### NEW QUESTION # 32

A customer has a requirement to allow the Operations team to edit Quote records in order to perform 'Create and Submit Order' action only when the corresponding opportunity has reached a specific status called 'Closed Won'. Sales users will remain as the record owners of Quotes and Orders for reporting purposes. The organization wide default setting for Quote and Order object is private.

How should a Consultant solve this requirement with minimal customization?

- A. Share order records programmatically using Apex whenever Opportunity status is 'Closed Won'.
- B. Sales users will use manual sharing in order to share order records once Opportunity status is 'Closed Won'.
- C. Configure a criteria-based sharing rule to share order records once Opportunity status is 'Closed Won'.
- D. Configure role hierarchy, such that the Operations team is higher than the Sales users in the same hierarchy group.

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Since the OWD for Quote and Order is private, sharing must be explicitly granted for the Operations team to edit records when Opportunity status is 'Closed Won'. Criteria-based sharing rules are the preferred low-maintenance Salesforce declarative approach for this scenario, sharing records based on field values without custom code. Manual sharing is less scalable, role hierarchy changes may affect ownership and reporting, and Apex sharing is a heavier customization.
