and you can master the major knowledge points as well as improve your professional ability after practicing. Plat-Con-201 Exam Materials contain both questions and answers, and it's convenient for you to have a quickly check after practicing. We also have online and offline chat service, if you have any questions about Plat-Con-201 exam dumps, you can consult us.

Salesforce Certified Omnistudio Consultant Sample Questions (Q122-Q127):

NEW QUESTION # 122

A consultant needs to design an OmniScript to capture the following information:

- * Select one payment method from a list of options
- * Enter the address information with autocomplete
- * Enter a phone number

Which OmniScript elements should be used to capture this information?

- **A. Radio, TypeAhead, and Telephone**
- B. Checkbox, Geolocation, and Number
- C. Select, TypeAhead, and Number
- D. Multi-Select. Address, and Telephone

Answer: A

Explanation:

The correct OmniScript elements to capture the information are Select, TypeAhead, and Number. Select allows the user to choose one option from a list of values, TypeAhead provides autocomplete suggestions for address fields, and Number validates that the input is a numeric value. Radio, Multi-Select, and Checkbox are not suitable for single selection scenarios. Geolocation is not an OmniScript element, and Telephone is not a valid data type for phone numbers.

NEW QUESTION # 123

How should the consultant design the OmniScript solution to allow the user to stop and resume a process at a later time?

- A. Use a DataRaptor Post Action
- B. Configure a ResumeStep
- **C. Configure the Save property**
- D. Use an Integration Procedure

Answer: C

Explanation:

The consultant should design the OmniScript solution using the Save property to allow the user to stop and resume a process at a later time. The Save property is a property that determines whether an OmniScript can be saved as a draft and resumed later from where it was left off. The consultant can enable the Save property on an OmniScript to allow the user to stop and resume a process at a later time, without losing any data or progress.

NEW QUESTION # 124

A business process needs to perform a multi-step calculation on each contact record in a list.

Using an Integration Procedure to process the list, what feature can be used to meet this requirement?

- A. Conditional Block
- B. Batch Action
- **C. Loop Block**
- D. DataRaptor Transform Action

Answer: C

Explanation:

The feature that can be used to meet this requirement in an Integration Procedure is Loop Block. Loop Block allows the designer to iterate over a collection of data and perform actions on each item. In this case, a Loop Block can be used to loop over each contact record in the list and perform a multi-step calculation using Calculation Actions or Calculation Procedures. Batch Action is not a feature in Integration Procedure, but a type of Action element that can perform bulk operations on data. Conditional Block is used to specify a condition that determines whether the actions inside the block will run or not. DataRaptor Transform Action is used to

transform data from one format to another using templates.

NEW QUESTION # 125

what can a DataRaptor Extract do?

- A. Create data in multiple related objects
- B. Extract data from a spreadsheet
- C. Retrieve data from multiple related objects
- D. Load data from external sources

Answer: C

Explanation:

A DataRaptor Extract can retrieve data from multiple related objects. A DataRaptor Extract is a tool that can read data from a Salesforce object or invoke a Salesforce API, using SOQL queries or Apex methods. A DataRaptor Extract can also use filters, joins, and formulas to manipulate the data. A DataRaptor Extract can retrieve data from multiple related objects by using lookup or master-detail relationships in the SOQL queries or Apex methods

NEW QUESTION # 126

A consultant wants to proceed with a FlexCard canvas design that will display data from a legacy billing system. The legacy billing system is being extended to add a SOAP endpoint that will allow for the data to be retrieved in XML format. However, the endpoint is not ready yet.

Which data source should the team use to make progress on the design?

- A. Integration Procedures
- B. Apex Remote
- C. DataRaptor
- D. Apex REST

Answer: A

NEW QUESTION # 127

.....

The passing rate of our Plat-Con-201 study materials is 99% and the hit rate is also high. Our study materials are selected strictly based on the real Plat-Con-201 exam. Our expert team guarantees that each answer and question is useful and valuable. We also update frequently to guarantee that the client can get more learning Plat-Con-201 resources and follow the trend of the times.
