## Salesforce Certified Slack Administrator Sample Questions (Q155-Q160):

### NEW QUESTION # 155

You're a Workspace Owner, responsible for setting up your company's Slack Business+ workspace for the first time.

You want admins to have visibility into request approvals (for invites, apps, Slack Connect, etc.).

What is the best way to set up an approval process within Slack that will require the least effort?

- A. Use Workflow Builder to create multiple workflows that allow users to request the necessary approvals from a #help-slack channel.
- B. Post and pin a message with a request template in the #general channel that asks users to submit their requests in the #general channel.
- C. Set up a #admins-approval channel, and change the settings for each request type to route approvals to the channel where Workspace Admins can approve.
- **D. Do nothing, as Slack's default settings automatically route approval requests to Workspace Admins through a Slackbot direct message (DM).**

**Answer: D**

Explanation:

By default, Slack automatically routes requests (for apps, Slack Connect, invitations) to Workspace Admins via Slackbot:

"Approval requests are automatically sent to Workspace Admins and Owners via direct message from Slackbot for easy tracking and approval." No additional setup (A, C, D) is necessary unless a custom process is required.

(Reference: Slack Administration Study Guide - Managing Approval Requests)

### NEW QUESTION # 156

During a re-org within your organization, the IT department is renamed to Business Technology (BT). Many channels will need to change their prefixes from #it- to #bt-.

The original channel creators are no longer at the organization.

What is the most efficient strategy to ensure the channel prefixes are updated?

- A. Join all public IT channels and request access to private channels in order to update the channel settings.
- **B. Write a script using the channels API to rename all channels with "#it-" to "#bt-" in bulk.**
- C. Promote members leading the IT to BT department name change initiative to the Channel Manager role in the key channels.
- D. Use your preference menu to create an automatic keyword notification for IT and BT.

**Answer: B**

Explanation:

Slack API best practices specify:

"The channels.rename method within the Slack API allows admins to programmatically rename channels, making bulk updates efficient and standardized." Manually managing through Channel Manager roles (B) or joining channels (D) is slow and error-prone. Keyword notifications (A) don't rename channels.

(Reference: Slack Administration Study Guide - Managing Channels and Using APIs)

### NEW QUESTION # 157

You're a Workspace Admin on the Slack Pro plan. Your compliance team asks you to prevent users from creating free workspaces with their organization email addresses.

What should you recommend?

- A. Upgrade to the Slack Enterprise Grid plan, and enable domain claiming.
- B. Ask your Org Owner to enable two-factor authentication (2FA).
- C. Upgrade to the Slack Business+ plan, and enable Enterprise Key Management (EKM).
- D. Stay on the Slack Pro plan, and enable domain claiming.

**Answer: A**

#### NEW QUESTION # 158

You're an Org Owner at a company that doesn't allow members to manage anySlack Connect permissions. A member reaches out to you with a concern they sent a Slack Connect channel invitation to the wrong external company.

Unfortunately, the company the invitation was sent to has custom approval settings at your organization, so the invitation was approved automatically. Your member is not sure whether members from the company they accidentally invited will gain access to sensitive information if they accept the channel invitation and needs your advice on how to proceed.

What should you tell the requestor?

(Select the best answer.)

- A. All channel history will be visible when the external organization accepts the invitation. You can also offer to show them how to revoke the channel invitation if it has not been accepted yet.
- B. Channel history will not be visible when the external organization accepts the invitation. You can also offer to revoke the channel invitation if it has not been accepted yet.
- C. All channel history will be visible when the external organization accepts the invitation. You can also offer to revoke the channel invitation if it has not been accepted yet.
- D. The requestor can choose how much channel history will be visible when the external  
\* organization accepts the invitation. You can also offer to show them how to revoke the channel invitation if it has not been accepted yet.

**Answer: A**

#### NEW QUESTION # 159

A few months ago, a team of developers at Blue Inc identified a new issue during testing and created a public channel called #bug-cricket to communicate about the issue.

They may need to reference the history in the future. Of note, there has not been any new activity in #bug- cricket for months, and the bug case has been closed.

What should the team do with #bug-cricket?

- A. Remove all members from the channel, and then archive it; this way, members can find messages via search but will not be able to browse the channel history itself.
- B. Archive the public channel; anyone can still browse the conversation history in Slack, and messages will appear in search results.
- C. Delete the channel; messages from a deleted channel are still available via search.
- D. Convert the channel to private, and then archive it; members of the channel will retain access to the files.

**Answer: B**

Explanation:

The best practice for completed projects that may need to be referenced later is:

"Archive the public channel. Archived channels remain searchable and can be browsed for historical reference, but new posts are disabled." Deleting the channel would risk losing accessibility to discussions, and unnecessary privacy changes would confuse users.
