Free MB-700 pdf torrent & Microsoft MB-700 exam answers & MB-700 vce dumps

According to the needs of all people, the experts and professors in our company designed three different versions of the MB-700 certification training materials for all customers. The three versions are very flexible for all customers to operate. According to your actual need, you can choose the version for yourself which is most suitable for you to preparing for the coming exam. All the MB-700 Training Materials of our company can be found in the three versions. It is very flexible for you to use the three versions of the MB-700 latest questions to preparing for your coming exam.

Microsoft Dynamics 365: Finance and Operations Apps Solution Architect Sample Questions (Q283-Q288):

NEW QUESTION # 283

An organization is implementing Dynamics 365 Finance.

You need to assign security roles.

Which tools should you use? To answer, drag the appropriate tools to the correct tasks. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools	Answer Area	Tasks	Tools
Security Diagnostic Tool		Approve ledger transactions	Tool
Security Configuration Tool		Enable collections process	Tool
Security Upgrade Advisor Tool		Enable fixed assets process	Tool

Answer:

Explanation:

Tools	Answer Area	Tasks	Tools
Security Diagnostic Tool		Approve ledger transactions	Security Diagnostic Tool
Security Configuration Tool		Enable collections process	Security Configuration Tool
Security Upgrade Advisor Tool		Enable fixed assets process	Security Configuration Tool

Explanation

Tasks	Tools
Approve ledger transactions	Security Diagnostic Tool
Enable collections process	Security Configuration Tool
Enable fixed assets process	Security Configuration Tool

NEW QUESTION # 284

A company is upgrading their AX 2012 R3 environment to Dynamics 365 Finance. The company plans to upgrade the data store by using a phased approach. You need to define the strategy to migrate master data and opening balances. Which tool should you recommend?

- A. Data upgrade tool
- B. Usage profiler
- C. Microsoft Dynamics AX Intelligent Data Management Framework
- **D. Business process modeler**

Answer: D

Explanation:

Lifecycle Services is a tool set that Microsoft Services provides that will be essential to your upgrade and to your life after the upgrade. As you are going through the business process analysis, I'd encourage you to check out Lifecycle Services and look at what they have provided in their business process modeler. Lifecycle Services is a nice tool set for you to organize your business processes.

Note: Prepare model metadata

During data upgrade, one goal is to maintain element IDs between the existing AX 2012 environment and the upgraded finance and operations environment. To accomplish this goal, you must bring a copy of the element IDs from the AX 2012 environment into the finance and operations environment. AX 2012 stores element IDs in a table that is named ModelElement. This table is in the model database, which is a separate database from the AX 2012 business data database. During an upgrade to finance and operations, you must copy the AX 2012 database to Microsoft Azure. This process can be time consuming.

To avoid copying the whole model database to Azure SQL Database, use the following procedure to replicate the ModelElement table in the business data database. Later, during data upgrade runs, the database synchronization process will retrieve the required information from this replicated table and make sure that element IDs are maintained in the upgraded finance and operations environment.

In the finance and operations data upgrade checklist, click Prepare model metadata.

When you're prompted, click Yes.

Wait for the copy process to be completed.

If the process is successful, the task is marked as completed.

NEW QUESTION # 285

A company uses Dynamics 365 Supply Chain Management.

A user reports an error on a transaction in the production environment that occurred 30 days ago.

You need to move the current data from the production environment to the sandbox environment to troubleshoot the transaction error. You must back up the sandbox environment before you copy data to the production environment.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Action				
Back up the current sandbox environment data.	<table border="1"><tr><td>Export database</td></tr><tr><td>Import database</td></tr><tr><td>Point-in-time restore</td></tr><tr><td>Refresh database</td></tr></table>	Export database	Import database	Point-in-time restore	Refresh database
Export database					
Import database					
Point-in-time restore					
Refresh database					
Move data from the production environment to the sandbox environment.	<table border="1"><tr><td>Point-in-time restore</td></tr><tr><td>Refresh database</td></tr><tr><td>Rollback</td></tr></table>	Point-in-time restore	Refresh database	Rollback	
Point-in-time restore					
Refresh database					
Rollback					

Answer:

Explanation:

Requirement	Action				
Back up the current sandbox environment data.	<table border="1"><tr><td>Export database</td></tr><tr><td>Import database</td></tr><tr><td>Point-in-time restore</td></tr><tr><td>Refresh database</td></tr></table>	Export database	Import database	Point-in-time restore	Refresh database
Export database					
Import database					
Point-in-time restore					
Refresh database					
Move data from the production environment to the sandbox environment.	<table border="1"><tr><td>Point-in-time restore</td></tr><tr><td>Refresh database</td></tr><tr><td>Rollback</td></tr></table>	Point-in-time restore	Refresh database	Rollback	
Point-in-time restore					
Refresh database					
Rollback					

Explanation:

Box 1: Export database

Export a database

Dynamics Lifecycle Services (LCS) to export a database from a sandbox user acceptance testing (UAT) environment to the Asset library.

