#### NEW QUESTION # 73

Case Study 2 - Contoso, Ltd

Overview

Contoso, Ltd. is a consulting company that has a main office in Montreal and three branch offices in Seattle, Boston, and Johannesburg.

Existing Environment

Microsoft 365 Environment

Contoso has a Microsoft 365 E5 tenant. The tenant contains the administrative user accounts shown in the following table.

Users store data in the following locations:

SharePoint sites

OneDrive accounts

Exchange email

Exchange public folders

Teams chats

Teams channel messages

When users in the research department create documents, they must add a 10-digit project code to each document. Project codes that start with the digits 999 are confidential.

SharePoint Online Environment

Contoso has four Microsoft SharePoint Online sites named Site1, Site2, Site3, and Site4.

Site2 contains the files shown in the following table.

Two users named User1 and User2 are assigned roles for Site2 as shown in the following table.

Site3 stores documents related to the company's projects. The documents are organized in a folder hierarchy based on the project.

Site4 has the following two retention policies applied:

Name: Site4RetentionPolicy1

- Locations to apply the policy: Site4

- Delete items older than: 2 years

- Delete content based on: When items were created

Name: Site4RetentionPolicy2

- Locations to apply the policy: Site4

- Retain items for a specific period: 4 years

- Start the retention period based on: When items were created

- At the end of the retention period: Do nothing

Problem Statements

Management at Contoso is concerned about data leaks. On several occasions, confidential research department documents were leaked.

Requirements

Planned Changes

Contoso plans to create the following data loss prevention (DLP) policy:

Name: DLPpolicy1

Locations to apply the policy: Site2

Conditions:

- Content contains any of these sensitive info types: SWIFT Code

- Instance count: 2 to any

Actions: Restrict access to the content

Technical Requirements

Contoso must meet the following technical requirements:

All administrative users must be able to review DLP reports.

Whenever possible, the principle of least privilege must be used.

For all users, all Microsoft 365 data must be retained for at least one year.

Confidential documents must be detected and protected by using Microsoft 365.

Site1 documents that include credit card numbers must be labeled automatically.

All administrative users must be able to create Microsoft 365 sensitivity labels.

After a project is complete, the documents in Site3 that relate to the project must be retained for 10 years.

Hotspot Question

You need to meet the technical requirements for the confidential documents.

What should you create first, and what should you use for the detection method? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

myportal.utt.edu.tt, myportal.utt.edu.tt, myportal.utt.edu.tt, myportal.utt.edu.tt, pukkabookmarks.com, Disposable vapes
