

Palo Alto Networks NGFW-Engineer Latest Study Plan - Latest NGFW-Engineer Exam Materials

input of professionals in the industry and reveals how Palo Alto products are used in organizations across the world.

Next-Generation Firewall Engineer Exam Summary

| | |
|----------------------|--|
| Exam Name | Next-Generation Firewall Engineer |
| Exam Number | NGFW-Engineer |
| Exam Price | \$250 USD |
| Duration | 90 minutes |
| Number of Questions | 75 |
| Passing Score | 860/300 to 1000 |
| Recommended Training | (EDU-210) Firewall Essentials: Configuration and Management Panorama: NGFW Management |
| Exam Registration | PEARSON VUE |
| Sample Questions | Palo Alto NGFW-Engineer Sample Questions |
| Practice Exam | Palo Alto Networks Certified Next-Generation Firewall Engineer Practice Test |

Topics covered in the Palo Alto NGFW-Engineer Exam

| Section | Weight | Objectives |
|---------------------------------|--------|--|
| PAN-OS Networking Configuration | 38% | <ul style="list-style-type: none"> - Configure interface <ul style="list-style-type: none"> • Layer 2 • Layer 3 • Virtual wire • Tunnel interfaces • Aggregate Ethernet (AE) • Management - Configure zones - Configure high availability (HA) <ul style="list-style-type: none"> • Active/active • Active/passive • Link and path monitoring - Configure routing <ul style="list-style-type: none"> • Dynamic routing protocols • Redistribution and policies • Route monitoring • Advanced Routing Engine - Configure GlobalProtect |

The Palo Alto Networks NGFW-Engineer certification exam syllabus is changing with the passage of time. As a NGFW-Engineer exam candidate you have to be aware of these Palo Alto Networks NGFW-Engineer exam changes. To give you complete knowledge about the Palo Alto Networks NGFW-Engineer Exam Topics, the DumpStillValid has hired a team of experts that consistently work on these changes and add these changes in Palo Alto Networks NGFW-Engineer exam practice test questions.

Palo Alto Networks NGFW-Engineer Exam Syllabus Topics:

| Topic | Details |
|---------|---|
| Topic 1 | <ul style="list-style-type: none"> • Integration and Automation: This section measures the skills of Automation Engineers in deploying and managing Palo Alto Networks NGFWs across various environments. It includes the installation of PA-Series, VM-Series, CN-Series, and Cloud NGFWs. The use of APIs for automation, integration with third-party services like Kubernetes and Terraform, centralized management with Panorama templates and device groups, as well as building custom dashboards and reports in Application Command Center (ACC) are key topics. |

| | |
|---------|--|
| Topic 2 | <ul style="list-style-type: none"> • PAN-OS Networking Configuration: This section of the exam measures the skills of Network Engineers in configuring networking components within PAN-OS. It covers interface setup across Layer 2, Layer 3, virtual wire, tunnel interfaces, and aggregate Ethernet configurations. Additionally, it includes zone creation, high availability configurations (active and active • active and active • passive), routing protocols, and GlobalProtect setup for portals, gateways, authentication, and tunneling. The section also addresses IPSec, quantum-resistant cryptography, and GRE tunnels. |
| Topic 3 | <ul style="list-style-type: none"> • PAN-OS Device Setting Configuration: This section evaluates the expertise of System Administrators in configuring device settings on PAN-OS. It includes implementing authentication roles and profiles, and configuring virtual systems with interfaces, zones, routers, and inter-VSYS security. Logging mechanisms such as Strata Logging Service and log forwarding are covered alongside software updates and certificate management for PKI integration and decryption. The section also focuses on configuring Cloud Identity Engine User-ID features and web proxy settings. |

100% Pass High Hit-Rate Palo Alto Networks - NGFW-Engineer Latest Study Plan

Our NGFW-Engineer practice questions attract users from all over the world because they really have their own charm. No product like our NGFW-Engineer study guide will seriously consider the needs of users in all aspects. From product content to system settings, we will give you what you want! Firstly, you definitely want to pass the exam for sure. Our NGFW-Engineer Exam Questions are high-effective with a high pass rate as 98% to 100%. So don't hesitate, just come and buy our NGFW-Engineer learning braindumps!

Palo Alto Networks Next-Generation Firewall Engineer Sample Questions (Q112-Q117):

NEW QUESTION # 112

In a Collector Group with multiple Log Collectors, enabling redundancy ensures that:

- A. Logs are distributed based on a round-robin mechanism.
- **B. Each log has two copies, each residing on a different Log Collector.**
- C. Each log is stored only on the primary Log Collector.
- D. Logs are stored in a compressed format to save space.

Answer: B

NEW QUESTION # 113

When creating a Log Forwarding profile on a PAN-OS firewall to direct logs to various external and internal systems, which set of methods is available?

- A. Syslog, Panorama, SD-WAN
- **B. Panorama/Cloud logging, email, Syslog**
- C. HTTP, RADIUS, SNMP
- D. Email, Syslog, NetFlow

Answer: B

Explanation:

Log Forwarding profiles in PAN-OS support forwarding logs to Panorama or cloud logging services, sending notifications via email, and exporting logs to external systems using Syslog, which together form the supported log forwarding mechanisms for centralized management and integration.

NEW QUESTION # 114

In an active/active high availability (HA) configuration with two PA-Series firewalls, how do the firewalls use the HA3 interface?

- A. To forward packets to the HA peer during session setup and asymmetric traffic flow
- B. To exchange hellos, heartbeats, HA state information, and management plane synchronization for routing and User-ID information
- **C. To perform session cache synchronization among all HA peers having the same cluster ID**
- D. To synchronize sessions, forwarding tables, IPSec security associations, and ARP tables between firewalls in an HA pair

Answer: C

Explanation:

In an active/active HA configuration with two PA-Series firewalls, the HA3 interface is used primarily for the exchange of HA state information between the firewalls. This includes:

Hellos and heartbeats to monitor the status of the HA peer.

Synchronization of management plane data, which includes critical routing and User-ID information.

NEW QUESTION # 115

Which forwarding methods can be used on the Objects tab when configuring the Log Forwarding profile?

- A. SNMP, HTTP, RADIUS
- B. Panorama, ADEM, syslog
- C. Syslog, HTTP, NetFlow
- **D. Panorama, syslog, email**

Answer: D

Explanation:

When configuring the Log Forwarding profile on a Palo Alto Networks firewall, the forwarding methods available include:

Panorama: For forwarding logs to a Panorama management system.

Syslog: For forwarding logs to a syslog server.

Email: For sending logs via email.

NEW QUESTION # 116

Why is SSL/TLS decryption considered critical for effective NGFW security inspection in modern networks?

- A. It simplifies firewall rule design
- **B. It enables inspection of encrypted application traffic**
- C. It reduces network latency
- D. It eliminates the need for IPS

Answer: B

Explanation:

Most modern traffic is encrypted.

SSL/TLS decryption allows NGFWs to inspect traffic content and detect threats hidden within encrypted sessions.

NEW QUESTION # 117

.....

The DumpStillValid Palo Alto Networks NGFW-Engineer exam dumps are ready for quick download. Just choose the right DumpStillValid Palo Alto Networks NGFW-Engineer exam questions format and download it after paying an affordable DumpStillValid Palo Alto Networks Next-Generation Firewall Engineer (NGFW-Engineer) practice questions charge and start this journey. Best of luck in Palo Alto Networks NGFW-Engineer exam and career!!!
