## 2026 Realistic Amazon AWS-Developer Exam Pass Guaranteed Quiz

Practicing for an AWS Certified Developer Associate Exam (DVA-C02) (AWS-Developer) exam is one of the best ways to ensure success. It helps students become familiar with the format of the actual AWS-Developer practice test. It also helps to identify areas where more focus and attention are needed. Furthermore, it can help reduce the anxiety and stress associated with taking an AWS Certified Developer Associate Exam (DVA-C02) (AWS-Developer) exam as it allows students to gain confidence in their knowledge and skills.

## Amazon AWS Certified Developer Associate Exam (DVA-C02) Sample Questions (Q211-Q216):

### NEW QUESTION # 211

A Developer is migrating an on-premises application to AWS. The application currently takes user uploads and saves them to a local directory on the server. All uploads must be saved and made immediately available to all instances in an Auto scaling group. Which approach will meet these requirements?

- A. Use Amazon EBS and configure the application AMI to use a snapshot of the same EBS instance on boot.
- B. Use Amazon EBS and file synchronization software to achieve eventual consistency among the auto scaling group.
- **C. Use Amazon S3 and rearchitect the application so all uploads are placed in S3.**
- D. Use instance storage and share it between instances launched from the same Amazon machine image (AMI).

**Answer: C**

### NEW QUESTION # 212

A company uses Amazon DynamoDB for managing and tracking orders. The DynamoDB table is partitioned based on the order date. The company receives a huge increase in orders during a sales event, causing DynamoDB writes to throttle, and the consumed throughput is far below the provisioned throughput.

According to AWS best practices, how can this issue be resolved with MINIMAL costs?

- A. Increase the read and write capacity units of the DynamoDB table.
- B. Add a random number suffix to the partition key values.
- C. Add a global secondary index to the DynamoDB table.
- D. Create a new DynamoDB table for every order date.

**Answer: A**

### NEW QUESTION # 213

A corporate web application is deployed within an Amazon VPC, and is connected to the corporate data center via IPSec VPN. The application must authenticate against the on-premise LDAP server. Once authenticated, logged-in users can only access an S3 keyspace specific to the user.

Which two approaches can satisfy the objectives? Choose 2 answers

- A. The application authenticates against LDAP, and retrieves the name of an IAM role associated with the user. The application then calls the IAM Security Token Service to assume that IAM Role. The application can use the temporary credentials to access the appropriate S3 bucket.
- B. The application authenticates against IAM Security Token Service using the LDAP credentials. The application uses those temporary AWS security credentials to access the appropriate S3 bucket.
- C. Develop an identity broker which authenticates against IAM Security Token Service to assume an IAM Role to get temporary AWS security credentials. The application calls the identity broker to get AWS temporary security credentials with access to the appropriate S3 bucket.
- D. The application authenticates against LDAP. The application then calls the IAM Security Service to login to IAM using the LDAP credentials. The application can use the IAM temporary credentials to access the appropriate S3 bucket.
- E. Develop an identity broker which authenticates against LDAP, and then calls IAM Security Token Service to get IAM federated user credentials. The application calls the identity broker to get IAM federated user credentials with access to the appropriate S3 bucket.

**Answer: A,E**

### NEW QUESTION # 214

You are working with a customer who is using Chef configuration management in their data center. Which service is designed to let the customer leverage existing Chef recipes in AWS?

- A. AWS CloudFormation
- B. AWS Elastic Beanstalk
- C. Amazon Simple Workflow Service
- D. AWS OpsWorks

**Answer: D**

### NEW QUESTION # 215

Regarding Amazon SNS, to send messages to a queue through a topic, you must subscribe the queue to the Amazon SNS topic. You specify the queue by its \_\_\_\_\_.

- A. Token

- B. Registration ID
- C. URL
- **D. ARN**

**Answer: D**

Explanation:

In Amazon SNS, to send messages to a queue through a topic, you must subscribe the queue to the Amazon SNS topic. You specify the queue by its ARN.
