Pass Guaranteed 2026 Latest CCSFP: Valid Test Certified CSF Practitioner 2025 Exam Bootcamp

Our CCSFP practice braindumps not only apply to students, but also apply to office workers; not only apply to veterans in the workplace, but also apply to newly recruited newcomers. And our CCSFP study materials use a very simple and understandable language, to ensure that all people can learn and understand. Besides, our CCSFP Real Exam also allows you to avoid the boring of textbook reading, but let you master all the important knowledge in the process of doing exercises.

HITRUST Certified CSF Practitioner 2025 Exam Sample Questions (Q12-Q17):

NEW QUESTION # 12

Which version of the CSF supports a traversable requirement statement portfolio? [0107]

- A. v9.6.1
- B. v9.4
- C. v9.2
- **D. 0**

Answer: D

Explanation:

The HITRUST CSF v11 introduced a traversable requirement statement portfolio, allowing organizations and assessors to navigate requirements across versions more effectively. This capability ensures consistency, historical traceability, and clarity when mapping requirement statements between CSF iterations. Earlier versions (v9.2, v9.4, v9.6.1) did not support the full traversable portfolio

functionality.

Extract Reference (HITRUST CSF v11, CCSFP Study Guide):

Version 11 introduced structural updates including a traversable portfolio of requirement statements, enabling easier mapping and navigation across framework versions for consistent assessments.

NEW QUESTION # 13

A validated assessment is only available to organizations after performing a readiness assessment. [0020]

- A. True
- B. False

Answer: B

Explanation:

A validated assessment does not require a readiness assessment as a prerequisite.

A Readiness Assessment is optional and intended to help organizations self-identify gaps before a validated assessment.

A Validated Assessment involves an independent HITRUST Authorized External Assessor validating evidence and submitting results to HITRUST for quality assurance and potential certification.

Many organizations choose to do a readiness assessment first, but it is not mandatory.

Extract Reference (CCSFP Study Guide & HITRUST CSF Assurance Program [0020]):

Organizations may perform a readiness assessment prior to a validated assessment to identify gaps, but it is not required; validated assessments can be performed independently.

NEW QUESTION # 14

An e1, i1, or r2 validated assessment must be performed by an approved HITRUST assessor.

- A. False
- B. True

Answer: B

Explanation:

Validated assessments, whether e1, i1, or r2, must be conducted by HITRUST-approved External Assessors

. These assessors are accredited organizations trained and certified by HITRUST to apply the CSF methodology consistently. Their role is to independently validate the entity's control environment and testing results. Without an approved assessor, the validated assessment cannot be submitted to HITRUST QA or result in a validated report or certification. Readiness assessments differ, as they may be performed internally by the organization and do not require an external assessor. This requirement ensures independence, objectivity, and quality in the assurance process, protecting the reliability of HITRUST certifications.

NEW QUESTION # 15

Which AI models can be evaluated using the AI Security Assessment?

- A. Back Propagation
- B. Generative
- C. Predictive
- D. Rule-Based
- E. Hodgkin-Huxley

Answer: B,C,D

Explanation:

The AI Security Assessment module evaluates the security, governance, and risk management of artificial intelligence models.

HITRUST specifies coverage for widely used model types, including:

- * Predictive models, which forecast outcomes based on historical data (e.g., fraud detection, patient risk scoring).
- * Generative models, which create new data outputs (e.g., AI image or text generators).
- * Rule-based models, which use defined logic for decision-making.

The goal of the AI assessment is to ensure that these AI models are developed, implemented, and monitored securely, with appropriate safeguards around data integrity, bias management, and model explainability. Options like Hodgkin-Huxley (a neuroscience model) and Back Propagation (a training algorithm) are not types of AI models scoped by the AI assessment. Instead, the AI factor focuses on applied model categories used in operational environments. NEW QUESTION # 16

The Certified CSF Practitioner (CCSFP) designation is good for how many years?

- A. 1 year provided the CHQP has been completed
- B. 4 years
- C. 3 years provided annual refresher training has been completed
- **D. 2 years with no refresher training**

Answer: D

Explanation:

The Certified CSF Practitioner (CCSFP) designation, awarded through HITRUST Academy, is valid for two years from the date of certification. During this period, practitioners are recognized as trained professionals qualified to assist organizations in implementing, preparing for, and supporting HITRUST CSF assessments.

Unlike certifications in some other frameworks, CCSFP does not require annual refresher training for continued validity. After the two-year period, practitioners must renew their certification, typically by retaking the CCSFP course or completing updated training to ensure knowledge of the latest HITRUST CSF version and Assurance Program changes. The two-year cycle aligns with HITRUST's update cadence, ensuring practitioners remain current with evolving regulatory mappings, control requirements, and scoring methodology.
