

# IDP Downloadable PDF 100% Pass | High-quality CrowdStrike Certified Identity Specialist(CCIS) Exam Exam Duration Pass for sure

DOWNLOAD the newest ExamDiscuss IDP PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=15smA\\_Wb-WJNEZnASawX6kLQNMZvTn\\_To](https://drive.google.com/open?id=15smA_Wb-WJNEZnASawX6kLQNMZvTn_To)

IDP exam practice is well known for its quality service! Our users are all over the world, and we use uniform service standards everywhere. Our after-sales service staff will be on-line service 24 hours a day, 7 days a week. So, whether you are purchasing IDP Training Materials, or during the study period, no matter what kind of problems you encounter on the IDP study guide, you can always contact online customer service to get the timely help.

You can even print the study material and save it in your smart devices to study anywhere and pass the CrowdStrike Certified Identity Specialist(CCIS) Exam (IDP) certification exam. The second format, by ExamDiscuss, is a web-based CrowdStrike Certified Identity Specialist(CCIS) Exam (IDP) practice exam that can be accessed online through browsers like Firefox, Google Chrome, Safari, and Microsoft Edge. You don't need to download or install any excessive plugins or Software to use the web-based software.

## IDP Exam Duration, Reliable IDP Dumps Sheet

In order to help you save more time, we will transfer IDP test guide to you within 10 minutes online after your payment and guarantee that you can study these materials as soon as possible to avoid time waste. We believe that time is the most valuable things in the world. This is why we are dedicated to improve your study efficiency and production. Moreover if you have a taste ahead of schedule, you can consider whether our IDP Exam Torrent is suitable to you or not, thus making the best choice. What's more, if you become our regular customers, you can enjoy more membership discount and preferential services.

## CrowdStrike IDP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Domain Security Assessment: Focuses on domain risk scores, trends, matrices, severity</li><li>• likelihood</li><li>• consequence factors, risk prioritization, score reduction, and configuring security goals and scopes.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>GraphQL API: Covers Identity API documentation, creating API keys, permission levels, pivoting from Threat Hunter to GraphQL, and building queries.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Configuration and Connectors: Addresses domain controller monitoring, subnet management, risk settings, MFA and IDaaS connectors, authentication traffic inspection, and country-based lists.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Risk Assessment: Covers entity risk categorization, risk and event analysis dashboards, filtering, user risk reduction, custom insights versus reports, and export scheduling.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Threat Hunting and Investigation: Focuses on identity-based detections and incidents, investigation pivots, incident trees, detection evolution, filtering, managing exclusions and exceptions, and risk types.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Zero Trust Architecture: Covers NIST SP 800-207 framework, Zero Trust principles, Falcon's implementation, differences from traditional security models, use cases, and Zero Trust Assessment score calculation.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>User Assessment: Examines user attributes, differences between users</li> <li>endpoints</li> <li>entities, risk baselining, risky account types, elevated privileges, watchlists, and honeytoken accounts.</li> </ul>

## CrowdStrike Certified Identity Specialist(CCIS) Exam Sample Questions (Q39-Q44):

### NEW QUESTION # 39

How many days will an identity-based incident be suppressed if new events related to the same incident occur?

- A. 7 days
- B. 14 days
- C. 5 days
- D. 30 days

**Answer: C**

Explanation:

Falcon Identity Protection uses incident suppression windows to prevent alert fatigue while still maintaining accurate incident tracking. According to the CCIS documentation, when new events related to an existing identity-based incident occur, the incident is suppressed for 5 days.

This suppression means that Falcon does not generate a new incident for the same activity during this window. Instead, additional detections are added to the existing incident, allowing analysts to view the full progression of the threat in a single investigative context.

The 5-day suppression window ensures that ongoing identity attacks—such as repeated authentication abuse or lateral movement—are consolidated rather than fragmented across multiple incidents. This improves investigation efficiency and aligns with Falcon's incident lifecycle management approach.

Because the suppression period is fixed at 5 days, Option D is the correct and verified answer.

### NEW QUESTION # 40

Falcon Identity Protection can continuously assess identity events and associate them with potential threats WITHOUT which of the following?

- A. API-based connectors
- B. The need for string-based queries
- C. Ingesting logs
- D. Machine-learning-powered detection rules

**Answer: B**

Explanation:

Falcon Identity Protection is architected as a log-free identity security platform, a core tenet emphasized throughout the CCIS curriculum. Unlike traditional SIEM- or log-based solutions, Falcon Identity Protection does not require string-based queries to continuously assess identity events or associate them with threats.

Instead, the platform relies on machine-learning-powered detection rules, real-time authentication traffic inspection, and API-based connectors to collect and analyze identity telemetry directly from domain controllers and identity providers. This approach eliminates the operational complexity of building, tuning, and maintaining query logic.

String-based queries are commonly associated with legacy log aggregation tools and SIEM platforms, where analysts must manually search logs to identify suspicious behavior. Falcon Identity Protection replaces this model with behavioral baselining and automated correlation, enabling continuous identity risk assessment without human-driven query execution.

Because Falcon does not require string-based queries to operate, Option D is the correct and verified answer.

