ISO-45001-Lead-Auditor考古題更新 - ISO-45001-Lead-Auditor最新考題

除了PECB的ISO-45001-Lead-Auditor考試，最近最有人氣的還有Cisco，IBM，HP等的各類考試。但是如果你想取得ISO-45001-Lead-Auditor的認證資格，VCESoft的ISO-45001-Lead-Auditor考古題可以實現你的願望。不要因為對考試沒有信心就放棄考試，因為你完全可以通過VCESoft的考試資料來達成自己的目標。取得了ISO-45001-Lead-Auditor的認證資格以後，你還可以參加其他的IT認證考試。只要有VCESoft的考古題在手，什麼考試都不是問題。

最新的 ISO 45001 ISO-45001-Lead-Auditor 免費考試真題 (Q28-Q33):

問題 #28

What is the definition of the term 'audit' as per clause 3.32 of ISO 45001:2018?

- A. An evaluation of the effectiveness of health and safety measures
- B. A document that outlines safety procedures and guidelines
- C. A legal requirement to comply with health and safety standards
- D. A systematic process to assess the risks in a workplace

答案：A

解題說明：

According to Clause 3.32 of ISO 45001:2018, an audit is defined as a systematic, independent, and documented process for obtaining objective evidence and evaluating it to determine the extent to which audit criteria are fulfilled.

This involves assessing the effectiveness of health and safety measures implemented in the organization's OH&S management system.
Analysis of Options:

A . A systematic process to assess the risks in a workplace:

Incorrect. While audits may include risk assessments, the purpose is broader and involves evaluating the entire OH&S management system.

B . An evaluation of the effectiveness of health and safety measures:

Correct. This aligns with the definition of an audit as per ISO 45001:2018.

C . A legal requirement to comply with health and safety standards:

Incorrect. An audit is not necessarily a legal requirement but a process to assess conformity.

D . A document that outlines safety procedures and guidelines:

Incorrect. An audit is a process, not a document.

ISO Reference:

Clause 3.32: Audit definition.

問題 #29

An audit team leader arrives at a fabrication organisation that manufactures stairways to ..certification audit.

At a meeting with the OHSMS Manager the audit finds that the responsibility for worker consultation and participation lies with the managerial team. Select from the options four actions by the managerial team that encourage worker consultation and participation.

- A. threatening reprisals to whistleblowers
- B. Conducting toolbox talks on health and safety
- C. Promoting collaborating workers to higher positions
- D. Implementing methods for engaging workers
- E. Ignoring worker's suggestions
- F. Appointing worker's representatives
- G. Giving ownership of health and safety matters
- H. Implementing a payment scheme to reward worker's OHS performance

答案： B,D,F,G

問題 #30

You are auditing a site of Good Food Shack, a restaurant chain. In the kitchen area, you notice a half-filled open drum sitting in a pool of liquid, which is dribbling across a work area. You ask the head Chef what is in the drum and are told it is waste from the frying process. When you ask why it is kept there, You are told that it is not normally kept there, but it is not a problem and says that he will arrange it to be moved to a storeroom and will give the floor a good clean.

Look around the kitchen, you observe knives and cleavers lying around on worktops, staff wearing no protective gloves and a large pot of boiling water with nobody near it. There is no evidence of any fire extinguishers or fire blankets within sight.

You decide to raise a nonconformance. Select one of the options that best describes the finding against clause 8.1.2 of ISO 45001.

- A. Staff are at risk of serious injury while working in the kitchen.
- B. Measures to prevent slippage in the kitchen from waste cooking oil were not taken.
- C. Failure to reduce risks associated with working in the kitchen.
- D. Training of the kitchen staff was not effective enough to prevent poor safety awareness in the kitchen area.

答案： C

解題說明：

Comprehensive Detailed Explanation along with All ISO 45001 Audit Reference Clause 8.1.2 of ISO 45001 pertains to Eliminating Hazards and Reducing OH&S Risks. Organizations must implement appropriate controls to manage workplace hazards effectively.

Issue Identified:

The kitchen environment at the audited site presents multiple hazards, including:

Oil spillage creating a slip hazard.

Open drums of waste material posing a chemical or hygiene hazard.

Unsecured knives and cleavers increasing the risk of cuts.

Boiling water left unattended, posing a risk of burns.

Lack of visible fire extinguishers or fire blankets, increasing fire risk.

