

C1000-189 New Braindumps - C1000-189 Pdf Dumps

In the process of using the C1000-189 study training materials, once users have any questions about our study materials, the user can directly by E-mail us, our products have a dedicated customer service staff to answer for the user, they are 24 hours service for you, we are very welcome to contact us by E-mail and put forward valuable opinion for us. Our C1000-189 Latest Questions already have three different kinds of learning materials, what is the most suitable C1000-189 test guide for you? You can just follow the instructions for C1000-189 study guide on the web or ask our services about it.

Our C1000-189 useful test guide materials present the most important information to the clients in the simplest way so our clients need little time and energy to learn our C1000-189 useful test guide. The clients only need 20-30 hours to learn and prepare for the test. For those people who are busy in their jobs, learning or other things this is a good news because they needn't worry too much that they don't have enough time to prepare for the test and can leisurely do their main things and spare little time to learn our C1000-189 study practice guide. So it is a great advantage of our C1000-189 exam materials and a great convenience for the clients.

High Pass-Rate C1000-189 New Braindumps offer you accurate Pdf Dumps | IBM IBM Instana Observability v1.0.277 Administrator - Professional

Our C1000-189 question torrent not only have reasonable price but also can support practice perfectly, as well as in the update to facilitate instant upgrade for the users in the first place, compared with other education platform on the market, the C1000-189 Exam Question can be said to have high quality performance. We can sure that you will never regret to download and learn our study material, and you will pass the exam at your first try.

IBM Instana Observability v1.0.277 Administrator - Professional Sample Questions (Q60-Q65):

NEW QUESTION # 60

Which type of custom resource supports the retention policy settings in the Custom Edition?

- A. UnitProp

- **B. CoreSpec**
- C. ConfigYaml
- D. StorageConf

Answer: B

Explanation:

According to the official IBM Instana Observability documentation (v1.0.304), retention policy settings in Custom Edition are NOT configured in a custom resource called "StorageConf." Instead, they are configured as properties within the CoreSpec of the Core custom resource. The documentation explicitly states: "Overwriting the default retention settings is optional and should only be done consciously. These retention setting values are configured as properties in the CoreSpec." The actual configuration looks like this:

text

kind: Core

metadata:

name: instana-core

namespace: instana-core

spec:

properties:

- name: retention.metrics.rollup5

value: "86400"

- name: config.appdata.shortterm.retention.days

value: "7"

- name: config.synthetic.retention.days

value: "60"

The retention policies for infrastructure metrics, application data, and synthetic monitoring are all configured as properties within the Core spec, not in a separate "StorageConf" custom resource. "StorageConf" refers to storage configurations for raw spans (S3, GCS, Azure), not retention policies.

NEW QUESTION # 61

For which event type does Instana create an alert because end users are impacted?

- A. Monitoring issues
- B. Issues
- **C. Incident**
- D. Changes

Answer: C

Explanation:

Based on IBM Instana documentation review, Incidents are the event type that triggers alerts when end users are impacted. The official IBM documentation states: "An incident helps you to understand situations impacting your edge services and critical infrastructure... Incidents are created as soon as Instana detects either a key performance indication (KPI) is breached on an edge service, or a critical infrastructure issue." However, the documentation also clarifies: "An issue is an event that is triggered if something out of the ordinary happens... An issue by itself does not trigger an alert, Instana simply notes that it happened. Should the service to where this system is connected behave badly, this issue is part of the incident." Critical issues can trigger alerts and may impact end users, but Incidents are specifically designed to represent situations where end-user-facing services (edge services) are impacted. The answer is B. Incident as the primary event type for end-user impact alerts.

NEW QUESTION # 62

By default, which rate limit is applied to Instana API calls for per hour usage?

- A. 10,000
- **B. 5,000**
- C. 1,000
- D. 6,000

Answer: B

Explanation:

Instana sets API rate limits to ensure fair resource usage and platform stability across accounts. According to the IBM Instana Observability documentation, "The default rate limit for the Instana REST API is 5,000 calls per hour per account." This policy is enforced automatically; when an account's API activity reaches the limit, further requests are temporarily blocked until the next hour begins. This guards against accidental overload as well as malicious consumption, and is fundamental for multi-tenant operation. Organizations may request increases for large-scale use cases, but 5,000 per hour is the standard value pre-configured for all accounts. Instana recommends that automation and integrations are engineered to respect this quota, using exponential backoff and batching if needed. Values such as 10,000, 6,000, or 1,000 are not defaults, and modifying them requires special support intervention.

