

C1000-173 Test Braindumps - C1000-173 Knowledge Points

IBM C1000-173 Practice Questions

IBM Cloud Pak for Data V4.7 Architect

Order our C1000-173 Practice Questions Today and Get Ready to Pass with Flying Colors!

C1000-173 Practice Exam Features | QuestionsTube

- Latest & Updated Exam Questions
- Subscribe to FREE Updates
- Both PDF & Exam Engine
- Download Directly Without Waiting

<https://www.questionstube.com/exam/c1000-173/>

At QuestionsTube, you can read C1000-173 free demo questions in pdf file, so you can check the questions and answers before deciding to download the IBM C1000-173 practice questions. These free demo questions are parts of the C1000-173 exam questions. Download and read them carefully, you will find that the C1000-173 test questions of QuestionsTube will be your great learning materials online. Share some C1000-173 exam online questions below.

1. Which of the following best describes the importance of encryption of data at rest in IBM Cloud Pak

BONUS!!! Download part of Actual4Cert C1000-173 dumps for free: https://drive.google.com/open?id=1SMHXCu_7H0zVEVHs3uekOgcAhBaCPTwC

As we all know, no pain, no gain. If you want to enter a better company, you must have the competitive force. C1000-173 learning materials will offer you such opportunity to pass the exam and get the certificate successfully, so that you can improve your competitive force. Also, you need to spend certain time on practicing the C1000-173 Exam Dumps, so that you can get the certificate at last. Besides, we pass guarantee and money back guarantee if you fail to pass the exam after buying C1000-173 learning materials. We also offer you free update for one year, and the update version will be sent to your email automatically.

IBM C1000-173 Exam Syllabus Topics:

Topic	Details

Topic 1	• Plan for a Cloud Pak for Data Implementation: This section of the exam measures the skills of an Implementation Consultant and covers determining which Cloud Pak for Data services to deploy based on organizational needs. It involves sizing the Kubernetes • OpenShift cluster appropriately for workload demands and planning backup and restore strategies to ensure data protection. Planning for high availability and disaster recovery is essential to maintain uninterrupted service. Multi-tenancy requirements must be understood to support multiple user groups securely on shared infrastructure. Migration requirements need assessment to transition existing data and workloads smoothly.
Topic 2	• Architect with AI Series: This section measures the skills of an AI Solution Architect and includes designing architectures for solutions involving various IBM Watson AI services. Architecting with Watson Assistant involves creating conversational AI interfaces. Watson Discovery solutions focus on building cognitive search and content analytics applications. Watson Pipelines solutions involve orchestrating data science workflows. Watson OpenScale architectures enable AI model monitoring and governance. Architecting with Match 360 supports personalized engagement by integrating multi-channel customer insights.
Topic 3	• Architect with Analytic Services: This domain targets a Data Analytics Architect and focuses on designing solutions using analytic components of Cloud Pak for Data. Architecting with DataStage involves creating data integration and ETL pipelines. Data Refinery architectures prepare and cleanse data for analysis. Db2 Big SQL solutions address querying large distributed data sets with SQL, facilitating analytics across diverse data sources.
Topic 4	• Architect with Data Source Services: This domain measures expertise of a Data Integration Architect and includes architecting solutions with data replication technologies to synchronize data across systems. IBM Data Virtualization architecture enables access to and querying of disparate data sources without data movement. Architecting with watsonx.data focuses on building intelligent data lakes and query engines. Architecting with Db2-related services involves designing scalable data management and processing architectures using IBM's Db2 platforms.

C1000-173 Knowledge Points | New C1000-173 Test Experience

We assure you that we are focused on providing you with guidance about our C1000-173 exam question, but all services are free. If you encounter installation problems, we will have professionals to provide you with remote assistance. Of course, we will humbly accept your opinions on our C1000-173 Quiz guide. If you have good suggestions to make better use of our C1000-173 test prep, we will accept your proposal and make improvements. Each of your progress is our driving force. We sincerely serve for you any time.

IBM Cloud Pak for Data v4.7 Architect Sample Questions (Q25-Q30):

NEW QUESTION # 25

What does Watson OpenScale require to generate statistics?

- A. Training data
- B. Access to Pipeline
- C. Test data subset (10%)
- D. Complete test data set

Answer: A

Explanation:

* Training Data Statistics: Watson OpenScale needs to understand the characteristics of the data the model was trained on. This includes things like the distribution of features, sensitive attributes (for fairness monitoring), and how the model performed on this initial data. These "training data statistics" are crucial for:

* Fairness Configuration: Recommending fairness attributes, reference, and monitored groups.

* Bias Detection: Calculating fairness metrics (like disparate impact) by comparing runtime behavior to the learned training data

distribution.

* Explainability: Generating explanations by understanding the distribution of values in the training data to create meaningful perturbations.

* Drift Detection: Building a drift detection model that compares runtime data to the training data to identify shifts.

While Watson OpenScale also consumes payload data (the data sent to the deployed model for predictions) at runtime to calculate various metrics and perform monitoring, the initial setup and the ability to generate meaningful statistics for things like fairness and drift fundamentally rely on understanding the training data

NEW QUESTION # 26

What is the primary goal of High Availability in computing environments?

- A. To reduce the efficiency of backup processes
- B. To maximize system downtime
- C. To ensure a system operates at its peak capacity
- D. To minimize downtime and prevent data loss

Answer: D

NEW QUESTION # 27

How does data replication facilitate multi-site data distribution?

- A. By increasing the complexity of data management
- B. By limiting data access to a single location
- C. By ensuring data is available across different geographical locations
- D. By increasing the complexity of data management

Answer: C

NEW QUESTION # 28

What are two considerations when choosing the type of storage for Cloud Pak for Data?

- A. The storage network must support a minimum transmission speed of 4 Gbps.
- B. NFS storage supports all Cloud Pak for Data services.
- C. The storage supports the services that will be installed.
- D. The storage provides sufficient I/O performance.
- E. The storage data has a throughput minimum of 16 MB/s per disk.

Answer: C,D

Explanation:

When selecting storage for Cloud Pak for Data, two critical considerations are:

Ensuring the storage supports the specific services being deployed. Not all services are compatible with every storage type (e.g., some services require block storage, others may support NFS).

The storage must provide sufficient I/O performance to meet the operational demands of the workloads.

Transmission speeds and throughput metrics are useful but not directly required as standalone criteria.

Additionally, NFS is not universally supported by all services; some services specifically require RWO (ReadWriteOnce) or RWX (ReadWriteMany) access modes.

NEW QUESTION # 29

Which features of the IBM Knowledge Catalog service are unavailable with the Data Governance Express offering?

- A. Semantic search and metadata analysis
- B. Data quality features in analytics projects and ETL
- C. Advanced metadata export and lineage
- D. Lineage and semantic search

Answer: C

Explanation:

IBM Knowledge Catalog's Data Governance Express offering is a lightweight configuration meant for streamlined governance needs. It includes core capabilities like cataloging and basic lineage but does not support advanced metadata export or full-scale lineage visualization and tracking features. These advanced features are only available in the full IBM Knowledge Catalog service. The Express tier is designed for simpler use cases and quicker onboarding with limited governance overhead.

NEW QUESTION # 30

.....

There are many merits of our product on many aspects and we can guarantee the quality of our C1000-173 practice engine. Firstly, our experienced expert team compile them elaborately based on the real exam and our C1000-173 study materials can reflect the popular trend in the industry and the latest change in the theory and the practice. Secondly, both the language and the content of our C1000-173 Study Materials are simple, easy to be understood and suitable for any learners.
