C-HRHFC-2411 Schulungsmaterialien & C-HRHFC-2411 Dumps Prüfung & C-HRHFC-2411 Studienguide

Die SAP C-HRHFC-2411 Prüfungsfragen und Antworten (C-HRHFC-2411) von It-Pruefung ist eine Garantie für eine erfolgreiche Prüfung! Bisher fällt noch keiner unserer Kandidaten durch! Falls jemand bei der Zertifizierungsprüfung durchfallen sollte, zahlen wir 100% Material-Gebühr zurück. Wir übernehmen die volle Geld-zurück-Garantie auf Ihre Zertifizierungsprüfungen! Unsere C-HRHFC-2411 Fragen und Antworten (SAP Certified Associate - Implementation Consultant - SAP SuccessFactors Full Cloud/Core Hybrid) sind aus dem Fragenpool, alle sind echt und original.

SAP C-HRHFC-2411 Prüfungsplan:

Thema	Einzelheiten
Thema 1	• SAP SuccessFactors Employee Central Integration Overview and Basic Settings: This section of the exam measures the skills of SAP Consultants and covers the basic settings and overview of integrating SAP SuccessFactors Employee Central with other systems. It focuses on the initial configuration steps necessary for successful integration. One skill to be measured is configuring basic integration settings accurately.
Thema 2	• Employee Master Data Replication from SAP SuccessFactors Employee Central to SAP ERP: This section of the exam measures the skills of SAP System Analysts and covers replicating employee master data from SAP SuccessFactors Employee Central to SAP ERP systems. It emphasizes ensuring accurate employee records in both systems.
Thema 3	• SAP SuccessFactors Employee Central Integration with SAP ERP Scenarios Overview: This section of the exam measures the skills of professionals in understanding various scenarios for integrating SAP SuccessFactors Employee Central with SAP ERP.
Thema 4	• SAP SuccessFactors Employee Central OData API: This section of the exam measures the skills of API Developers and covers the use of the OData API for accessing data from SAP SuccessFactors Employee Central.
Thema 5	• Organizational Data Replication from SAP SuccessFactors Employee Central to SAP ERP: This section of the exam measures the skills of SAP HRM Consultants and covers the replication of organizational data from SAP SuccessFactors Employee Central to SAP ERP.
Thema 6	• SAP ERP Employee Data Migration and Replication with SAP SuccessFactors Employee Central: This section of the exam measures the skills of SAP SuccessFactors Professionals in understanding strategies for migrating employee data between SAP ERP and SAP SuccessFactors Employee Central.
Thema 7	• Cost Center Replication from SAP ERP to SAP SuccessFactors Employee Central: This section of the exam measures the skills of the target professionals in understanding replicating cost center data from SAP ERP to SAP SuccessFactors Employee Central. It emphasizes ensuring accurate financial data flow between systems.
Thema 8	• SAP SuccessFactors Compound Employee API: This section of the exam measures the skills of SAP Consultants and covers the Compound Employee API, which facilitates employee data replication between systems. It focuses on structuring employee data for efficient transfer. A skill to be measured is utilizing the Compound Employee API for data synchronization.
Thema 9	• Extensibility (BADIs) for SAP ERP Employee Data Replication with SAP SuccessFactors Employee Central: This section of the exam measures the skills of SAP Developers and covers Business Add-Ins (BADIs) that enhance employee data replication processes between systems. It emphasizes customizing replication logic as needed. A skill to be measured is implementing BADIs for tailored replication solutions.
Thema 10	• Managing Clean Core: This section of the exam measures the skills of SAP Consultants and covers strategies for maintaining a clean core in SAP systems. It emphasizes the importance of minimizing customizations to ensure system integrity and upgradeability. A skill to be measured is identifying unnecessary customizations effectively.

SAP Certified Associate - Implementation Consultant - SAP SuccessFactors Full Cloud/Core Hybrid C-HRHFC-2411 Prüfungsfragen mit Lösungen (Q52-Q57):

52. Frage

How do you configure replication of the cust_shop association tied to division?

- A. Map cust_shop and assign division mapping entity
- B. Create a BAdI for relationship generation
- C. Create BAdI and define mapping entity
- **D. Define mapping for association type to relationship type**

Antwort: D

Begründung:

To replicate associations, you must map association types to ERP relationship types. This determines how the linkage between cust_shop and division is interpreted in the SAP ERP hierarchy.

Reference: SAP EC to ERP Object Association Mapping Guide

53. Frage

Your customer needs to Integrate with a third-party payroll vendor and has to report employment changes since the last successful replication. Which query mode of the Compound Employee API must you use?

- A. value:none
- **B. value:delta**
- C. value:snapshot
- D. value:xchangesOnly

Antwort: B

54. Frage

You are replicating employees from SAP SuccessFactors Employee Central to SAP ERP and the replication of event reasons results in two status-changing action types that are logged with the same start date for the same employee.

What should you do to prevent the processing in the SAP ERP system from being aborted?

- A. Add a change date request to one of the status-changing event reasons in SAP SuccessFactors Employee Central.
- **B. Override the default system behavior by defining how SAP ERP will react to multiple status-changing event reasons.**
- C. Delete one of the status-changing event reasons in SAP SuccessFactors Employee Central.
- D. Change the start date of one of the status-changing event reasons in SAP SuccessFactors Employee Central.

Antwort: B

Begründung:

When multiple status-changing events with the same start date occur, ERP will stop processing unless instructed otherwise.

Implementing logic in the EX_ECPAO_IN_MULTIPLE_ACTION_BADI or similar mechanism allows SAP ERP to interpret and accept both events as valid, thereby preventing abortion of replication.

55. Frage

Your customer wants to delete and reload employee job information by using the OData API.

Which operation parameter must you use in the OData API query with the upsert action?

- **A. purgeType=full**
- B. purgeType=reload
- C. purgeType=reloadfull
- D. purgeType=incremental

Antwort: A

56. Frage

Your customer needs to integrate with a third-party payroll vendor and has to report employment changes since the last successful replication. Which query mode of the Compound Employee API must you use?

- [illegible]
