

# Reliable C\_ACDET\_2506 Test Experience | New C\_ACDET\_2506 Exam Practice

BONUS!!! Download part of Prep4cram C\_ACDET\_2506 dumps for free: [https://drive.google.com/open?id=1pvx-PU\\_03PYGP1d0uceRRhvUFDlkaVWt](https://drive.google.com/open?id=1pvx-PU_03PYGP1d0uceRRhvUFDlkaVWt)

It is acknowledged that high-quality service after sales plays a vital role in enhancing the relationship between the company and customers. Therefore, we, as a leader in the field specializing in the {Examcode} exam material especially focus on the service after sales. In order to provide the top service after sales to our customers, our customer agents will work in twenty four hours, seven days a week. So after buying our C\_ACDET\_2506 Study Material, if you have any doubts about the {Examcode} study guide or the examination, you can contact us by email or the Internet at any time you like. We Promise we will very happy to answer your question with more patience and enthusiasm and try our utmost to help you out of some troubles. So don't hesitate to buy our {Examcode} test torrent, we will give you the high-quality product and professional customer services.

## SAP C\_ACDET\_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.</li></ul>

The modern world is becoming more and more competitive and if you are not ready for it then you will be not more valuable for job providers. Be smart in your career decision and enroll in SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite C\_ACDET\_2506 Certification Exam and learn new and in demands skills. Prep4cram with SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite C\_ACDET\_2506 exam questions and answers.

## SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q38-Q43):

### NEW QUESTION # 38

Which of the following applies to Suite Integration?

- A. Suite Integration is a key benefit of SAP Ariba Strategic Sourcing suite as they are natively integrated.
- B. Suite Integration refers to the process of manually connecting SAP Ariba applications with third-party software solutions.
- C. Suite Integration is the activity to integrate SAP Ariba Buying and Invoicing with an SAP Ariba Strategic Sourcing suite solution.
- D. Suite Integration represents the out-of-the-box integration between SAP Ariba Strategic Sourcing suite and S/4HANA Public Cloud.

### Answer: A

Explanation:

Suite Integration in SAP Ariba refers to the native, out-of-the-box integration among SAP Ariba Strategic Sourcing Suite components such as sourcing, contracts, and supplier lifecycle. This integration ensures seamless workflows, shared master data (suppliers, users, commodity codes), and a unified user experience without manual intervention. It is a key benefit differentiating SAP Ariba from fragmented solutions. Manual third-party integrations or ERP integrations like S/4HANA are separate and not referred to as Suite Integration.

### NEW QUESTION # 39

In a Greenfield deployment scenario, how should translation migrations be performed for header field labels, help tips, and validity condition error messages?

- A. Create a package to migrate translations by ICM.
- B. Contact an SAP Deployment lead for customization help.
- C. Translations are included in migrations and are listed as AMLStringResource in the migration UI.
- D. User with Partner Administrator can configure translation.

### Answer: C

Explanation:

In Greenfield deployments, translations for custom field labels, help tips, and validation/error messages are migrated as part of the configuration migration package and are represented in the migration UI as AMLStringResource entries. This structured approach ensures all language-specific content is consistently moved alongside configuration settings.

While administrators and deployment leads may support translation tasks, the migration of translation strings is managed automatically via this AML-based mechanism, not through manual reconfiguration or separate ICM packages.

This ensures a seamless multilingual user experience immediately upon go-live without requiring additional manual translation imports.

### NEW QUESTION # 40

Which of the following applies in a Greenfield deployment scenario when migrating configurations from your test site?

- A. You cannot make other configuration updates in ICM when a migration operation is in progress.
- B. If any configuration type fails during the migration process, you cannot create a new migration request.
- C. The status changes to Complete when migration is finished.
- D. You can revert migrated configurations from the target site.

**Answer: A,C****Explanation:**

During Greenfield migrations using the Intelligent Configuration Manager (ICM), no other configuration updates can be made in ICM while a migration operation is active to ensure stability and consistency of the migration bundle. Additionally, once the migration finishes successfully, the status updates to

"Complete", indicating the configuration is fully migrated and applied.

Contrary to option A, there is no built-in revert or rollback feature in ICM for deployed configurations; changes require new migration cycles. Option D is incorrect because if a migration fails, you can correct the issues and create a new migration request to retry. This process ensures controlled and orderly deployment of configurations.

**NEW QUESTION # 41**

In a Greenfield deployment scenario, how should translation migrations be performed for header field labels, help tips, and validity condition error messages?

- A. Create a package to migrate translations by ICM.
- B. **Translations are included in migrations and are listed as AMLStringResource in the migration**
- C. Contact an SAP Deployment lead for customization help.
- D. User with Partner Administrator can configure translation.

**Answer: B****NEW QUESTION # 42**

Which of the following applies to Suite Integration?

- A. Suite Integration refers to the process of manually connecting SAP Ariba applications with third-party software solutions.
- B. Suite Integration is the activity to integrate SAP Ariba Buying and Invoicing with an SAP Ariba Strategic Sourcing suite solution
- C. **Suite Integration is a key benefit of SAP Ariba Strategic Sourcing suite as they are natively integrated**
- D. Suite Integration represents the out of the box integration between SAP Ariba Strategic Sourcing suite and S/4HANA Public Cloud

**Answer: C****NEW QUESTION # 43**

.....

Selecting the right method will save your time and money. If you are preparing for C\_ACDET\_2506 exam with worries, maybe the professional exam software provided by IT experts from Prep4cram will be your best choice. Our Prep4cram aims at helping you successfully Pass C\_ACDET\_2506 Exam. If you are unlucky to fail C\_ACDET\_2506 exam, we will give you a full refund of the cost you purchased our dump to make up part of your loss.