After the export operation completes successfully, sign out of the servicing operation on your Environment details page. You can then see the asset in your Asset Library in the Database backups section.

Asset library

The screenshot shows the 'Asset Library' interface. On the left, there is a sidebar with 'Select asset type' and a list of categories: BPM artifact (2), Cortana intelligence application (0), Data package (0), Database backup (1), Downloadable VHD (0), Dynamics 365 for Retail SDK (0), GER Configuration (1), and Localized financial report (0). The 'Database backup (1)' category is selected. The main area displays a table of 'Database backup files'. The table has columns for Name, Valid, Version, Scope, Status, Release candidate, Modified date, and Size. One entry is visible: 'E2TestUATbackup' with a status of 'Draft', a modified date of '11/30/2018', and a size of '722 MB'. The Microsoft logo is visible in the bottom right corner of the screenshot.

The .bacpac files are stored here and can be manually downloaded to your Tier 1 developer environments for import.

Box 2: Refresh database

Refresh database

You can use Microsoft Dynamics Lifecycle Services (LCS) to perform a refresh of the database to a sandbox user acceptance testing (UAT) environment. A database refresh lets you copy the transactional and financial reporting databases of your production environment into the target, sandbox UAT environment. If you have another sandbox environment, you can also copy the databases from that environment to your target, sandbox UAT environment.

NEW QUESTION # 286

DRAG DROP

You are planning a Dynamics 365 implementation.

You need to recommend a solution for the different types of environment instances.

What should you recommend? To answer, drag the appropriate instance types to the correct scenarios. Each instance type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Instance types

Tier 1
Tier 2
Production

Answer Area

Scenario

Single-box instance that the customer can use as an automated build environment.

Multi-box instance that customers can use for user acceptable testing.

Environment that uses Microsoft SQL server.

Instance type

Instance type
Instance type
Instance type

Answer:

Explanation:

The screenshot shows the 'Answer Area' with the 'Instance types' and 'Instance type' panes. The 'Instance types' pane contains 'Tier 1', 'Tier 2', and 'Production'. The 'Instance type' pane contains three empty boxes. The 'Scenario' pane contains the same three scenarios as in the previous screenshot. The Microsoft logo is visible in the bottom left corner of the screenshot.

Section: Define solution testing and management strategies

Explanation/Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/fin-ops/imp-lifecycle/environment-planning>

NEW QUESTION # 287

A professional services company plans to implement Dynamics 365 Finance.
 You need to recommend a licensing strategy for the following users:

User	Comments
User1	User1 is an accounting manager who reviews invoices and payments. User1 is also the cost accounting manager for the company.
User2	User2 manages accounts payable and accounts receivable.

What should you recommend? To answer, drag the appropriate licenses to the correct users. Each license may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

The screenshot shows a licensing interface with a 'Licenses' pane on the left containing four options: 'Base only', 'Attach only', 'Team member only', and 'Base and Attach'. To the right is an 'Answer Area' with a table for assigning licenses to users:

User	License
User1	
User2	

Answer:

Explanation:

This screenshot shows the 'Licenses' pane with 'Base only' and 'Team member only' highlighted with green dashed boxes. In the 'Answer Area', 'Base and Attach' is assigned to User2.

Explanation:

This screenshot shows the 'Answer Area' where 'Base only' is assigned to User1 and 'Base and Attach' is assigned to User2.

Box 1: Base only

Box 2: Base and Attach

Base licenses and cost savings opportunities for "attach" licenses

Microsoft provides a cost-effective way for a single Dynamics 365 user to obtain full user licensing for multiple products. Licenses for products that provide core business functionality qualify as base licenses. (See the table below.) Each has one or more additional applications that are frequently used by people in the same roles and that qualify as attach licenses for that user. (These are sometimes referred to as subsequent qualifying applications.) To take advantage of the special attach license pricing:

1. Buy the first base user license at standard pricing.
2. Review which attach licenses are available for that base. (See the qualifying products for each base license below.)
3. Buy attach licenses for the same user at an attach license price. You may buy as many attach licenses as are available for that base license.

Every full user must have a base license, though the base licenses don't need to be for the same product. (For instance, an attach license for Customer Service Professional is available both for a user with a Finance base and another with a Commerce base.) Base applications and their qualifying products for attach licensing

Dynamics 365 base licenses per user	Dynamics 365 attach licenses per user ¹										
	Commerce	CS Ent	CS Pro	Field Svc	Finance	HR	Proj Oper.	RA	Sales Ent	Sales Pro	SCM
