

Sample 800-150 Exam - Cisco Supporting Cisco Devices for Field Technicians - The Best 800-150 Dump File

ProExam Simulator 2018 - 200-125: CCNA Cisco Certified Network Associate - 6.7.1808.1323

Question 1 (of 605) Time remaining: 01:59:01

Refer to the diagram. All hosts have connectivity with one another. Which statements describe the addressing scheme that is in use in the network? (Choose three.)

☐ A. The subnet mask in use is 255.255.255.192.

☒ B. The subnet mask in use is 255.255.255.128.

☒ C. The IP address 172.16.1.25 can be assigned to hosts in VLAN1.

☐ D. The IP address 172.16.1.205 can be assigned to hosts in VLAN1.

☐ E. The LAN interface of the router is configured with one IP address.

☒ F. The LAN interface of the router is configured with multiple IP addresses.

Your answer is correct.

Correct answer: B, C, F

The subnet mask in use is 255.255.255.128: This is subnet mask will support up to 126 hosts, which is needed.
The IP address 172.16.1.25 can be assigned to hosts in VLAN1: The usable host range in this subnet is 172.16.1.1-172.16.1.126
The LAN interface of the router is configured with multiple IP addresses: This router will need 2 interfaces for the clients.

2026 Latest ExamPrepAway 800-150 PDF Dumps and 800-150 Exam Engine Free Share: <https://drive.google.com/open?id=1ejeka7o-clxU58LITYuhL3W5PrKIW2iS>

This feature provides students with real-time examination scenarios to feel some pressure and solve the 800-150 practice exam as a real threat. These Supporting Cisco Devices for Field Technicians (800-150) practice tests are important for students so they can learn to solve real Cisco 800-150 Exam Questions and pass Cisco 800-150 certification test in a single try. The desktop-based Cisco 800-150 practice test software works on Windows and the web-based Supporting Cisco Devices for Field Technicians practice exam is compatible with all operating systems.

ExamPrepAway Supporting Cisco Devices for Field Technicians (800-150) practice test material covers all the key topics and areas of knowledge necessary to master the Cisco Certification Exam. Experienced industry professionals design the 800-150 exam questions and are regularly updated to reflect the latest changes in the Supporting Cisco Devices for Field Technicians (800-150) exam. In addition, ExamPrepAway offers three different formats of practice material which are discussed below.

Sample 800-150 Exam | Perfect Supporting Cisco Devices for Field Technicians 100% Free Dump File

PDF version of 800-150 exam questions - being legible to read and remember, support customers' printing request, and allow you to have a print and practice in papers. Software version of 800-150 guide dump - supporting simulation test system, with times of setup has no restriction. Remember this version support Windows system users only. App online version of 800-150 Guide dump - Being suitable to all kinds of equipment or digital devices, supportive to offline exercises on the condition that you practice it without mobile data. Boggled down in review process right now, our 800-150 training materials with three versions can help you gain massive knowledge.

Cisco Supporting Cisco Devices for Field Technicians Sample Questions (Q101-Q106):

NEW QUESTION # 101

Drag and drop the failures from the left onto the responsible devices in the MDS field-replaceable unit on the right.

Answer:

Explanation:

NEW QUESTION # 102

Which common CLI command is used to install Cisco NX-OS Software?

- A. **install all**
- B. boot system
- C. install kickstart
- D. copy tftp: running-config

Answer: A

Explanation:

The `install all` command is the standard method used to install or upgrade Cisco NX-OS software on Nexus switches. This command streamlines the installation process by automating tasks such as verifying the software image, checking for compatibility, and managing the installation of optional packages or SMUs (Software Maintenance Upgrades). It ensures a comprehensive and efficient upgrade process, minimizing the potential for errors.

Cisco In contrast:

* `copy tftp: running-config` is used to copy configuration files, not software images.

* `install kickstart` is an outdated command from earlier NX-OS versions.

* `boot system` sets the boot variable but does not handle the full installation process.

NEW QUESTION # 103

Which command is used to copy the startup configuration of a device to a USB file system when transferring files to a Cisco device?

- A. Router# `copy running-config usbflash0:[filename]`
- B. Router# **`copy startup-config usbflash0:[filename]`**
- C. Router# `copy startup-config tftp://[server_ip]/[destination_file]`
- D. Router# `copy usbflash0:[filename] startup-config`

Answer: B

Explanation:

To back up the startup configuration of a Cisco device to a USB drive, the command `copy startup-config usbflash0:[filename]` is used. This command copies the contents of the startup configuration file stored in NVRAM to a specified file on the USB flash drive. This is particularly useful for creating backups before performing upgrades or replacements. Option A: Copies the startup configuration to a TFTP server, not a USB drive.

Option B: Attempts to copy from the USB drive to the startup configuration, which is the reverse of the desired operation.

Option D: Copies the running configuration, not the startup configuration, to the USB drive.

NEW QUESTION # 104

Drag and drop the functions from the left onto the corresponding Cisco data center technologies on the right.

Answer:

Explanation:

Explanation:

Integrates multiple network layers into a single infrastructure # Unified Fabric Provides link aggregation and redundancy between switches # Virtual port channels (vPCs) Enables software-defined networking in data centers # Application Centric Infrastructure (ACI) Combines storage and network traffic on a single network # Fibre Channel over Ethernet (FCoE) These data center solutions are covered in the FLDTEC course under Cisco's unified data center architecture and switching portfolio:

Unified Fabric: Streamlines Layer 2 and Layer 3 into a single operational model, reducing complexity and enhancing scalability.

vPC (Virtual Port Channel): Allows two Nexus switches to appear as one logical switch, enabling loop-free topology and active-active uplinks.

ACI (Application Centric Infrastructure): Cisco's SDN solution, delivering centralized automation, policy enforcement, and fabric management.

FCoE: Enables lossless Ethernet for storage (Fibre Channel) traffic to coexist with data traffic on the same Ethernet infrastructure.

These technologies are fundamental in modern Cisco-powered data centers to optimize performance, reduce hardware, and simplify management.

NEW QUESTION # 105

Which two actions ensure a smooth transition to the new hardware when replacing a Cisco UCS C-Series Rack-Mount Server? (Choose two.)

- **A. Back up the server configuration using Cisco Integrated Management Controller.**
- B. Reconfigure the DHCP server to assign a new IP address to the replacement server.
- C. Update the firmware on the fabric interconnects.
- **D. Decommission the server if it is integrated in a Cisco UCS domain.**
- E. Temporarily disable all firewalls during the replacement process.

Answer: A,D

Explanation:

To ensure a smooth replacement of a Cisco UCS C-Series Rack-Mount Server, two critical actions are:

Back up the server configuration using the Cisco Integrated Management Controller (CIMC): This preserves all configuration data such as BIOS settings, RAID setup, and network configuration. After replacing the hardware, this configuration can be restored to minimize setup time.

Decommission the server if it is integrated in a Cisco UCS domain: Before physically replacing the server, decommissioning it ensures the UCS Manager properly releases it from the inventory, preventing configuration conflicts or orphaned profiles.

Other options, like reconfiguring DHCP or disabling firewalls, are not required procedures for a UCS C-Series hardware swap.

NEW QUESTION # 106

.....

Our 800-150 test guide keep pace with contemporary talent development and makes every learner fit in the needs of the society. There is no doubt that our 800-150 latest question can be your first choice for your relevant knowledge accumulation and ability enhancement. Moreover, 800-150 exam questions have been expanded capabilities through partnership with a network of reliable local companies in distribution, software and product referencing for a better development. That helping you pass the 800-150 Exam with our 800-150 latest question successfully has been given priority to our agenda.
