## DASCA Senior Data Scientist Sample Questions (Q78-Q83):

### NEW QUESTION # 78

HDFS supports which quotas?

- A. None of the above
- B. Name quotas
- **C. Both A and B**
- D. Space quotas

**Answer: C**

Explanation:

HDFS (Hadoop Distributed File System) provides quota management to control and monitor resource usage across directories:  
Name Quotas (Option A): Limits the number of files and directories that can be created in a given HDFS directory. Helps prevent excessive metadata growth.

Space Quotas (Option B): Limits the total disk space consumed by files within a directory. Helps in capacity planning and avoiding storage overuse.

Since HDFS supports both types, the correct answer is Option C (Both A and B).

### NEW QUESTION # 79

Which of the following phases is NOT a Big Data Business Model Maturity Index?

- A. Business Metamorphosis
- B. Data Monetization
- **C. Business Strategy**
- D. Business Monitoring
- E. Business Optimization

**Answer: C**

Explanation:

The Big Data Business Model Maturity Index (BDBMMI) defines phases organizations pass through in leveraging data strategically:

Business Monitoring (A): Tracking metrics and reporting.

Business Insights (not listed in options but part of the framework).

Business Optimization (B): Using analytics to improve efficiency.

Data Monetization (D): Creating new revenue streams with data.

Business Metamorphosis (E): Transforming the business model through data.

Business Strategy (Option C): While strategy is essential, it is not one of the defined phases of BDBMMI.

Thus, the correct answer is Option C (Business Strategy).

### NEW QUESTION # 80

What is the agenda of discussion at a "stand up" meeting of an Agile team?

- A. Both A and B
- **B. All of the above**
- C. What they are planning to do today
- D. What they accomplished the previous day
- E. Any roadblocks they are running into

**Answer: B**

Explanation:

A daily stand-up meeting (also called a daily Scrum) is a short meeting (usually 15 minutes) that Agile teams hold to synchronize progress. Its agenda is structured around three key questions:

What was accomplished yesterday? (Progress review).

What is planned for today? (Work alignment).

What impediments or roadblocks exist? (Barriers identification).

This process enhances transparency, communication, and accountability, ensuring the team can quickly address obstacles and stay aligned with sprint goals.

Option A: Correct - yesterday's work is discussed.

Option B: Correct - today's planned tasks are outlined.

Option C: Correct - roadblocks are highlighted.

Option D: Incomplete since it misses C.

Option E: Correct - covers all agenda items.

Thus, the correct answer is Option E (All of the above).

## NEW QUESTION # 81

Bernoulli random variable is a type of:

- A. Discrete random variable
- B. Both A and B
- C. Sometimes Discrete or sometimes Continuous random variable
- D. Continuous random variable

Answer: A

Explanation:

A Bernoulli random variable is the simplest form of discrete random variable.

It can take only two values:

1 with probability  $p$  (success).

0 with probability  $(1 - p)$  (failure).

Since the outcomes are finite (binary), it is a discrete random variable.

Option B (Continuous): Incorrect, as continuous variables take values from an interval (e.g., real numbers).

Option C and D: Incorrect, as Bernoulli is always discrete, never continuous.

Thus, the correct answer is Option A (Discrete random variable).

## NEW QUESTION # 82

Which of the following can visualize variations in the base data, which can be used to identify outliers in the data for further investigation?

- A. Trend Analysis
- B. Box Plots
- C. Scatter Plot
- D. None of the above
- E. Histogram

Answer: B

Explanation:

Box plots (or Whisker plots) are statistical graphics that represent data distribution through:

Minimum, First Quartile (Q1), Median, Third Quartile (Q3), and Maximum.

Outliers are plotted as individual points beyond the whiskers.

This makes them particularly powerful for:

Identifying outliers in data.

Comparing distributions across categories.

Understanding variability in data.

Option A (Trend Analysis): Shows temporal patterns, not individual outliers.

Option C (Histogram): Shows frequency distribution but does not explicitly highlight outliers.

Option D (Scatter Plot): Shows relationships between variables but doesn't focus on statistical outliers in one distribution. Thus, the correct answer is Option B (Box Plots).
