Answer Area

Objects	Requirement	Object
Virtual entity	Support records that use an integer as a primary key.	Virtual entity
Custom connector	Ensure that data can be read and updated.	Custom connector
	Ensure that data is available to all Common Data Service clients.	Virtual entity

Explanation

A. Answer is: Virtual Entity

You cannot change the Entity primaryid field to some other field. CRM using GUID as the Primary key for each record. If you definitely want to make some other field as Primary key, you could consider using Alternate Keys.

Source:

<https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/developer/define-alternate-key> The caveat being that Alternate Keys can be created for Virtual Entity

B. Answer is: Custom Connector

All virtual entities are read-only.

問題 #106

You work for a multinational company that has Azure and Common Data Service environment in the United States (UTC-7) and Japan (UTC+9).

You create Azure Functions for each location to update key data.

Japan	0 0 19 ** 0-4 0 0 4 ** 1-5 0 0 7 ** 1-5 0 0 11 ** 0-4

答案:

解題說明:

Location Timer schedule

United States	0 0 4 * * 1-5 0 0 7 * * 0-4 0 0 11 * * 1-5 0 0 19 * * 0-4
Japan	0 0 19 * * 0-4 0 0 4 * * 1-5 0 0 7 * * 1-5 0 0 11 * * 0-4

Japan	0 0 19 * * 0-4 0 0 4 * * 1-5 0 0 7 * * 1-5 0 0 11 * * 0-4

Azure Functions uses the NCronTab library to interpret NCRONTAB expressions.

An NCRONTAB expression is similar to a CRON expression except that it includes an additional sixth field at the beginning to use for time precision in seconds:

{second} {minute} {hour} {day} {month} {day-of-week}

NCRONTAB time zones

The numbers in a CRON expression refer to a time and date, not a time span. For example, a 5 in the hour field refers to 5:00 AM, not every 5 hours.

The default time zone used with the CRON expressions is Coordinated Universal Time (UTC).

To have your CRON expression based on another time zone, create an app setting for your function app named WEBSITE_TIME_ZONE.

1-5 is weekdays

Box 2: 0 0 4 * * 1-5

問題 #107

You need to resolve CustomerB's issues with the check-in application.

Which two options can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Filter to LookUp
- B. LookUp to Search
- C. Search to LookUp
- D. LookUp to Filter

答案: B,D

解題說明:

Explanation

CustomerB reports that the check-in app returned only one search result for their last name, which is not the correct name.

The Filter function finds records in a table that satisfy a formula. Use Filter to find a set of records that match one or more criteria and to discard those that don't.

The LookUp function finds the first record in a table that satisfies a formula. Use LookUp to find a single record that matches one or more criteria.

The Search function finds records in a table that contain a string in one of their columns.
