There are so many advantages of our Ind-Dev-201 Actual Exam, and you are welcome to have a try!

## Salesforce Certified Industries CPQ Developer Sample Questions (Q280-Q285):

### NEW QUESTION # 280

A company creates a new product, as shown below.

Product A

- Selling Start Date: July 31, 2021
- Selling End Date: October 31, 2021
- Fulfillment Start Date: July 31, 2021
- End of Life Date: October 31, 2022

On November 22, 2021, which action can be taken on this product?

- A. Add to Cart
- B. Change
- C. Disconnect
- D. Move

**Answer: C**

Explanation:

For Product A with the given dates, by November 22, 2021, the product is past its Selling End Date but has not yet reached its End of Life Date. Therefore, the product cannot be added to a cart or modified since it's no longer available for new sales, but it can still undergo service-related actions. The appropriate action that can be taken is "Disconnect," as this action pertains to service or subscription-based changes, such as terminating or disconnecting a service that has been previously sold or activated, but is not yet at its end of life.

### NEW QUESTION # 281

In which sequence do rules execute to ensure a perfect order in the Cart?

- A. Context Rules Framework, Advanced Rules Framework.
- B. Eligibility Rules, Context Rules, Advanced Rules
- C. Context Rules Framework, Compatibility Rules Framework, Advanced Rules Framework.
- D. Advanced Rules Framework, Context Rules Framework, Compatibility Rules

**Answer: C**

Explanation:

To ensure a perfect order in the cart, rules should execute in a sequence that maintains logical dependencies and data integrity. The correct sequence is:

- \* Context Rules Framework: First, establish the context for the transaction based on customer data and product selection. This sets the stage for more detailed rule application.
  - \* Compatibility Rules Framework: Next, ensure that the selected products are compatible with each other. This prevents conflicts in the cart and helps in maintaining a coherent order structure.
  - \* Advanced Rules Framework: Finally, apply advanced rules that may include dynamic pricing adjustments, promotions, or complex business logic. This layer refines the order to meet specific business objectives and customer needs.
- This sequence ensures that each rule framework builds upon the data and decisions of the previous step, leading to a consistent and accurate order process in the cart.

### NEW QUESTION # 282

When would you use a percentage discount the price of a product in a promotion instead of changing the price with an override?

Note: This question displayed answer options in random order when taking this Test.

- A. When the cost of the product for the company may increase
- B. When the charge recurs monthly
- C. When the product can be returned
- D. When the charge is only for one time

**Answer: A**

Explanation:

A percentage discount is often used over a price override in promotions when the cost of the product for the company may increase. Using a percentage discount helps maintain profitability by adjusting the discount amount in proportion to changes in cost, whereas a

fixed override might not accommodate such fluctuations.

\* When the cost of the product for the company may increase (D): This strategy ensures that the promotion remains economically viable even if underlying costs rise, protecting margins while still offering a discount.

### NEW QUESTION # 283

The options for pricing bundles include: (Choose TWO)

Note: This question displayed answer options in random order when taking this Test.

- A. Assigning a price to the parent and zero prices to the children
- B. Assigning only pricing elements to the parent and children
- C. Assigning the parent a zero price
- D. Assigning only pricing variables to the parent and children

**Answer: A,C**

Explanation:

In Salesforce Industries CPQ, when pricing bundles, there are multiple strategies you can employ:

\* Assigning the parent product a zero price and managing pricing entirely through the child products.

This approach is often used when the value of the bundle is derived solely from its components.

\* Assigning a price to the parent product and setting the prices of the child products to zero. This strategy might be used when the parent product's price encompasses the total value of the bundle, and the child products are considered included or complimentary. These methods offer flexibility in how bundles are presented and priced, allowing businesses to tailor their pricing strategy to match their sales and marketing objectives.

### NEW QUESTION # 284

Where do product images appear in Vlocity Cart?

Note: This question displayed answer options in random order when taking this Test.

- A. In the Cart's Line Item pane
- B. Product images must be configured in Vlocity Cart.
- C. In the Product List
- D. In the Product Details modal window

**Answer: D**

Explanation:

In Vlocity Cart, product images appear in the Product Details modal window. This placement ensures that users have a clear and focused view of the product visuals when they seek more detailed information about a product, without cluttering the main interface.

\* Product Details modal window: This design choice enhances user engagement by providing a detailed look at the product when needed while maintaining an uncluttered primary interface, which improves overall usability and user experience during the shopping and configuration processes.

### NEW QUESTION # 285
