Just choose the best TestInsides Endpoint Administrator (MD-102) exam demo questions format and download it quickly. If you think that MD-102 exam dumps can work for you then take your buying decision.

Microsoft Endpoint Administrator Sample Questions (Q128-Q133):

NEW QUESTION # 128

You have 200 computers that run Windows 10 and are joined to an Active Directory domain.

You need to enable Windows Remote Management (WinRM) on all the computers by using Group Policy.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Enable the Allow remote server management through WinRM setting.
- B. Enable the Allow Remote Shell access setting.
- C. Set the Startup Type of the Windows Remote Management (WS-Management) service to Automatic.
- D. Set the Startup Type of the Remote Registry service to Automatic
- E. Enable the Windows Defender Firewall: Allow inbound Remote Desktop exceptions setting.
- F. Enable the Windows Defender Firewall: Allow inbound remote administration exception setting.

Answer: A,C,F

Explanation:

To enable WinRM on domain computers using Group Policy, you need to perform the following actions:

Enable the Allow remote server management through WinRM setting under Computer Configuration > Policies > Administrative Templates > Windows Components > Windows Remote Management (WinRM) > WinRM Service. This setting allows you to specify the IP address ranges that can connect to the WinRM service.

Set the Startup Type of the Windows Remote Management (WS-Management) service to Automatic under Computer Configuration > Preferences > Control Panel Settings > Services. This setting ensures that the WinRM service starts automatically on the computers.

Enable the Windows Defender Firewall: Allow inbound remote administration exception setting under Computer Configuration > Policies > Security Settings > Windows Firewall and Advanced Security > Windows Firewall and Advanced Security > Inbound Rules. This setting creates a firewall rule that allows incoming TCP connections on port 5985 for WinRM. NEW QUESTION # 129

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to ensure that feature and quality updates install automatically during a maintenance window.

Solution: In Group policy, from the Maintenance Scheduler settings, you configure Automatic Maintenance Activation Boundary.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

The maintenance activation boundary is the daily scheduled time at which Automatic Maintenance starts.

NEW QUESTION # 131

You have a Microsoft 365 subscription. The subscription contains computers that run Windows 11 and are enrolled in Microsoft Intune. You need to create a compliance policy that meets the following requirements:

- * Requires BitLocker Drive Encryption (BitLocker) on each device
- * Requires a minimum operating system version

Which setting of the compliance policy should you configure for each requirement? To answer, drag the appropriate settings to the correct requirements. Each setting may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

NEW QUESTION # 132

You have a Microsoft 365 subscription that contains a user named User1. The subscription contains devices enrolled in Microsoft Intune as shown in the following table.

Microsoft Edge is available on all the devices.

Intune has the device compliance policies shown in the following table.

Name	Platform	Setting	Applied to
Compliance1	Windows 10 and later	Require encryption of data storage on device	Group2
Compliance2	Android Enterprise	Require encryption of data storage on device	Group3

The Compliance policy settings are configured as shown in the exhibit. (Click the Exhibit tab.) You create the following Conditional Access policy:

* Name: Policy1

* Assignments

o Users and groups: User1

o Cloud apps or actions: Office 365 SharePoint Online

* Access controls

o Grant Require device to be marked as compliant

* Enable policy: On

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.