### NEW QUESTION # 41

Which of the following are NOT included within the three-dot menu on Identity-based Detections?

Severity	Time	Detection name	Assigned to	Status	User	User domain	Source endpoint	Policy rule name
High	18:06:51	Golden Ticket attack	Unassigned	New	demo	ACME.LOC...	se-yin-winL...	Ticket anomalous validL...
High	18:01:41	Suspicious domain replication	Unassigned	New		...	se-yin-winL...	Domain controlL... BPC si... Dom...
High	16:01:21	Policy rule match (access)	Unassigned	New	Administrat...	SUNNY.COM	--	Block RDP with Service ...
High	16:51:51	Policy rule match (access)	Unassigned	New	Administrat...	GNA.COM	--	Block RDP with Service ...
Low	20:17:31	Policy rule match (access)	Unassigned	New	demo	ACME.LOC...	--	TEP - RDP AUDIT
High	20:00:11	Policy rule match (access)	Unassigned	New	demo	YSU.COM	se-gbo-rdp	Block RDP with Service ...
High	19:57:41	Policy rule match (access)	Unassigned	New	demo	YSU.COM	se-gbo-rdp	Block RDP with Service ...

Which of the following are not included within the three-dot menu on Identity-based Detections?

- A. Add comment
- B. Edit status
- C. Add exclusion
- D. Add to Watchlist

**Answer: D**

**Explanation:**

In Falcon Identity Protection, the three-dot (#) action menu on an identity-based detection provides analysts with a limited set of actions that apply directly to the detection itself. According to the CCIS curriculum, these actions are designed to support investigation workflow, tuning, and documentation.

The supported actions in the detection-level three-dot menu include:

- \* Edit status, which allows analysts to update the detection state (for example, New, In Progress, or Closed).
- \* Add comment, which enables collaboration and documentation directly on the detection.
- \* Add exclusion, where supported, to suppress future detections that match known benign behavior.

Add to Watchlist is not included in this menu because watchlists are applied to entities (such as users, service accounts, or endpoints), not to detections. Watchlists are managed from entity views or investigation workflows and are used to increase visibility and monitoring priority for specific identities—not to act on individual detections.

This distinction is emphasized in CCIS training to reinforce the separation between entity-centric actions and detection-centric actions. Because watchlists operate at the entity level, Option B is the correct and verified answer.

#### NEW QUESTION # 42

How does CrowdStrike Falcon Identity Protection help customers identify different types of accounts in their domain?

- **A. Analyzes authentication traffic and automatically classifies programmatic and human accounts**
- B. Assigns a human authorizer to each programmatic account for approval
- C. Implements advanced encryption algorithms for account metadata
- D. Conducts regular vulnerability assessments on programmatic accounts

**Answer: A**

Explanation:

Falcon Identity Protection automatically differentiates human and programmatic accounts by analyzing authentication traffic patterns. According to the CCIS curriculum, the platform uses behavioral analytics to observe how accounts authenticate, including frequency, protocol usage, timing, and access patterns.

Human users typically authenticate interactively and exhibit variable behavior, while programmatic or service accounts authenticate predictably and non-interactively. Falcon leverages these differences to automatically classify account types without requiring manual tagging or administrative input.

This classification is critical for accurate risk scoring, privilege analysis, and detection logic. Programmatic accounts often carry elevated privileges and long-lived credentials, making them attractive targets for attackers. Automatically identifying them allows Falcon to apply appropriate risk models and detections.

Because Falcon uses authentication traffic analysis to classify account types, Option C is the correct and verified answer.

#### NEW QUESTION # 43

Which of the following statements is NOT true as it relates to Identity Events, Detections, and Incidents?

- A. Not all events are security events that become elements of detections
- **B. Events related to an incident that occur after the incident is marked In Progress will create a new incident**
- C. A detection can become an element of an incident that preceded it in time
- D. An event can become an element of a detection that preceded it in time

**Answer: B**

Explanation:

Falcon Identity Protection follows a correlation and enrichment model where events, detections, and incidents are dynamically linked over time. According to the CCIS curriculum, events that occur after an incident is marked In Progress do not automatically create a new incident. Instead, related events and detections are typically added to the existing incident, provided they fall within the incident's correlation and suppression window.

This behavior allows Falcon to present a single evolving incident, showing the full progression of an identity attack rather than fragmenting activity into multiple incidents. Therefore, statement A is not true.

The other statements are correct:

- \* Detections can be retroactively associated with incidents that occurred earlier if correlation logic determines relevance.
- \* Events can be linked to detections even if the detection is created after the event occurred.
- \* Not all events are security-relevant; many remain informational and never become detections.

This adaptive correlation model is a core concept in CCIS training and supports efficient investigation and incident lifecycle management. Hence, Option A is the correct answer.

#### NEW QUESTION # 44

.....

As long as you get to know our IDP exam questions, you will figure out that we have set an easier operation system for our candidates. Once you have a try, you can feel that the natural and seamless user interfaces of our IDP study materials have grown to be more fluent and we have revised and updated IDP Study Materials according to the latest development situation. In the guidance of teaching syllabus as well as theory and practice, our IDP training guide has achieved high-quality exam materials according to the tendency in the industry.
