Salesforce Health Cloud Accredited Professional Health-Cloud-Accredited-Professional Prüfungsfragen mit Lösungen (Q75-Q80):

75. Frage

Which three are steps required to configure Health Cloud? (Choose three.)

- A. Enable the option for contacts to relate to multiple accounts.
- B. Install the Health Cloud Managed Package.
- C. Configure the console view.
- D. Install Health Cloud Unmanaged Packages.
- E. Verify that Chatter Is enabled.

Antwort: A,C,E

76. Frage

The Salesforce administrator for ABC Policies Inc, a Health Care Payer Organization, would like to enable the members to enroll in and out of Care Program multiple times. Where, within Health Cloud Settings, should a Health Cloud administrator make changes to accomplish this requirement?

- A. Care Program Settings
- B. Health Cloud Settings
- C. Care Request Settings
- D. Program Enrollee Settings

Antwort: D

Begründung:

Reference and details below.

The screenshot shows the Salesforce Health Cloud Setup page for 'Care Program'. The left sidebar lists various settings, with 'Program Enrollee Settings' highlighted. The main content area shows the 'Allow Multiple Enrollees' toggle switch, which is currently turned on. A yellow highlight is placed over the text 'Multiple Enrollments in the Same Care Program' and the explanatory text below it: 'Let users enroll patients multiple times in the same care program. Once you enable this setting, you can't disable it.'

77. Frage

Which two fields are required when creating a new care plan task?

- A. Status
- B. owner
- C. Due Date
- D. Goal
- E. problem

Antwort: A,B

Begründung:

Owner (A) and Status are two fields that are required when creating a new care plan task. Problem (B), Goal (D), and Due Date (E) are optional fields when creating a new care plan task.

78. Frage

Which three business process are supported by Salesforce HC utilization Management? (Choose 3)

- A. Drug Request
- B. Admissions
- C. Appeals
- D. Physician Request
- E. Ticketing

Antwort: A,B,C

Begründung:

Explanation

Reference and details below.

Support and Manage Care Requests

salesforce

Give your users the tools to collaborate seamlessly on submitting, assigning, and processing care requests. Utilization management makes it easier for payer organizations to gather member and clinical data from providers, streamline care request reviews, and evaluate reviews for medical necessity. Health care providers can quickly submit care requests with fewer phone calls and faxes for preauthorizations.

Health Cloud provides standard objects to support these business processes:

- Prescription drug preauthorization requests
- Service preauthorization requests
- Admissions
- Concurrent (continued stay) reviews
- Appeals
- Complaints and grievances

79. Frage

A healthcare organization is launching a new gene therapy program, and an administrator needs to leverage Advanced Therapy Management. In which two ways does Advanced Therapy Management assist the healthcare organization with its complex scheduling requirements?

Choose 2 answers

- A. Reschedule part of the appointment chain.
- B. Book multi-step appointments.
- C. Optimize appointment chain with Einstein.
- D. Schedule a telehealth appointment.

Antwort: A,B

Begründung:

Advanced Therapy Management (ATM) in Salesforce Health Cloud is specifically designed to support complex workflows and scheduling requirements, particularly for therapies involving multiple interdependent appointments. For a gene therapy program, ATM provides these features:

Key Scheduling Capabilities of ATM:

Reschedule Part of the Appointment Chain (Option A):

In complex workflows where multiple steps are involved (e.g., collection, processing, infusion), ATM allows administrators to reschedule individual appointments within the chain without disrupting the entire workflow.

This flexibility is crucial for accommodating unexpected delays or changes in the therapy process.

Book Multi-Step Appointments (Option B):

ATM supports the scheduling of interdependent, multi-step appointments that are a common feature of advanced therapies such as gene therapy.

For example, steps like apheresis, manufacturing, and infusion can be scheduled in sequence, ensuring coordination across various

stakeholders.

Other Options:

Optimize Appointment Chain with Einstein (Option C):

While optimization using Einstein is a broader Salesforce capability, it is not directly tied to Advanced Therapy Management's out-of-the-box scheduling features.

Schedule a Telehealth Appointment (Option D):

Telehealth appointments are not the focus of ATM, which is designed for in-person and complex therapy workflows.
