In today's technological world, more and more students are taking the FCSS—Advanced Analytics 6.7 Architect (FCSS_ADA_AR-6.7) exam online. While this can be a convenient way to take an FCSS—Advanced Analytics 6.7 Architect (FCSS_ADA_AR-6.7) exam dumps, it can also be stressful. Luckily, ExamCost's best FCSS—Advanced Analytics 6.7 Architect (FCSS_ADA_AR-6.7) exam questions can help you prepare for your FCSS—Advanced Analytics 6.7 Architect (FCSS_ADA_AR-6.7) certification exam and reduce your stress.

Fortinet FCSS_ADA_AR-6.7 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">FortiSIEM Rules and Analytics: This section evaluates the expertise of Security Analysts and Automation Engineers in configuring FortiSIEM rules and analytics. It includes constructing security rules based on event patterns, leveraging MITRE ATT&CK® frameworks, and configuring advanced nested queries and lookup tables for complex threat detection and correlation.

Topic 2	<ul style="list-style-type: none"> • Conditions and Remediation: This section measures the skills of Incident Responders and SOAR Specialists in remediating security incidents. It includes configuring manual and automated remediation workflows, integrating FortiSOAR with FortiSIEM for streamlined incident resolution, and deploying scripts to address threats while maintaining compliance
Topic 3	<ul style="list-style-type: none"> • Multi-Tenancy SOC Solution for MSSP: This section of the exam measures the skills of MSSP Architects and SOC Engineers in designing and deploying multi-tenant Security Operations Center (SOC) environments using FortiSIEM. It covers defining collectors and agents, deploying FortiSIEM in hybrid setups, managing resource allocation, and installing • managing Windows and Linux agents for scalable event monitoring in multi-tenant architectures.
Topic 4	<ul style="list-style-type: none"> • FortiSIEM Baseline and UEBA: This section tests the knowledge of Compliance Officers and Threat Analysts in implementing baseline profiles and User and Entity Behavior Analytics (UEBA). It covers creating baseline reports, configuring UEBA agents, and analyzing log-based behavioral patterns to detect anomalies and insider threats.

Latest Fortinet FCSS_ADA_AR-6.7 Braindumps Questions, FCSS_ADA_AR-6.7 Updated CBT

After you purchase our FCSS_ADA_AR-6.7 study materials, we will provide one-year free update for you. Within one year, we will send the latest version to your mailbox with no charge if we have a new version of FCSS_ADA_AR-6.7 learning materials. We will also provide some discount for your updating after a year if you are satisfied with our FCSS_ADA_AR-6.7 Exam Questions. And if you find that your version of the FCSS_ADA_AR-6.7 practice guide is over one year, you can enjoy 50% discount if you buy it again.

Fortinet FCSS—Advanced Analytics 6.7 Architect Sample Questions (Q21-Q26):

NEW QUESTION # 21

Which two statements about the maximum device limit on FortiSIEM are true? (Choose two.)

- **A. The device limit is defined for the whole system and is shared by every customer on a service provider edition.**
- B. The device limit is only applicable to enterprise edition.
- C. The device limit is defined per customer and every customer is assigned a fixed number of device limit by the service provider.
- **D. The device limit is based on the license type that was purchased from Fortinet.**

Answer: A,D

Explanation:

FortiSIEM enforces a device limit based on licensing and system-wide constraints to ensure proper resource allocation and performance management.

The device limit is determined by the purchased license.

FortiSIEM licensing includes limits on the number of devices that can be monitored.

The license type (e.g., Enterprise vs. Service Provider) defines the maximum number of devices supported.

For Service Provider editions, the device limit applies system-wide and is shared across all customers.

In an MSSP (Managed Security Service Provider) setup, the total device limit applies across all customers, rather than being allocated individually.

This allows flexible resource allocation based on customer needs.

NEW QUESTION # 22

Why do collectors communicate with the Supervisor after registration? (Choose two.)

- A. To report the health status of the agents
- **B. To report its own health status**
- C. To receive templates associated with agents
- **D. To upload event data if a worker down**

Answer: B,D

Explanation:

After registration, collectors maintain continuous communication with the Supervisor to ensure proper event processing, system health monitoring, and failover handling. The two key reasons collectors communicate with the Supervisor are:

1. To upload event data if a worker is down

If a worker node fails, the collector can temporarily store event logs and then forward them to the Supervisor.* This ensures event continuity even during infrastructure issues.

2. To report its own health status

The collector sends health reports to the Supervisor, including resource usage, connectivity status, and operational logs.* This helps FortiSIEM track collector uptime and performance.

NEW QUESTION # 23

What are the benefits of configuring UEBA on FortiSIEM?

- A. Enhanced encryption algorithms for data at rest?
- **B. Improved detection of insider threats?**
- **C. Ability to spot unusual behavior patterns of users and entities?**
- D. Automated response to all network events?

Answer: B,C

NEW QUESTION # 24

Refer to the exhibit.

```
[BEGIN GLOBAL]
APP_SERVER_HOST=super.example.com
APP_SERVER_PORT=443

cust_id= 2000
agent_id=10000
reader_id=99
num event sequence id=50000
[BEGIN pheventPackager]
parser_server_upload_host= worker1.example.com,worker2.example.com
svn_server_upload_host= worker1.example.com,worker2.example.com
```

What is the collector ID?

- **A. 0**
- B. 1
- C. 2
- D. 3

Answer: A

NEW QUESTION # 25

Which of the following are valid remediation actions in FortiSIEM?

- **A. Isolating a compromised machine from the network?**
- B. Increasing the storage capacity of the server?
- C. Sending an email notification to network users?
- **D. Running a pre-defined script to address an issue?**

Answer: A,D
