Free PDF Quiz Splunk - SPLK-3002 - High-quality Splunk IT Service Intelligence Certified Admin Certification Exam Infor

There are a lot of excellent experts and professors in our company. The high quality of the SPLK-3002 reference guide from our company resulted from their constant practice, hard work and their strong team spirit. After a long period of research and development, our SPLK-3002 test questions have been the leader study materials in the field. We have taken our customers' suggestions of the SPLK-3002 Exam Prep seriously, and according to these useful suggestions, we have tried our best to perfect the SPLK-3002 reference guide from our company just in order to meet the need of these customers well. So stop hesitation and buy our study materials.

Exam Format and Content

- Exam Format: Multiple choice questions
- Passing score: 60%
- Exam Length: 53 Questions
- Language: English
- Exam Duration: 57 minutes

Certification Topics of Splunk SPLK-3002 Exam

Our **SPLK-3002 Dumps** covers the following objectives of Splunk SPLK-3002 Exam

- Templates and Dependencies (5%)
- Aggregation Policies (5%)
- Managing Notable Events (10%)
- Anomaly Detection (5%)
- Investigating Issues with Deep Dives (10%)
- Thresholds and Time Policies (5%)
- Glass Tables 5%
- Introducing ITSI (5%)
- Installing and Configuring ITSI (10%)
- Entities and Modules (5%)
- Designing Services (5%)

Splunk IT Service Intelligence Certified Admin Sample Questions (Q73-Q78):

NEW QUESTION # 73

When deploying ITSI on a distributed Splunk installation, which component must be installed on the search head(s)?

- A. All ITSI components
- **B. ITSI app**
- C. SA-ITSI-Licensechecker
- D. SA-ITOA

Answer: B

Explanation:

Install SA-ITSI-Licensechecker and SA-UserAccess on any license master in a distributed or search head cluster environment. If a search head in your environment is also a license master, the license master components are installed when you install ITSI on the search heads.

Reference:

When deploying ITSI on a distributed Splunk installation, the component that must be installed on the search head(s) is the ITSI app. The ITSI app contains the main features and functionality of ITSI, such as service creation and management, KPI configuration, glass table creation and editing, episode review, deep dives, and so on. The ITSI app also contains some add-ons that provide additional functionality, such as SA-ITOA (IT Operations Analytics), SA-UserAccess (User Access Management), and SA-Utils (Utility Functions). The ITSI app must be installed on the search head(s) because it handles the search management and presentation functions for ITSI. Reference: Install IT Service Intelligence in a distributed environment

NEW QUESTION # 74

Which of the following is the best use case for configuring a Multi-KPI Alert?

- A. Comparing content between two notable events.
- B. Comparing anomaly detection between two KPIs.
- **C. Raising an alert when one or more KPIs indicate an outage is occurring.**
- D. Using machine learning to evaluate when data falls outside of an expected pattern.

Answer: C

Explanation:

Reference: <https://docs.splunk.com/Documentation/ITSI/4.10.2/SI/MKA>

A multi-KPI alert is a type of correlation search that is based on defined trigger conditions for two or more KPIs. When trigger conditions occur simultaneously for each KPI, the search generates a notable event. For example, you might create a multi-KPI alert based on two common KPIs: CPU load percent and web requests.

A sudden simultaneous spike in both CPU load percent and web request KPIs might indicate a DDOS (Distributed Denial of Service) attack. Multi-KPI alerts can bring such trending behaviors to your attention early, so that you can take action to minimize any impact on performance. Multi-KPI alerts are useful for correlating the status of multiple KPIs across multiple services. They help you identify causal relationships, investigate root cause, and provide insights into behaviors across your infrastructure. The best use case for configuring a multi-KPI alert is to raise an alert when one or more KPIs indicate an outage is occurring, such as when the

service health score drops below a certain threshold or when multiple KPIs have critical severity levels. References: Create multi-KPI alerts in ITSI

NEW QUESTION # 75

Which of the following is a best practice for identifying the most effective services with which to start an iterative ITSI deployment?

- A. Define a large number of key services early.
- **B. Analyze the business to determine the most critical services.**
- C. Only include KPIs if they will be used in multiple services.
- D. Focus on low-level services.

Answer: B

Explanation:

Reference: <https://docs.splunk.com/Documentation/ITSI/4.10.2/SI/MKA>

A best practice for identifying the most effective services with which to start an iterative ITSI deployment is to analyze the business to determine the most critical services that have the most impact on revenue, customer satisfaction, or other key performance indicators. You can use the Service Analyzer to prioritize and monitor these services. References: Service Analyzer

NEW QUESTION # 76

When deploying ITSI on a distributed Splunk installation, which component must be installed on the search head(s)?

- A. All ITSI components
- B. ITSI app
- **C. SA-ITSI-Licensechecker**
- D. SA-ITOA

Answer: C

Explanation:

Explanation

Install SA-ITSI-Licensechecker and SA-UserAccess on any license master in a distributed or search head cluster environment. If a search head in your environment is also a license master, the license master components are installed when you install ITSI on the search heads.

NEW QUESTION # 77

Which step is required to install ITSI on a single Search Head?

- A. Run `splunk_apply shcluster-bundle`
- B. All of the above.
- C. Untar the ITSI package in `<splunk home>/etc/apps`
- **D. Use the Splunk -> Manage Apps Dashboard to download and install.**

Answer: D

Explanation:

To install Splunk IT Service Intelligence (ITSI) on a single Search Head, one of the straightforward methods is to use the Splunk Web interface, specifically the "Manage Apps" dashboard, to download and install ITSI.

This method is user-friendly and does not require manual file handling or command-line operations. By navigating to "Manage Apps" in the Splunk Web interface, users can find ITSI in the app repository or upload the ITSI installation package if it has been downloaded previously. From there, the installation process is initiated through the Splunk Web interface, simplifying the setup process. This approach ensures that the installation follows Splunk's standard app installation procedures, helping to avoid common installation errors and ensuring that ITSI is correctly integrated into the Splunk environment.

NEW QUESTION # 78

.....

Now, I am glad to introduce a secret weapon for all of the candidates to pass the exam as well as get the related certification without any more ado-- our SPLK-3002 study materials. We aim to help as many people as possible rather than earning as much money as possible. With our SPLK-3002 practice test, you only need to spend 20 to 30 hours in preparation since there are all essence contents in our study materials. What's more, if you need any after service help on our SPLK-3002 Exam Guide, our after service staffs will always here to offer the most thoughtful service for you.
