Admins to develop a vision for Slack within their organization. Candidates will use analytics dashboards to track usage and make recommendations based on data insights, such as channel archival or promoting best practices.
Thema 5	• App Administration: This section evaluates the skills of Slack Administrators in managing applications within Slack. Candidates will summarize the value of interoperability for both decision-makers and end-users while learning to use Workflow Builder for automating tasks.

Thema 6	• Fundamentals: This section of the exam measures the skills of Salesforce Administrators and covers the key privileges and responsibilities associated with each Slack user role. Candidates will identify unique features of Slack's paid plans and understand the common responsibilities shared by Admins and Owners. Additionally, this section emphasizes the importance of workspace and organization-level settings and dashboards, focusing on how they contribute to effective Slack management.

Nach dem Kauf unserer Salesforce-Slack-Administrator Schulungsunterlagen können Sie eine kostenlose Aktualisierung bekommen.

Salesforce Certified Slack Administrator Salesforce-Slack-Administrator Prüfungsfragen mit Lösungen (Q121-Q126):

121. Frage

Andrew is a Workspace Owner and head of HR for a government agency in Munich, Germany. As the head of HR, he manages all aspects of human resources in order to create an engaged workforce and resilient organization.

The HR teams use a variety of technologies, and leadership is implementing a new integrated tool to improve collaboration and productivity. While the tool has many benefits, the adoption rate has been slow due to a lack of internal awareness.

Andrew wants to convince leadership that he needs internal Slack advocates who can lead and support co-workers through the transition. He has a few people in mind who he would nominate as Champions.

Which options appropriately describe Champions? (Choose all that apply.)

- A. They are Slack Administrators, so they have the correct permissions to help the company manage change.
- **B. They identify and implement key use cases for the tool and modify them over time to improve the team's workflows.**
- C. They model best practices, and they can rally the team toward common goals.
- D. They actively communicate and promote transparency to reinforce the purpose and value of the tool.

Antwort: B

122. Frage

A project team in charge of implementing Slack plans to check in with their executive team three months after the launch. The goal of this check-in meeting is to define the success of Slack at the organization.

What should the team do to prepare for this milestone most effectively?

- A. Show the progress that has been made on configuring single sign-on (SSO) and training the IT help desk team on Slack's admin capabilities.
- **B. Prepare to show the executive team the admin console so they understand the depth of settings and policies available in Slack.**
- C. Meet with key business units to identify and measure opportunities to improve productivity using Slack.
- D. Display the number of weekly active members in Slack, trending from the beginning of the launch to the three-month mark.

Antwort: B

123. Frage

A bank must archive all communications for several years due to a new government regulation. Your compliance department wants to understand how best to meet these requirements for Slack.

Which feature should you leverage to meet these regulatory requirements?

(Select the best answer.)

- A. Enterprise Key Management (EKM)
- **B. eDiscovery**
- C. Data Loss Prevention (DLP)
- D. Mobile Device Management (MDM)

Antwort: B

Begründung:

For long-term archiving and compliance with regulatory requirements:

"eDiscovery integrations allow organizations to collect, archive, and export Slack messages and files to meet legal, regulatory, and compliance needs." DLP (A) focuses on preventing data leaks. MDM (B) secures mobile access, and EKM (C) controls encryption keys but does not inherently archive data.

(Reference: Slack Administration Study Guide - Security and Compliance - eDiscovery Integration)

-

124. Frage

Your organization's Slack Enterprise Grid consists of dozens of workspaces with various access settings.

You want to ensure that all new employees are able to join their team's respective workspace.

What is the best way to set up the new employees?

- A. Ensure that the human resources team is adding the new employees to their respective workspaces. Set up and send a "Welcome to Slack" Slackbot message to all new employees introducing them to other public workspaces they can join.
- B. Ensure managers are adding their employees to their respective workspaces. New employees can browse other workspaces as they onboard and become more familiar with Slack.
- **C. Use identity provider (IdP) groups to assign new employees to their respective workspaces.**
- D. Add new employees to user groups and assign the user groups to the respective workspaces.

Antwort: C

Begründung:

Slack's best practice for Enterprise Grid states:

"You can use your identity provider (IdP) groups to automatically provision users into the appropriate workspaces, ensuring that workspace membership reflects organizational structure." Manual additions by HR (A) or managers (C) are error-prone and inefficient. User groups (D) control notification settings inside workspaces, but not workspace membership.

(Reference: Slack Administration Study Guide - Managing Workspace Membership via IdP Groups)

-

125. Frage

The Customer Support team for Large Inc is now using Slack to access the tools and information they need to help customers quickly.

As an Admin, what should you do to set them up for success? (Choose all that apply.)

- **A. Organize and name channels in a way that makes information, procedures, and policies easier for people to find.**
- **B. Streamline an incident management workflow.**
- **C. Approve and install apps to integrate their support tools with Slack.**
- D. Allow everyone on the Customer Support team to approve and install the apps they need.

Antwort: A,B,C

Begründung:

Slack recommends Admins:

"Approve and install key apps to ensure security, streamline workflows (such as for incident management), and organize channels to make information discoverable." Allowing all members to approve apps (Option A) is discouraged because it can pose a security risk.
