Qlik Sense System Administrator Certification Exam - February 2021 Release Sample Questions (Q25-Q30):

NEW QUESTION # 25

A domain user is granted access and could successfully log into the hub yesterday. The same domain user attempts to log in into the hub today, and receives this error message: Your account is inactive. Contact your administrator to activate it.

The user is able to successfully log into the Windows domain network. The user did NOT change the password recently. The user has NO limited working hours in the Active Directory.

What should the system administrator investigate to determine the cause of this error message?

- A. The security rules which impact the user
- B. The Qlik Sense proxy logs

- C. The Windows event viewer
- **D. The user properties in the QMC**

Answer: D

NEW QUESTION # 26

Which setting should be configured to distribute reload tasks evenly across multiple nodes in a Qlik Sense environment?

- A. Time-based triggers
- **B. Load balancing rules**
- C. Task chaining
- D. Node resource allocation

Answer: B

NEW QUESTION # 27

A system administrator installs Qlik Sense Enterprise and is testing the product with a small team of 10 users.

The users report that the page is NOT trusted on their machines and they receive a certificate warning message. When the system administrator tries to validate this feedback on the server, the administrator does NOT see the same issue.

The system administrator completes the following steps in the proxy configuration:

- Opens all necessary ports
- Checks in MMC that there is a personal certificate on the server
- Creates a DNS entry for an easier URL
- Tries to connect with various Internet browsers on different machines including mobile devices
- Adds the page to trusted sites in the Internet configurations
- Installs OpenSSL in the environment

Which steps should the system administrator take to resolve this issue?

- A. 1. Acquire a third-party certificate from a trusted root certificate authority (CA)
- **B. 1. Acquire a third-party certificate from a trusted root certificate authority (CA)**
- C. 1. Generate a valid certificate for organizational needs using OpenSSL
- D. 1. Acquire a third-party certificate from a trusted root certificate authority (CA) including private key

Answer: B

NEW QUESTION # 28

A system administrator needs to complete the configuration of a Qlik Sense Enterprise environment. The customer solution that needs to access Qlik Sense resources is a JavaScript app which must be authenticated through single sign-on. The customer provides a public key to the system administrator. Qlik Sense is expecting an RSA signature with SHA256.

Which authentication method should the system administrator use?

- **A. SAML**
- B. JWT
- C. Header
- D. Ticket

Answer: A

NEW QUESTION # 29

A customer uses Qlik Sense Enterprise v3.2 SR5 on Microsoft Windows Server 2008 R2 and wants to upgrade to the latest version.

What should the system administrator recommend?

- A. Run Microsoft Windows Updates to prepare Windows Server 2008 R2 for the latest Qlik Sense version
- B. Upgrade only up to the Qlik Sense February 2018 version
- **C. Upgrade to Microsoft Windows Server 2012 or later, then install the latest version of Qlik Sense Enterprise.**
