

C1000-130 Passing Score Feedback & C1000-130 Training Kit

P.S. Free 2025 IBM C1000-130 dumps are available on Google Drive shared by PassTestking: <https://drive.google.com/open?id=1QNASAYdChSK9rTZQFCZE-JVUQk4uTr9s>

Everyone is looking for ways to improve their ability. How can you stand out? Perhaps you can beat them in time. Our C1000-130 exam materials don't require you to spend a lot of time learning, you can go to the C1000-130 exam after you use them for twenty to thirty hours. This means that you can pass several exams when someone else passes an exam! Is it amazing? Yes, and only with our C1000-130 Practice Engine, you can achieve all of these for we are the leader in this career for over ten years.

You have tried all kinds of exam questions when others are still looking around for C1000-130 exam materials, which means you have stayed one step ahead of other IT exam candidates. C1000-130 Exam software provided by our PassTestking consists of full exam resources will offer you a simulation of the real exam atmosphere of C1000-130.

PassTestking provides IBM Cloud Pak for Integration V2021.2 Administration (C1000-130) practice tests (desktop and web-based) to its valuable customers so they get the awareness of the C1000-130 certification exam format. Likewise, IBM Cloud Pak for Integration V2021.2 Administration (C1000-130) exam preparation materials for C1000-130 exam can be downloaded

instantly after you make your purchase.

IBM Cloud Pak for Integration V2021.2 Administration Sample Questions (Q63-Q68):

NEW QUESTION # 63

Which two authentication types support single sign-on?

- A. Enterprise LDAP
- B. Plain text over HTTPS
- C. Enterprise SSH
- D. OpenShift authentication
- E. 2FA

Answer: A,D

Explanation:

Single Sign-On (SSO) is an authentication mechanism that allows users to log in once and gain access to multiple applications without re-entering credentials. In IBM Cloud Pak for Integration (CP4I), Enterprise LDAP and OpenShift authentication both support SSO.

Enterprise LDAP (B) - ☐ Supports SSO

Lightweight Directory Access Protocol (LDAP) is commonly used in enterprises for centralized authentication.

CP4I can integrate with Enterprise LDAP, allowing users to authenticate once and access multiple cloud services without needing separate logins.

OpenShift Authentication (E) - ☐ Supports SSO

OpenShift provides OAuth-based authentication, enabling SSO across multiple OpenShift-integrated services.

CP4I uses OpenShift's built-in identity provider to allow seamless user authentication across different Cloud Pak components.

Analysis of the Incorrect Options:

A . 2FA (Incorrect):

Two-Factor Authentication (2FA) enhances security by requiring an additional verification step but does not inherently support SSO.

C . Plain Text over HTTPS (Incorrect):

Plain text authentication is insecure and does not support SSO.

D . Enterprise SSH (Incorrect):

SSH authentication is used for remote access to servers but is not related to SSO.

NEW QUESTION # 64

Which command shows the current cluster version and available updates?

- A. update
- B. upgrade
- C. adm update
- D. adm upgrade

Answer: D

NEW QUESTION # 65

Which two App Connect resources enable callable flows to be processed between an integration solution in a cluster and an integration server in an on-premise system?

- A. Sync server
- B. Connectivity agent
- C. Kafka sync
- D. Switch server

- E. Routing agent

Answer: B,D

NEW QUESTION # 66

Which two OpenShift project names can be used for installing the Cloud Pak for Integration operator?

- A. openshift-cp4i
- B. cp4i
- C. openshift-infra
- D. openshift
- E. default

Answer: C,D

Explanation:

Explanation

<https://www.ibm.com/docs/en/cloud-paks/cp-integration/2021.2?topic=installing-operators>

NEW QUESTION # 67

An administrator is checking that all components and software in their estate are licensed. They have only purchased Cloud Pak for Integration (CP4I) licenses.

How are the OpenShift master nodes licensed?

- A. OpenShift master nodes do not consume OpenShift license entitlement, so no license is needed.
- B. CP4I licenses include entitlement for the entire OpenShift cluster that they run on, and the administrator can count against the master nodes.
- C. The administrator will need to purchase additional OpenShift licenses to cover the master nodes.
- D. CP4I licenses include entitlement for 3 cores of OpenShift per core of CP4I.

Answer: A

Explanation:

In IBM Cloud Pak for Integration (CP4I) v2021.2, licensing is based on Virtual Processor Cores (VPCs), and it includes entitlement for OpenShift usage. However, OpenShift master nodes (control plane nodes) do not consume license entitlement, because:

OpenShift licensing only applies to worker nodes.

The master nodes (control plane nodes) manage cluster operations and scheduling, but they do not run user workloads.

IBM's Cloud Pak licensing model considers only the worker nodes for licensing purposes.

Master nodes are essential infrastructure and are excluded from entitlement calculations.

IBM and Red Hat do not charge for OpenShift master nodes in Cloud Pak deployments.

Explanation of Incorrect Answers:

A . CP4I licenses include entitlement for the entire OpenShift cluster that they run on, and the administrator can count against the master nodes. → ☐ Incorrect CP4I licenses do cover OpenShift, but only for worker nodes where workloads are deployed.

Master nodes are excluded from licensing calculations.

C . The administrator will need to purchase additional OpenShift licenses to cover the master nodes. → ☐ Incorrect No additional OpenShift licenses are required for master nodes.

OpenShift licensing only applies to worker nodes that run applications.

D . CP4I licenses include entitlement for 3 cores of OpenShift per core of CP4I. → ☐ Incorrect The standard IBM Cloud Pak licensing model provides 1 VPC of OpenShift for 1 VPC of CP4I, not a 3:1 ratio.

Additionally, this applies only to worker nodes, not master nodes.
