### NEW QUESTION # 122

Green House Corporation has decided to enable the budgetary control feature for their projects. At which two levels will they be able to enter the amounts in the budget versions for these projects? (Choose two.)

- A. Expenditure Category
- B. Top resource
- **C. Task**
- **D. Project**
- E. Expenditure Type

**Answer: C,D**

Explanation:

Budgetary control is a feature that allows you to monitor and control project costs against approved budgets.

You can enter the amounts in the budget versions for these projects at two levels: Task and Project. These levels correspond to the budgetary control levels that are defined for the project type. You can also view and compare the budget amounts and actual costs at these levels using reports and dashboards. Expenditure Type, Top Resource, and Expenditure Category are not levels at which you can enter the amounts in the budget versions for these projects. These are attributes that can be used to group and filter the budget and actual amounts for reporting purposes. ### NEW QUESTION # 123

You are now the project manager of a newly created implementation project. Which two items are not part of managing an implementation project?

- A. Monitor the progress of completing setup tasks.
- B. Assign tasks to various users who are responsible for managing setup data.
- **C. Select the offering you want to implement.**
- D. Generate a list of setup tasks.
- **E. Enable optional functional areas and features by opting in.**

**Answer: C,E**

Explanation:

Selecting the offering you want to implement and enabling optional functional areas and features by opting in are not part of managing an implementation project. These are part of configuring an implementation project, which is done before managing an implementation project. Configuring an implementation project allows you to define the scope and features of your implementation based on your business needs. Managing an implementation project involves assigning tasks to various users who are responsible for managing setup data, monitoring the progress of completing setup tasks, and generating a list of setup tasks. These are part of executing an implementation project, which is done after configuring an implementation project. Executing an implementation project allows you to perform the setup tasks and validate the setup data for your implementation. Reference:
