At QuestionsTube, you can read C1000-173 free demo questions in pdf file, so you can check the questions and answers before deciding to download the IBM C1000-173 practice questions. These free demo questions are parts of the C1000-173 exam questions. Download and read them carefully, you will find that the C1000-173 test questions of QuestionsTube will be your great learning materials online. Share some C1000-173 exam online questions below.

1. Which of the following best describes the importance of encryption of data at rest in IBM Cloud Pak

P.S. Free & New C1000-173 dumps are available on Google Drive shared by Actual4test: <https://drive.google.com/open?id=1H3A3mp-BHZAWvy6tRLHfZ4ciqFtHx45X>

In the face of fierce competition, you should understand the importance of time. You must walk in front of the competitors. If you have more strength, you will get more opportunities. Your dream life can really become a reality! C1000-173 learning materials are here, right to choose! And you will find that you will get benefited from C1000-173 Exam Braindumps far beyond you can image. Not only you can get more professional knowledge but also you can get the C1000-173 certification to find a better career.

IBM C1000-173 Exam Syllabus Topics:

Topic	Details
Topic 1	• Architect with Analytic Services: This domain targets a Data Analytics Architect and focuses on designing solutions using analytic components of Cloud Pak for Data. Architecting with DataStage involves creating data integration and ETL pipelines. Data Refinery architectures prepare and cleanse data for analysis. Db2 Big SQL solutions address querying large distributed data sets with SQL, facilitating analytics across diverse data sources.

Topic 2	• Security Requirements: This domain targets a Security Architect and focuses on planning security for a Cloud Pak for Data deployment. It includes managing certificates that secure communications, identity management systems, and access and authorization controls to enforce secure and compliant user and service interactions. The auditing features and their integration with enterprise audit systems are crucial to ensure traceability and accountability. Asset interchange security involves safeguarding data movement between services.
Topic 3	• Architect with Data Governance Services: This section evaluates skills of a Data Governance Specialist, covering the architecture of knowledge catalogs to enable data discovery and management. Data Privacy architectures ensure compliance with regulatory requirements around data protection. Knowledge Accelerators involve designing solutions that speed up data governance processes through predefined policies and templates.
Topic 4	• Plan for a Cloud Pak for Data Implementation: This section of the exam measures the skills of an Implementation Consultant and covers determining which Cloud Pak for Data services to deploy based on organizational needs. It involves sizing the Kubernetes • OpenShift cluster appropriately for workload demands and planning backup and restore strategies to ensure data protection. Planning for high availability and disaster recovery is essential to maintain uninterrupted service. Multi-tenancy requirements must be understood to support multiple user groups securely on shared infrastructure. Migration requirements need assessment to transition existing data and workloads smoothly.

C1000-173 exam braindumps: IBM Cloud Pak for Data v4.7 Architect & C1000-173 study guide

There are many users that are using IBM Cloud Pak for Data v4.7 Architect (C1000-173) exam questions and rated it as one of the best in the market. The customers are pleased with IBM Cloud Pak for Data v4.7 Architect (C1000-173) exam questions and all of them have passed the IBM Cloud Pak for Data v4.7 Architect (C1000-173) certification exam on the very first try.

IBM Cloud Pak for Data v4.7 Architect Sample Questions (Q166-Q171):

NEW QUESTION # 166

What registry permissions does OpenShift cluster node require?

- A. Only the bastion node should be able to reach the registry.
- B. Only the master nodes ever require registry access.
- **C. All nodes must be able to push to and pull from the registry.**
- D. While the bastion node pushes to the private registry, only the worker nodes pull images.

Answer: C

Explanation:

In an OpenShift environment that hosts IBM Cloud Pak for Data, all cluster nodes-including master and worker nodes-must have access to the container registry to pull required images during deployment and runtime. In scenarios involving custom images, some nodes may also need to push to the registry. While the bastion node may initiate the setup or mirror images, it is not the only node involved. Therefore, all nodes should be configured with both pull and, where applicable, push access to the registry to ensure consistent deployment and operations.

NEW QUESTION # 167

Which architectural consideration is crucial when deploying IBM Cloud Pak for Data on Red Hat OpenShift to ensure high availability?

- **A. Storage class performance**
- B. Network latency

- C. Resource quotas
- D. Pod colocation

Answer: A

NEW QUESTION # 168

What is the purpose of profiling data in Data Refinery?

- A. Loading data into a different location.
- B. Creating data backups.
- **C. Validating the data.**
- D. Creating data visualizations.

Answer: C

Explanation:

Profiling data in Data Refinery is primarily used for validating the quality, structure, and characteristics of the dataset. It provides insights such as column data types, value distributions, null counts, and patterns, enabling users to detect anomalies, inconsistencies, or data quality issues before performing transformations or analytics. It is not intended for data loading (B), backups (C), or visualization (D), although it provides basic statistical overviews as part of validation.

NEW QUESTION # 169

In DataStage, how is workload management typically achieved?

- A. By manually distributing tasks across nodes
- B. By employing external workload management tools
- **C. Through an automated, policy-driven approach**
- D. By prioritizing workloads based solely on data volume

Answer: C

NEW QUESTION # 170

The data integration team at a financial services company has always struggled to manage resources as the number of integration jobs changes throughout the month.

Which two settings are available when configuring Dynamic Workload Management for a specific DataStage instance?

- A. Job Configuration File (APT_CONFIG_FILE)
- B. ETL/ELT Mode (ETL, ELT, or Hybrid)
- **C. Auto-scaling (computePodsMin, computePodsMax)**
- D. Job Log Retention (log_retention)
- **E. Job Count (JobCount)**

Answer: C,E

NEW QUESTION # 171

.....

Our online version of C1000-173 learning guide does not restrict the use of the device. You can use the computer or you can use the mobile phone. You can choose the device you feel convenient at any time. Once you have used our C1000-173 exam training in a network environment, you no longer need an internet connection the next time you use it, and you can choose to use C1000-173 Exam Training at your own right. Our C1000-173 exam training do not limit the equipment, do not worry about the network, this will reduce you many learning obstacles, as long as you want to use C1000-173 test guide, you can enter the learning state.
