In today's rapid economic development, society has also put forward higher and higher requirements for us. In addition to the necessary theoretical knowledge, we need more skills. Our H19-308_V4.0 exam simulation is a great tool to improve our competitiveness. After we use our H19-308_V4.0 Study Materials, we can get the H19-308_V4.0 certification faster. And at the same time, we can do a better job since we have learned more knowledge on the subject.

Huawei H19-308_V4.0 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">OceanStor New Hybrid Flash Storage: OceanStor Hybrid Flash combines flash and disk storage to balance performance and cost-effectiveness. This architecture optimizes resources by placing performance-sensitive data on flash and capacity-oriented data on disk.
Topic 2	<ul style="list-style-type: none">OceanProtect Backup Storage: OceanProtect offers comprehensive data protection with efficient backup, recovery, and retention features. This solution ensures security through encryption and deduplication while reducing storage costs.

Topic 3	<ul style="list-style-type: none"> • OceanStor Dorado: OceanStor Dorado is Huawei's all-flash storage solution for mission-critical applications demanding ultra-low latency. This platform leverages NVMe technology and intelligent management to accelerate digital transformation.
Topic 4	<ul style="list-style-type: none"> • Data Storage Basis: Data storage is the foundation of IT infrastructure, enabling efficient storage, management, and retrieval of digital information. Understanding storage fundamentals is essential for selecting solutions that meet business performance, capacity, and reliability requirements.
Topic 5	<ul style="list-style-type: none"> • Backup and Disaster Recovery: Backup and disaster recovery strategies protect organizations from data loss through redundant copies of critical information. Comprehensive backup solutions ensure business continuity and enable rapid recovery to minimize downtime.
Topic 6	<ul style="list-style-type: none"> • Object Storage Basis: Object storage manages data as discrete units with metadata and unique identifiers for efficient retrieval. This scalable architecture suits unstructured data, cloud applications, and big data analytics requiring massive capacity.

2026 Huawei Unparalleled H19-308_V4.0 Certification Exam

VCETorrent guarantee the most valid and high quality H19-308_V4.0 study guide which you won't find any better one available. Our H19-308_V4.0 training pdf will be the right study reference if you want to be 100% sure pass and get satisfying results. From our free demo which allows you free download, you can see the validity of the questions and format of the H19-308_V4.0 Actual Test. In addition, the price of our H19-308_V4.0 examination material is reasonable and affordable for all of you. Just come and buy our H19-308_V4.0 training questions!

Huawei HCSA-Presales-Storage V4.0 Sample Questions (Q151-Q156):

NEW QUESTION # 151

In an SCSI-3 model, the server is the target, and the SAN storage is the initiator.

- A. FALSE
- B. TRUE

Answer: A

Explanation:

In the SCSI-3 model, the server (host) acts as the initiator, which sends SCSI commands, and the SAN storage acts as the target, which responds to those commands. The statement reverses these roles, so it is incorrect.

NEW QUESTION # 152

From the perspective of users, which of the following are common ways to use object storage?

(Choose all that apply.)

- A. Users can invoke REST APIs using HTTP/HTTPS requests.
- B. Users can use a third-party client to manage object storage resources.
- C. Users use multiple third-party backup and archiving software to interconnect with object storage for data archiving or backup.
- D. Users can invoke the API functions provided by SDK to use the service functions provided by object storage.

Answer: A,B,C,D

Explanation:

From a user's perspective, object storage can be accessed and managed through various methods: integrating with third-party backup or archiving software, using third-party clients, utilizing SDK APIs for advanced features, or directly invoking REST APIs over HTTP/HTTPS.

These options provide flexibility for data management, application integration, and automation.

NEW QUESTION # 153

2200 V3 is an entry-level storage product targeting small- and medium-sized business (SMB) market. It can be used in a variety of scenarios, such as centralized storage, backup, video surveillance, databases.

- A. TRUE
- B. FALSE

Answer: A

NEW QUESTION # 154

Statement 1: RAID 2.0+ is NOT based on traditional RAID technologies.

Statement 2: RAID 2.0+ has excellent rebuild characteristics.

- A. Statements 1 and 2 are both true.
- B. Statement 1 is true and statement 2 is false.
- C. Both statements 1 and 2 are false.
- D. Statement 1 is false and statement 2 is true.

Answer: D

NEW QUESTION # 155

Which are the SAN types classified by architecture? (Select all that apply)

- A. Centralized SAN
- B. Distributed SAN
- C. FC SAN
- D. IP SAN

Answer: A,B

Explanation:

When classifying storage by its underlying architecture rather than its transmission protocol, Huawei distinguishes between two main structures. Centralized SAN (Option D) refers to the traditional controller-based array, such as the OceanStor Dorado or OceanStor Hybrid series. In this architecture, all storage resources are managed by a centralized pair or cluster of controllers within a single enclosure system. This provides high stability and specialized data services but has physical limits on the number of controllers and disks it can scale to.

Distributed SAN (Option B), such as the OceanStor Pacific (formerly FusionStorage), utilizes a scale-out architecture. It aggregates the local storage of multiple standard x86 or ARM servers into a massive, unified virtual storage pool. This architecture eliminates the bottlenecks of centralized controllers, allowing for near-infinite scalability in both performance and capacity by simply adding more nodes. While IP SAN and FC SAN are valid terms, they classify storage by the network protocol used (Ethernet/IP vs. Fibre Channel) rather than the organizational architecture of the storage system itself.

NEW QUESTION # 156

.....

Our company in the field of the H19-308_V4.0 exam bootcamp for years, we also enjoy high reputation in the business. You choose us, we will give you the best we have, and your right choice will also bring the benefits to you. With the high reputation in the field, we can guarantee the quality of the H19-308_V4.0 Exam Dumps. It also contains the free update for one year for you. It can save your money for updating, and the update version will send to your mailbox automatically.
