

C1000-173 Dumps & C1000-173 Exam Assessment

BONUS!!! Download part of Pass4cram C1000-173 dumps for free: <https://drive.google.com/open?id=1DTxTxk8vkUui3eZdF1NTV5ayQWC6ji4B>

Through all these years' experience, our C1000-173 training materials are becoming more and more perfect. Moreover, we hold considerate after-sales services and sense-and-respond tenet all these years. So if you get any questions of our C1000-173 learning guide, please get us informed. It means we will deal with your doubts with our C1000-173 practice materials 24/7 with efficiency and patience.

IBM C1000-173 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Security Requirements: This domain targets a Security Architect and focuses on planning security for a Cloud Pak for Data deployment. It includes managing certificates that secure communications, identity management systems, and access and authorization controls to enforce secure and compliant user and service interactions. The auditing features and their integration with enterprise audit systems are crucial to ensure traceability and accountability. Asset interchange security involves safeguarding data movement between services.
Topic 2	<ul style="list-style-type: none">• Architect with Data Source Services: This domain measures expertise of a Data Integration Architect and includes architecting solutions with data replication technologies to synchronize data across systems. IBM Data Virtualization architecture enables access to and querying of disparate data sources without data movement. Architecting with watsonx.data focuses on building intelligent data lakes and query engines. Architecting with Db2-related services involves designing scalable data management and processing architectures using IBM's Db2 platforms.
Topic 3	<ul style="list-style-type: none">• Architect with Analytic Services: This domain targets a Data Analytics Architect and focuses on designing solutions using analytic components of Cloud Pak for Data. Architecting with DataStage involves creating data integration and ETL pipelines. Data Refinery architectures prepare and cleanse data for analysis. Db2 Big SQL solutions address querying large distributed data sets with SQL, facilitating analytics across diverse data sources.

Topic 4	<ul style="list-style-type: none"> • Architect with Data Governance Services: This section evaluates skills of a Data Governance Specialist, covering the architecture of knowledge catalogs to enable data discovery and management. Data Privacy architectures ensure compliance with regulatory requirements around data protection. Knowledge Accelerators involve designing solutions that speed up data governance processes through predefined policies and templates.

Free PDF Quiz 2025 Efficient IBM C1000-173 Dumps

Our C1000-173 study materials are easy to be mastered and boost varied functions. We compile Our C1000-173 preparation questions elaborately and provide the wonderful service to you thus you can get a good learning and preparation for the C1000-173 Exam. After you know the characteristics and functions of our C1000-173 training materials in detail, you will definitely love our exam dumps and enjoy the wonderful study experience.

IBM Cloud Pak for Data v4.7 Architect Sample Questions (Q122-Q127):

NEW QUESTION # 122

In a multi-tenant Cloud Pak for Data environment, which aspects are critical to ensure efficient resource allocation and isolation?

- A. Dedicated network resources per tenant
- B. Customizable user interfaces
- C. Isolated data storage
- D. Resource quotas per tenant

Answer: A,C,D

NEW QUESTION # 123

How does Watson Discovery support effective knowledge management in an enterprise?

- A. By limiting access to structured data only
- B. By facilitating deep insights extraction from complex documents
- C. By enabling intuitive data archiving
- D. By prioritizing data deletion

Answer: B

NEW QUESTION # 124

How are caches defined in IBM Data Virtualization?

- A. They are created automatically based on usage patterns.
- B. DataStage flows are created in a project for maintaining caches.
- C. Caches are manually defined based on recommendations and monitoring data.
- D. Caches are suggested based on statistics collected during data source configuration.

Answer: C

Explanation:

In IBM Data Virtualization, caches must be manually defined by administrators. While monitoring and query performance statistics can guide where caching would be beneficial, the creation and configuration of caches (e.g., refresh schedules and scope) are manual tasks. There is no automated cache creation mechanism (A), nor are DataStage flows used for cache maintenance (B). Suggestions based on statistics (D) may assist administrators, but they do not automatically create the caches.

NEW QUESTION # 125

In the context of data replication, what is a key benefit of minimizing the impact of outages?

- A. Increased data loss during outages
- B. Prolonged data unavailability
- C. Reduced system reliability
- **D. Enhanced business continuity and disaster recovery**

Answer: D

NEW QUESTION # 126

What must be created to enable the Cloud Pak for Data platform to use a company's custom CA certificate to validate certificates from internal servers?

- A. A configmap that contains all internal server certificate chains.
- B. A secret containing a wildcard certificate for all internal servers.
- **C. A configmap that contains the company's CA certificate.**
- D. A secret that contains the company's CA certificate.

Answer: C

Explanation:

To enable IBM Cloud Pak for Data to trust certificates from internal servers using a custom Certificate Authority (CA), the correct method is to create a Kubernetes ConfigMap that contains the CA certificate. This ConfigMap is referenced by the platform's foundational services to include the CA in the trusted root store.

Secrets are typically used for storing sensitive data like private keys and TLS certificates but are not used for adding trusted root CAs at the platform level. A ConfigMap is explicitly required by the platform to inject the CA trust into the certificate validation chain.

NEW QUESTION # 127

.....

The desktop IBM C1000-173 exam simulation software works only on Windows, but the web-based IBM C1000-173 practice exam is compatible with all operating systems. You can take the online IBM C1000-173 Mock Test without software installation via Chrome, Opera, Firefox, or another popular browser.
