Unparalleled Reliable 100-160 Exam Guide & Leader in Qualification Exams & Perfect 100-160: Cisco Certified Support Technician (CCST) Cybersecurity

BTW, DOWNLOAD part of PDF4Test 100-160 dumps from Cloud Storage: https://drive.google.com/open?id=1ToVp3f3DlgvrOZMRAPp2hmKNIN_otr8t

Our web-based practice exam software is an online version of the 100-160 practice test. It is also quite useful for instances when you have internet access and spare time for study. To study and pass the certification exam on the first attempt, our web-based Cisco 100-160 Practice Test software is your best option. You will go through Cisco Certified Support Technician (CCST) Cybersecurity mock exams and will see for yourself the difference in your preparation.

Cisco 100-160 Exam Syllabus Topics:

Topic	Details
Topic 1	• Essential Security Principles: This section of the exam measures the skills of a Cybersecurity Technician and covers foundational cybersecurity concepts such as the CIA triad (confidentiality, integrity, availability), along with basic threat types and vulnerabilities, laying the conceptual groundwork for understanding how to protect information systems.

Topic 2	• Vulnerability Assessment and Risk Management: This section of the exam measures the skills of a Risk Management Analyst and entails identifying and assessing vulnerabilities, understanding risk priorities, and applying mitigation strategies that help manage threats proactively within an organization's systems
Topic 3	• Basic Network Security Concepts: This section of the exam measures the skills of a Network Defender and focuses on understanding network-level protections, including firewalls, VPNs, and intrusion detection • prevention systems, providing insight into how threats are mitigated within network environments.
Topic 4	• Incident Handling: This section of the exam measures the skills of an Incident Responder and centers on recognizing security incidents, responding appropriately, and containing threats—forming the essential foundation of incident response procedures.
Topic 5	• Endpoint Security Concepts:This section of the exam measures the skills of an Endpoint Security Specialist and includes securing individual devices, understanding protections such as antivirus, patching, and access control at the endpoint level, essential for maintaining device integrity.

There are so many features to show that our 100-160 study guide surpasses others. You can have a free try for downloading our 100-160 exam demo before you buy our products. What's more, you can acquire the latest version of 100-160 training materials checked and revised by our exam professionals after your purchase constantly for a year. Besides, the pass rate of our 100-160 Exam Questions are unparalled high as 98% to 100%, you will get success easily with our help.

Cisco Certified Support Technician (CCST) Cybersecurity Sample Questions (Q323-Q328):

NEW QUESTION # 323
Move each worm mitigation step from the list on the left to the correct description on the right.
Note: You will receive partial credit for each correct answer.

Answer:

Explanation:

NEW QUESTION # 324
Which of the following elements are part of cybersecurity incident response?

- A. Identification, Recovery, Mitigation, Restoration
- B. Prevention, Monitoring, Compliance, Remediation
- C. Detection, Analysis, Containment, Eradication
- D. Assessment, Authorization, Authentication, Accounting

Answer: C

Explanation:
Cybersecurity incident response involves several key elements, including detection, analysis, containment, and eradication. Detection refers to the identification and recognition of a potential cybersecurity incident. Analysis involves examining the incident to understand its nature, impact, and cause. Containment entails taking immediate action to minimize further damage and prevent the incident from spreading. Eradication involves completely removing the threat or vulnerability from the system or network in order to eliminate the possibility of a recurring incident. These elements are crucial for an effective incident response strategy.

NEW QUESTION # 325

Which command-line tool is used to query DNS records and obtain information about domain names?

- A. tcpdump
- B. nslookup
- C. traceroute
- D. netstat

Answer: B

Explanation:
The correct command-line tool for querying DNS records and obtaining information about domain names is nslookup. It can be used to check the security assessment information related to DNS configurations, verify the correct mapping of domain names to IP addresses, and troubleshoot any DNS-related issues.

NEW QUESTION # 326
What is smishing?

- A. A cyber attack where an attacker manipulates and deceives an individual to reveal sensitive information.
- B. A physical attack where an unauthorized person gains entry to a restricted area by following closely behind an authorized person.
- C. A type of phishing attack that targets specific individuals or organizations.
- D. A form of social engineering attack that uses SMS or text messages to trick victims into revealing sensitive information.

Answer: D

Explanation:
Smishing, short for SMS phishing, is a social engineering attack that utilizes SMS or text messages to deceive individuals into disclosing sensitive information or performing certain actions. These messages often mimic legitimate sources, such as banks or service providers, and typically contain links or phone numbers that, when accessed or called, lead to malicious activities. Smishing takes advantage of the ubiquity of mobile devices and users' tendency to trust text messages.

NEW QUESTION # 327
During a change management assessment, what should be evaluated?

- A. The level of user acceptance and satisfaction with the changes
- B. The impact of proposed changes on system functionality
- C. All of the above
- D. The effectiveness of the change management process

Answer: C

Explanation:
During a change management assessment, multiple aspects should be evaluated. Firstly, the impact of proposed changes on system functionality needs to be assessed to ensure that the changes do not negatively affect the overall performance or stability of the system. Secondly, the level of user acceptance and satisfaction with the changes should be evaluated to determine the effectiveness of the change management process and whether it meets the needs and expectations of the users. Assessing these aspects helps in identifying any areas that require improvement. Therefore, all the options mentioned in the
