

# Most Probable Real Exam Questions in AZ-700 Designing and Implementing Microsoft Azure Networking Solutions PDF Dumps Format

## Exam Ref AZ-700 Designing and Implementing Microsoft Azure Networking Solutions

### DESCRIPTION

COPY LINK: <https://pdf.bookcenterapp.com/slide/0137682778> Prepare for Microsoft Exam AZ-700 and help demonstrate your real-world mastery of planning, implementing, and maintaining Azure networking solutions, including hybrid networking, connectivity, routing, security, and private access to Azure services. Designed for professionals with Azure networking experience, this Exam Ref focuses on the critical thinking and decision-making acumen needed for success at the Microsoft Certified: Network Engineer Associate level. Focus on the expertise measured by these objectives: Design, implement, and manage hybrid networking; Design and implement core networking infrastructure; Design and implement routing; Secure and monitor networks; Design and implement private access to Azure services; This Microsoft Exam Ref: Organizes its coverage by exam objectives; Features strategic, what-if scenarios to challenge you; Assumes you have expertise in planning, implementing, and maintaining Azure networking solutions; About the Exam: Exam AZ-700 focuses on knowledge needed to design, implement, and manage site-to-site and point-to-site VPN connections, and Azure ExpressRoute design and implement virtual network private IP addressing, name resolution, cross-virtual network connectivity, and Azure Virtual WAN architectures; Design and implement virtual network routing, Azure Load Balancer, Azure Application Gateway, Azure Front Door, and Azure Traffic Manager; profile, secure and monitor networks via Azure Firewall, network security groups (NSGs), Web Application Firewall (WAF), Azure Monitor, and other tools; Design and implement Azure Private Link, Azure Private Endpoint, service endpoints, and virtual network integration for dedicated PaaS services. About Microsoft Certification: Passing this exam fulfills your requirements for the Microsoft Certified: Network Engineer Associate credential, demonstrating your expertise as a Network Engineer capable of recommending, planning, and implementing Azure networking solutions managing them for performance, resiliency, scale, and security; Deploying them via the Azure Portal and other methods and working with architects, administrators, engineers, and developers to deliver Azure solutions. P.S. Free & New AZ-700 dumps are available on Google Drive shared by BraindumpsPass: [https://drive.google.com/open?id=1ZH0Tx-x1\\_2wYmomNcxZAE0BIRr6VCPzD](https://drive.google.com/open?id=1ZH0Tx-x1_2wYmomNcxZAE0BIRr6VCPzD)

The AZ-700 study braindumps are compiled by our professional experts who have been in this career for over ten years. Carefully written and constantly updated content of our AZ-700 exam questions can make you keep up with the changing direction of the exam, without aimlessly learning and wasting energy. In addition, there are many other advantages of our AZ-700 learning guide. Hope you can give it a look and you will love it for sure!

Microsoft AZ-700 exam is designed for IT professionals who want to demonstrate their expertise in designing and implementing Microsoft Azure networking solutions. Candidates who pass AZ-700 exam can prove their skills in designing and implementing Azure network solutions, including network security, hybrid networking, and Azure virtual network connectivity. AZ-700 Exam also tests your ability to manage Azure network resources, monitor network performance, and troubleshoot network issues.

**100% Pass Quiz Reliable AZ-700 - Designing and Implementing Microsoft Azure Networking Solutions Reliable Test Practice**

If you want to sail through the difficult Microsoft AZ-700 Exam, it would never do to give up using exam-related materials when you prepare for your exam. If you would like to find the best certification training dumps that suit you, BraindumpsPass is the best place to go. BraindumpsPass is a well known and has many excellent exam dumps that relate to IT certification test. Moreover all exam dumps give free demo download. If you want to know whether BraindumpsPass practice test dumps suit you, you can download free demo to experience it in advance.

To prepare for the AZ-700 exam, candidates should have a strong understanding of Azure networking concepts and services. Microsoft recommends that candidates have at least two years of experience designing and implementing networking solutions in Azure. Candidates may also benefit from taking training courses and practice exams to help them prepare for the exam. Passing the AZ-700 exam demonstrates a candidate's ability to design and implement complex networking solutions in Azure, and can help them advance their career as an Azure solutions architect.

Microsoft AZ-700 Certification Exam is designed for professionals who are interested in becoming certified experts in designing and implementing Microsoft Azure networking solutions. AZ-700 exam is intended for professionals who are already familiar with Azure networking and want to take their skills to the next level. AZ-700 exam is designed to test the candidate's knowledge, skills, and abilities in various areas such as implementing Azure virtual networks, designing and implementing Azure load balancing solutions, and designing and implementing Azure VPN solutions.

## **Microsoft Designing and Implementing Microsoft Azure Networking Solutions Sample Questions (Q91-Q96):**

### **NEW QUESTION # 91**

You need to implement outbound connectivity for VMSScaleSet1. The solution must meet the virtual networking requirements and the business requirements.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/load-balancer/skus>

<https://docs.microsoft.com/en-us/azure/load-balancer/load-balancer-outbound-connections#outboundrules>

### **NEW QUESTION # 92**

You have an on-premises network.

You have an Azure subscription that contains a virtual network named VNet1. VNet1 is connected to an Azure Virtual WAN hub named Hub1.

You need to enable connectivity between the on-premises network and VNet1 by using Hub1.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

1 - Create a VPN site.

2 - Connect the VPN site to Hub1.

3 - Configure a Site-toSite (S2S) VPN gateway.

### **NEW QUESTION # 93**

You are planning an Azure solution that will contain the following types of resources in a single Azure region:

Virtual machine

Azure App Service

Virtual Network gateway

Azure SQL Managed Instance

App Service and SQL Managed Instance will be delegated to create resources in virtual networks.

You need to identify how many virtual networks and subnets are required for the solution. The solution must minimize costs to transfer data between virtual networks.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

□

#### Answer:

Explanation:

□

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-network/virtual-network-for-azure-services#services-that-can-be-deployed-into-a-virtual-network>

### NEW QUESTION # 94

Azure virtual networks in the East US Azure region as shown in the following table.

□

The virtual networks are peered to one another. Each virtual network contains four subnets.

You plan to deploy a virtual machine named VM1 that will inspect and route traffic between all the subnets on both the virtual networks.

What is the minimum number of IP addresses that you must assign to VM1?

- A. 0
- **B. 1**
- C. 2
- D. 3

#### Answer: B

### NEW QUESTION # 95

You have two Azure subscriptions named Sub1 and Sub2 that contain the resources shown in the following table.

□

VNet1 and VNet2 are NOT connected.

You plan to create an Azure Private Link service named Link1 that will be used to connect VNet1 and VNet2.

You need to ensure that Link1 meets the following requirements:

\* Ensures that VM1 can connect only to a web app hosted on VM2

\* Prevents VM1 from connecting to the other resources that are connected to VNet2 Which additional resources should you create for each virtual network? To answer, drag the appropriate resources to the correct virtual networks. Each resource may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

□

#### Answer:

Explanation:

□

Explanation:

□
