Nutanix Certified Professional - Cloud Native v6.10 Sample Questions (Q74-Q79):

NEW QUESTION # 74

A development team is working on a new application that requires access to certain cluster resources. The team needs to ensure that they have limited permissions to avoid unauthorized changes in other environments. Among the tasks they will perform are the following:

Deploy new versions of the application to their specific namespace.

Scale deployments according to demand.

View logs and metrics of their applications to monitor performance.

When using the NKP GUI, what type of access should the team configure?

- A. NKP Role
- B. Kommander Role
- C. Cluster Admin
- D. Cluster Role

Answer: A

NEW QUESTION # 75

A Platform Engineer is deploying an NKP workload cluster using the `nkp create cluster vsphere` command. The cluster will be utilized by the company's code-green team and the engineer has already created a code-green NKP workspace on the NKP management cluster. After issuing the deploy command, the engineer monitored the build using the `nkp describe cluster` command and confirmed it completed successfully. However, a few hours later, after logging into the NKP UI, the engineer checked the code-green NKP workspace and saw that the NKP workload cluster was not there.

What is the likely reason the NKP workload cluster is not in the code-green NKP workspace?

- A. NKP vSphere clusters cannot be assigned NKP workspaces and instead are assigned the default NKP workspace. The cluster can be viewed from this workspace instead.
- B. The engineer did not supply the `--namespace code-green` parameter as part of the `nkp create cluster vsphere` command, therefore it was created in the default workspace and needs to be manually attached.
- C. The vSphere cluster cannot be displayed in the NKP UI unless its Kubernetes version is within 'N - 1' versions of the NKP management cluster's Kubernetes version.
- D. The vSphere service account credentials had expired prior to the engineer's attempt to view the cluster in the NKP UI. Once the credentials are refreshed, the vSphere cluster will reappear in the NKP workspace.

Answer: B

NEW QUESTION # 76

A Platform Engineer would like to deploy an NKP Platform Application to all the clusters within an NKP workspace from the command line. What is the command set to use, and what parameters must be specified with it?

- A. The `nkp create appdeployment` command set would be utilized. The application ID & version, as well as the NKP workspace of the clusters, must be provided.
- B. The `kubectl create appdeployment` command set would be utilized. The application ID, as well as the NKP workspace of the clusters, must be provided.
- C. The `nkp deploy platform-app` command set would be utilized. The application ID, as well as the NKP workspace of the clusters, must be provided.
- D. The `nkp deploy app` command set would be utilized. The application ID, as well as the NKP workspace of the clusters, must be provided.

Answer: A

NEW QUESTION # 77

Which steps are necessary to configure a custom role in Kommander for a specific user group?
(Select two)

- A. Define a ClusterRole resource
- **B. Configure identity provider group claims**
- **C. Create a Kommander role and bind it to a group**
- D. Patch the kube-proxy DaemonSet

Answer: B,C

NEW QUESTION # 78

A Platform Engineer is looking to backup and restore persistent volumes and other cluster resources. Which two NKP licenses include backup and restore functionality? (Choose two.)

- **A. NKP Pro**
- **B. NKP Ultimate**
- C. NKP Starter
- D. NKP Essential

Answer: A,B

NEW QUESTION # 79

.....
