Miss the opportunity, you will regret it.

Veeam Certified Engineer v12 Sample Questions (Q117-Q122):

NEW QUESTION # 117
For which workload can Veeam Data Platform achieve image-level backups?

- A. AS/400
- B. IHP-UX
- C. Solaris
- D. IOS

Answer: C

Explanation:
Veeam Data Platform can achieve image-level backups for Solaris workloads. This means it can create a complete backup of the system at the image level, capturing the entire state of the Solaris system, including the operating system, applications, and data.

NEW QUESTION # 118
In Veeam Enterprise Manager, what granular restoration permission can be set for the Restore Operator role?

- A. SharePoint items
- B. File items
- C. OneDrive items
- D. Active Directory items

Answer: B

Explanation:
Explanation
The granular restoration permission that can be set for the Restore Operator role in Veeam Enterprise Manager is File items. This permission allows the restore operator to recover files and folders from the backup of any machine in their restore scope. The restore operator can also specify the file types that they want to recover, such as documents, images, videos, and so on1. The other options are not valid for the Restore Operator role, as they are related to application items that can only be restored by the Portal User role with appropriate delegation settings2. For more information on the Restore Operator role and its permissions, see Accounts and Roles Overview in the Veeam Backup Enterprise Manager Guide.

NEW QUESTION # 119

A company has outgrown their current data center and plans to use the second data center as the new primary and needs to migrate their workloads. They are running VMware in both data centers. Which steps would allow this migration to occur without any data loss?

- A. 1. Replication job
  2.Failover plan
  3.Permanent failover
- B. 1. Backup job
  2.Instant VM Recovery
  3.Finalize the Instant VM Recovery
- C. 1. Replication job
  2.Planned failover
  3.Permanent failover
- D. 1. Replication job
  2.Failback
  3.Commit failback

Answer: C

Explanation:
Explanation

NEW QUESTION # 120

Which of the following is NOT an advantage of Veeam ONE Monitor?

- A. Updates are signature based
- B. Built in phone home function for better security
- C. Automatic problem mediation
- D. Manual or scheduled log analytics

Answer: B

NEW QUESTION # 121

A company has an application on a VMware VM that stores customer photos. Customers may request their photos be removed at any time. The server needs to be restored from last week's backup. What Veeam restore process allows for custom scripting to be run to automatically remove any required photos before the server is returned to production?

- A. Instant Disk Recovery
- B. Secure Restore
- C. Staged Restore
- D. Instant VM Recovery

Answer: C

Explanation:
The Veeam restore process that allows for custom scripting to be run before returning a server to production is Staged Restore. This feature enables administrators to perform necessary operations, like running a script to remove customer photos, during the restore process before the VM is brought back online.

NEW QUESTION # 122

......
