Just feel rest assured to buy our SAFe-POPm study guide, which definitely will be the best choice for you.

Scrum SAFe Product Owner/Product Manager POPM (6.0) Sample Questions (Q10-Q15):

NEW QUESTION # 10

In the first step of SAFe 's Continuous Delivery Pipeline, Product Owners and Product Managers do what activity?

- A. Hypothesize what would create value for Customers
- B. Negotiate Supplier contracts
- C. Prioritize the Team Backlog
- D. Ensure the Architecture team has sufficient capacity

Answer: A

Explanation:

Hypothesizing what would create value for customers is the main activity of Product Owners and Product Managers in the first step of SAFe's Continuous Delivery Pipeline, which is Continuous Exploration (CE)¹².

In CE, they use design thinking to understand the market problem or customer need and the solution required to meet that need¹². They start with a hypothesis of something that will provide value to customers, such as a new feature, capability, or enhancement¹². They then validate or invalidate their hypothesis through experimentation, feedback, and learning¹².

Some additional information that might be helpful for you are:

* The other options (A, B, and C) are not the main activity of Product Owners and Product Managers in the first step of SAFe's Continuous Delivery Pipeline, but rather activities that may occur in other steps or roles.

* Ensuring the Architecture team has sufficient capacity is an activity that may occur in the second step of SAFe's Continuous Delivery Pipeline, which is Continuous Integration (CI)¹². In CI, the Architecture team works with the Development teams to ensure the technical quality and integrity of the solution¹².

* Negotiating Supplier contracts is an activity that may occur in the fourth step of SAFe's Continuous Delivery Pipeline, which is Release on Demand¹². In Release on Demand, the Solution Management team works with the Suppliers to coordinate the release of the solution components that are provided by them¹².

* Prioritizing the Team Backlog is an activity that occurs in the Program Increment (PI) Planning event, which is part of the Agile Product Delivery competency³. In PI Planning, the Product Owner works with the Development team and other stakeholders to define, prioritize, and estimate the work items for the upcoming PI³.

NEW QUESTION # 11

Which role ensures that the ART has the Vision and Backlog needed to engage in PI Planning successfully?

- A. Release Train Engineer
- B. Lean-Agile Center of Excellence
- C. Product Owner
- D. Product Management

Answer: D

Explanation:

Product Management is the role that ensures that the Agile Release Train (ART) has the Vision and Backlog needed to engage in PI Planning successfully. Product Management is responsible for defining and communicating the Vision, which describes the future state of the solution and its features¹. Product Management also develops and maintains the Program Backlog, which contains the features and enablers that the ART will implement in the upcoming Program Increments (PIs)². Product Management collaborates with stakeholders, customers, architects, and other roles to discover, prioritize, and refine the backlog items and present them to the ART during PI Planning³.

NEW QUESTION # 12

In a 12-week PI, how often does the Innovation and Planning (IP) Iteration occur?

- A. Every two PIs
- B. Every two Iterations
- C. Once per year
- **D. Every quarter**

Answer: D

Explanation:

Explanation

The Innovation and Planning (IP) Iteration is a unique, dedicated iteration that occurs every Program Increment (PI). A PI is a timebox of 8 to 12 weeks, during which an Agile Release Train (ART) delivers incremental value in the form of working, tested software and systems. Therefore, in a 12-week PI, the IP Iteration occurs every quarter

NEW QUESTION # 13

What is one step when determining initial team capacity during PI Planning?

- A. Ensure Product Owner/Product Manager approval for all time-based capacity adjustments
- B. Compare final team capacity across all teams
- **C. Subtract one point for every team member's vacation day, public holiday, or training day**
- D. Add together all of the points from recently completed Features

Answer: C

Explanation:

Explanation

One step when determining initial team capacity during PI Planning is to subtract one point for every team member's vacation day, public holiday, or training day. This step helps the team to adjust their capacity based on the actual availability of each team member for the upcoming Program Increment (PI)¹. By accounting for the time-based capacity adjustments, the team can plan their work more realistically and avoid overcommitting or underdelivering².

NEW QUESTION # 14

Why do Agile Teams use Iteration Goals?

- A. To summarize the business outcomes an Agile Team intends to achieve during the PI
- B. To ensure the team accomplishes the committed Stories for each Iteration
- **C. To align the team members and the Product Owner to a common purpose**
- D. To hold the team accountable to their PI Objectives

Answer: C

Explanation:

Explanation

Iteration Goals are a high-level summary of the business and technical goals that an Agile Team agrees to accomplish in an Iteration. They are vital to coordinating an Agile Release Train (ART) as a self-organizing, self-managing team of teams¹. Iteration Goals help the team and the Product Owner to reach agreement on the business value they intend to deliver, align their work to their team PI objectives, and ground everyone on their shared purpose².