Analysis of Options:

A . Failure to reduce risks associated with working in the kitchen.

This option accurately captures the broader failure to implement effective measures to eliminate or reduce hazards across multiple areas in the kitchen.

B . Measures to prevent slippage in the kitchen from waste cooking oil were not taken.

This is specific to one hazard (oil spillage) and does not address other significant risks observed, such as fire safety or sharp tools.

C . Staff are at risk of serious injury while working in the kitchen.

While true, this is more of a general observation and does not address the root cause of the hazards or the failure of controls.

D . Training of the kitchen staff was not effective enough to prevent poor safety awareness in the kitchen area.

Although training deficiencies may contribute to the issue, this option does not reflect the overarching systemic failure to manage hazards effectively.

Best Description of the Nonconformance:

Failure to reduce risks associated with working in the kitchen (Option A) is the most comprehensive finding, reflecting the organization's lack of adequate controls to mitigate hazards.

ISO Reference:

Clause 8.1.2: Organizations must establish controls to eliminate or minimize OH&S risks systematically.

Clause 7.2: Ensuring competency through training is important but must be coupled with hazard control measures.

問題 #31

You will lead a second-party audit of an organization that manufactures car batteries. When you are checking the audit plan with the auditee's Safety Manager, she asks you to reduce the production line audit from two hours to one hour and to extend the audit to the warehouse from two hours to three hours. She argues that in the last four internal audits, she did not raise any nonconformities in Production while more than 10 were raised in the warehouse.

Which of the following would be your best answer?

- A. OK. I will change the plan. If necessary, I will use the lunchtime to stay longer in the warehouse.
- B. OK. I will reduce the time in Production to one hour and will review with you (the Safety Manager) the corrective action process in detail during the second hour.
- C. OK. I will change the plan accordingly.
- D. I will not change the plan, but I will consider your comments during the audit.

答案：D

問題 #32

An internal auditor of a manufacturer of plastic packaging products for the food industry raised a nonconformity against section 10.2 of ISO 45001 in Report IA202. The nonconformity (NC3) stated: "The level of reported health and safety incidents has increased by 9.7% over the last 12 months. This included an increase in reported accidents." A third-party auditor reviewing the internal audit process came across the nonconformity and found that there was no evidence of having been reported to relevant staff. Select three of the following nonconformities that the auditor could raise to ISO 45001.

- A. 9.2.2.d - Staff were not made aware that health and safety incidents were increasing.
- B. 8.1.1 - Operations were not properly controlled to avoid health and safety incidents.
- C. 9.2.2.e - Management failed to take any action to deal with the audit nonconformity.
- D. 9.2.2 - Report IA202 contained a poorly worded nonconformity (NC3).
- E. 7.4.3 - The results of the internal audit IA202 were not communicated to interested parties.
- F. 10.2.b - The root cause of the increase in reported health and safety accidents was not investigated.

答案：C,E,F

解題說明：

Clause 10.2 requires organizations to investigate nonconformities, determine their causes, and take corrective actions to prevent recurrence. Clause 9.2.2 specifies the requirements for managing internal audit processes, while Clause 7.4.3 emphasizes the need to communicate relevant information effectively.

Analysis of Options:

* A. 9.2.2.e - Management failed to take any action to deal with the audit nonconformity:Correct.

Management must ensure that internal audit findings are addressed promptly. The lack of action violates Clause 9.2.2.e.

* B. 9.2.2.d - Staff were not made aware that health and safety incidents were increasing:Incorrect.

This clause pertains to the planning and conduct of audits, not the communication of findings.

* C. 8.1.1 - Operations were not properly controlled to avoid health and safety incidents:Incorrect.

While increased incidents may suggest operational issues, this option does not directly relate to the internal audit findings.

* D. 9.2.2 - Report IA202 contained a poorly worded nonconformity (NC3):Incorrect. The clarity of the nonconformity wording is not directly relevant to Clause 9.2.2.

* E. 10.2.b - The root cause of the increase in reported health and safety accidents was not investigated:Correct. Failure to investigate root causes violates Clause 10.2.b.

* F. 7.4.3 - The results of the internal audit IA202 were not communicated to interested parties:

Correct. Effective communication of audit results is required under Clause 7.4.3.

ISO References:

* Clause 9.2.2: Internal audit process requirements.

* Clause 10.2: Nonconformity and corrective action.

* Clause 7.4.3: Communication requirements.
