You can take our Axis Network Video Exam (ANVE) practice tests multiple times. These ANVE tests keep a record of your every attempt so you can review and overcome mistakes.

## Axis Network Video Exam Sample Questions (Q234-Q239):

### NEW QUESTION # 234

A customer has a lot of motion blur on recordings from a fixed camera. What would be the most likely setting to address the blurring?

- A. Backlight compensation
- B. Brightness
- C. Shutter speed
- D. Gain level

**Answer: C**

### NEW QUESTION # 235

What is the primary purpose of the accessory on this dome?

- A. It helps to detect motion
- B. It helps to detect tampering
- C. It provides IP67 protection
- D. It reduces the weather impact

**Answer: D**

Explanation:

The primary purpose of the accessory on this dome camera is to reduce the weather impact. This accessory, often referred to as a weather shield or rain guard, helps protect the camera lens from rain, snow, and other environmental elements, ensuring clear visibility and reducing the need for maintenance. It also helps to minimize the impact of direct sunlight, reducing glare and improving image quality. References: Axis Dome Camera Accessories

### NEW QUESTION # 236

Which setting would best adjust a hard yellow tint as shown in the pictures below?

- A. Image contrast
- B. Image brightness
- C. Color saturation
- D. White balance

**Answer: D**

Explanation:

The setting that would best adjust a hard yellow tint in the images is the white balance. Adjusting the white balance corrects color casts by accounting for the color temperature of the light source, thereby producing more natural colors in the image. In the example images, modifying the white balance would neutralize the yellow tint and restore accurate colors. Axis cameras have white balance settings that can be adjusted manually or set to automatic for optimal color representation. Further details can be found in Axis Communications' camera setup and image optimization documentation.

### NEW QUESTION # 237

Which security features are provided through a managed switch?

- A. IEEE 802.1 X port-based authentication and HTTPS encryption
- B. IEEE 802.1 X port-based authentication and VLANs
- C. IP subnets and VLANs
- D. HTTPS encryption and IP subnets

**Answer: B**

## NEW QUESTION # 238

IP51 and IP52 means that the camera

- A. Is designed for tough environments.
  - B. Is vandal resistant.
  - C. Is resistant to dust and dripping water.
  - D. Can be placed in or outdoors.

**Answer: C**

### Explanation:

The IP51 and IP52 ratings indicate that the camera is protected against dust and dripping water. IP51 means the camera is protected against dust ingress to a level that would interfere with the operation and against vertically dripping water. IP52 offers the same dust protection but also protects against dripping water when tilted up to 15 degrees. These ratings make the cameras suitable for indoor use where dust and minor water exposure might occur. Axis Network Video documentation specifies the IP rating system and the levels of protection provided by different ratings.

## NEW QUESTION # 239

For candidates who are going to buy ANVE exam materials online, they may have the concern about the money safety. We apply the international recognition third party for the payment, and therefore your money safety can be guaranteed if you choose us.
