

1Z1-771시험대비최신버전덤프샘플 시험최신버전덤프

참고: Itexamdump에서 Google Drive로 공유하는 무료, 최신 1Z1-771 시험 문제집이 있습니다:

<https://drive.google.com/open?id=1IRIVGhlMFEiLW-0NUcw71IjQjwqVIYcA>

인터넷에 검색하면 Oracle 1Z1-771시험덤프공부자료가 헤아릴수 없을 정도로 많이 검색됩니다. 그중에서 Itexamdump의Oracle 1Z1-771제품이 인지도가 가장 높고 가장 안전하게 시험을 패스하도록 지름길이 되어드릴수 있습니다.

Oracle 1Z1-771 시험요강:

주제	소개
주제 1	Developing Reports: This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX.
주제 2	Adding Computations, Processes, Validations, and Branches: This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.

주제 3	Using SQL Workshop: This section evaluates the expertise of Database Developers in managing database objects using SQL Workshop. It includes creating and modifying database structures, running SQL commands and scripts, and efficiently loading and unloading data through the Data Workshop utility to simplify database interactions.
주제 4	Leveraging Generative AI in Oracle APEX: This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.
주제 5	Migrating Application Development Between Environments: This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.
주제 6	Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.
주제 7	Managing Pages and Regions: This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications.
주제 8	Creating and Using Dynamic Actions and Plug-ins: This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.
주제 9	Creating an APEX Application: This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development.

Oracle 1Z1-771최신시험 - 1Z1-771최신버전 덤프문제

우리Itexamdump의 덤프는 여러분이Oracle 1Z1-771인증시험응시에 도움이 되시라고 제공되는 것입니다, 우라 Itexamdump에서 제공되는 학습가이드에는Oracle 1Z1-771인증시험관련 정보기술로 여러분이 이 분야의 지식 장악에 많은 도움이 될 것이며 또한 아주 정확한Oracle 1Z1-771시험문제와 답으로 여러분은 한번에 안전하게 시험을 패스할 수 있습니다,Oracle 1Z1-771인증시험을 아주 높은 점수로 패스할 것을 보장해 드립니다,

최신 Application Development 1Z1-771 무료샘플문제 (Q17-Q22):

질문 # 17

Which statement is true about the Data Workshop utility?

- A. You can load or unload multiple tables at a time.
- B. The wizards load and unload all types of schema objects.
- C. The wizards load and unload table data only.
- D. You cannot load data from an XLSX file with multiple worksheets.

정답: C

설명:

The Data Workshop utility in APEX is designed to load and unload table data only, not other schema objects like procedures or views. Option A is false because XLSX files with multiple worksheets are supported (each worksheet can be mapped to a table). Option B is incorrect as it's limited to table data. Option D is partially true but not the most precise answer, as "multiple tables at a time" depends on the process, whereas C is universally accurate.

질문 # 18

Which two tasks can be performed by using the Generate Text with AI Dynamic Action?

- A. Draft an email
- B. Invoke a Workflow
- C. Summarize or translate text
- D. Update the underlying database tables

정답: A,C

설명:

The "Generate Text with AI" Dynamic Action uses Generative AI to:

Draft an email: Creates text content like emails based on prompts.

Summarize or translate text: Processes existing text to summarize or translate it.

It does not update database tables or invoke workflows, as it's focused on text generation.

질문 # 19

Which three Theme Components are available out-of-the-box with the Universal Theme?

- A. REST Data Sources
- B. Comments
- C. Calendar
- D. Badge

정답: B,C,D

설명:

The Universal Theme (Theme 42) provides pre-built components:

A . Calendar: A region type for date-based displays (e.g., events), styled with Universal Theme templates (e.g., FullCalendar integration).

B . Comments: A region type for user feedback or notes, with built-in styling and moderation options.

C . Badge: A UI component for displaying counts or statuses (e.g., "5 New"), often in navigation or lists, styled via CSS classes.

D . REST Data Sources: A data feature, not a theme component; it's a Shared Component, not a UI element tied to Universal Theme.

Technical Insight: These components leverage Universal Theme's CSS (e.g., t-Badge, t-Calendar) and JavaScript for interactivity, reducing custom coding.

Use Case: A dashboard with a Calendar for schedules, Comments for feedback, and Badges for unread alerts.

Pitfall: Customizing requires Theme Roller or CSS overrides.

질문 # 20

Which Process type do you use to run multiple processes in the background in APEX?

- A. Execute Server-side Code
- B. Execute JavaScript Code
- C. Execute Code
- D. Execution Chain

정답: D

설명:

To run multiple processes in the background:

D . Execution Chain: This process type allows chaining multiple processes (e.g., PL/SQL, REST calls) to execute sequentially or conditionally in the background, managed via the Process Chain framework. It's ideal for complex, asynchronous tasks (e.g., batch updates).

A . Execute Code: Not a process type in APEX; likely a misnomer.

B . Execute Server-side Code: Runs a single PL/SQL block synchronously, not multiple background tasks.

C . Execute JavaScript Code: Client-side, not suited for background server processes.

Use case: Chain processes like data validation, logging, and email sending without blocking the UI.

Which is a valid method of logging messages to the execution log in APEX applications?

- 정답: A**

Logging in APEX tracks runtime activity:

Pitfall: Ensure :ENAME is in scope (e.g., page item).