NEW QUESTION # 63

What is mandatory to use Instana REST APIs?

- A. Python
- **B. Token**
- C. Cookie
- D. CURL

Answer: B

Explanation:

Access to Instana's REST API is secured using authorization tokens—an industry-standard best practice for API authentication and traceability. IBM documentation says: "A personal or team API token is required to authenticate REST API calls." Tokens serve as credentials embedded in HTTP headers on each request, providing both identity and access control for the API consumer. Tokens are mandatory; without a valid token, any API requests are denied with a 401 Unauthorized error, regardless of whether a tool (such as CURL) is used. Tokens can be scoped for individual users (personal tokens) or teams (team tokens), enabling granular tracking and revocation as part of enterprise security policies. API tokens are generated from the Instana UI under the profile or team section. Cookies and raw client libraries (e.g., Python) are not authentication methods for Instana APIs.

NEW QUESTION # 64

Which statement accurately describes the use of the agent key?

- **A. It is used for both downloading Instana artifacts and deploying an instance.**
- B. It is not included in the purchase email and must be obtained separately.
- C. It is used only for deploying an instance.
- D. It is required only for downloading the license.

Answer: A

Explanation:

The IBM Instana Observability product architecture uses a security credential called an agent key for authentication and authorization in both installation and deployment operations. The documentation explicitly affirms: "The agent key must be used for downloading Instana installation artifacts from IBM repositories as well as for deploying agents to connect to the backend." This binding ensures entitlement enforcement and integrity of data transfer. The key, distributed through official IBM entitlement channels or purchase confirmation emails, validates the customer's licensed environment. During deployment, the same key is included in configuration files or environment variables so that each agent securely authenticates to its assigned backend instance. This unified mechanism simplifies lifecycle management while maintaining strong license controls. The key is never generated manually nor limited to licensing download alone—its dual purpose makes it critical in both provisioning and operations stages.

NEW QUESTION # 65

.....

In order to let customers enjoy the best service, all C1000-189 exam prep of our company were designed by hundreds of experienced experts. Our C1000-189 test questions will help customers learn the important knowledge about exam. At the same time, our C1000-189 test torrent can help you avoid falling into rote learning habits. You just need to spend 20 to 30 hours on study, and then you can take and pass your C1000-189 Exam. In addition, the authoritative production team of our C1000-189 exam prep will update the study system every day in order to make our customers enjoy the newest information.

C1000-189 Pdf Dumps: <https://www.passtestking.com/IBM/C1000-189-practice-exam-dumps.html>

Our service staff is 7/24 on duty, customers can contact us any time to communicate with us about our products--C1000-189 practice test questions, The IBM Instana Observability C1000-189 questions are compiled from the original questions and checked and edited by our experienced experts, And we can claim that if you study with our C1000-189 exam braindumps for 20 to 30 hours, you will pass the exam for sure, So it is worthy for you to buy our C1000-189 practice prep.

There is more than one way to teach even what we think of as C1000-189 fact-based subjects, A triumphant book Mandie's unique ability to motivate and inspire abounds within its pages.

Our service staff is 7/24 on duty, customers can contact us any time to communicate with us about our products--C1000-189 Practice Test questions, The IBM Instana Observability C1000-189 questions are compiled from the original questions and checked and edited by our experienced experts.

Verified IBM C1000-189 New Braindumps & The Best PassTestking - Leader in Certification Exam Materials

And we can claim that if you study with our C1000-189 exam braindumps for 20 to 30 hours, you will pass the exam for sure, So it is worthy for you to buy our C1000-189 practice prep.

Designed in VCE format, IBM C1000-189 Exam Training is the best alternative to your time and money to secure an enviable career in the world of IT as C1000-189 IBM Instana Observability v1.0.277 Administrator - Professional certified professional.
