Our support team is always in action and ready to help, if you have any question regarding the HPE2-W12 Exam, so you can get in contact, our support team will always help you with the best solution.

HP Selling HPE Aruba Networking Solutions Sample Questions (Q45-Q50):

NEW QUESTION # 45

What is one way organizations can ensure their wireless network is always available?

- A. Enable device profiling on the APs to prioritize wireless access for top users and applications.
- B. Connect APs to HPE Aruba Networking CX switches and configure device profiling to prioritize delivering PoE to the APs.
- C. Receive troubleshooting insights from HPE Aruba Networking ClearPass Policy Manager.
- **D. Use HPE Aruba Networking ClearPass Device Insight to proactively detect issues before they cause problems.**

Answer: D

Explanation:

The correct answer is because ClearPass Device Insight provides continuous visibility and profiling of all devices-including IoT, BYOD, and managed endpoints-on the network. By proactively detecting unknown, rogue, or misbehaving devices before they cause service or security issues, organizations can ensure higher wireless availability and operational continuity.

Relevant extracts from official HPE Aruba Networking documentation:

- * "ClearPass Device Insight leverages machine learning and crowdsourced device fingerprints to automatically discover, classify, and monitor all devices connected to the network."
- * "With proactive detection of abnormal behavior, IT can address issues before they affect network availability or security."
- * "Device Insight closes visibility gaps by identifying unmanaged IoT and BYOD devices, reducing risks that could otherwise disrupt wireless service."
- * "This proactive approach ensures that the wireless network remains resilient and available to support business-critical users and applications." Why the other options are incorrect:
- * A Device profiling on APs alone cannot guarantee availability; it is part of traffic management, not proactive issue detection.
- * CPoE prioritization ensures APs have power but does not address ongoing availability challenges like rogue devices or abnormal behavior.
- * DClearPass Policy Manager enforces access control policies but does not provide proactive device visibility and anomaly detection to maintain availability.

NEW QUESTION # 46

A senior IT manager tells you that she wants network admins to spend less time troubleshooting issues so they have more time to focus on new initiatives. How can HPE Aruba Networking deliver the senior IT manager's desired outcome?

- A. HPE Aruba User Experience Insight (UXI) helps IT determine why data center applications are not performing as well as they should.
- B. HPE Aruba Networking APs and switches rely on the Network Analytics Engine (NAE) to automate the onboarding of devices.
- C. HPE Aruba Networking ClearPass monitors network devices' performance and automatically notifies IT admins of performance issues.
- **D. HPE Aruba Networking Central with AI for Networking accelerates IT troubleshooting by providing ML-based, real-time insights, and recommendations.**

Answer: D

Explanation:

The correct answer is A because Aruba Central with AI for Networking leverages machine learning-driven analytics and insights to automatically identify and resolve network performance issues. This minimizes the time IT teams spend on manual troubleshooting, allowing them to focus on strategic initiatives.

NEW QUESTION # 47

What is one feature that sets HPE Aruba Networking location-based services apart from the competition?

- A. HPE Aruba Networking offers developers access to a GitHub with example scripts for automating the placement of APs on local maps.
- B. The latest HPE Aruba Networking switches provide location-based services so customers can unify wired and wireless services.
- C. HPE Aruba Networking Central communicates with specialized hardware devices, rather than APs, to deliver location-based services.
- **D. Most HPE Aruba Networking APs can locate themselves with GPS and help automate the placement of APs on maps.**

Answer: D

Explanation:

The correct answer is A because Aruba Wi-Fi 6/6E/7 APs include an integrated GPS receiver that enables automatic self-location and positioning. This capability allows APs to place themselves on digital floor plans without manual entry, which accelerates deployment of Aruba Location Services in Aruba Central.

Relevant extracts from HPE Aruba Networking documentation:

- * "Aruba Wi-Fi 6 and Wi-Fi 6E APs feature integrated GPS receivers that enable automated AP placement on maps in Aruba Central."

- * "This self-locating capability sets Aruba APs apart from the competition, where AP placement is typically a manual process."
- * "By automating AP map placement, Aruba reduces deployment time and ensures higher accuracy for location-based services such as indoor navigation, asset tracking, and IoT visibility." Why the other options are incorrect:
- * BLocation-based services are delivered via APs with integrated GPS and cloud-based services in Aruba Central, not switches.
- * CWhile developer tools exist, GitHub scripts aren't the defining feature of Aruba's differentiation in LBS.
- * DAruba Central does not rely on external specialized devices; it uses Aruba APs with embedded GPS capabilities.

NEW QUESTION # 48

Which Aruba solution is targeted primarily at small businesses?

- A. Aruba CX
- B. Aruba EdgeConnect
- C. Aruba Instant On
- D. Aruba Central

Answer: C

Explanation:

Aruba Instant On is designed for small businesses needing simple deployment and cloud-based management.

NEW QUESTION # 49

A senior IT manager tells you that she wants network admins to spend less time troubleshooting issues so they have more time to focus on new initiatives. How can HPE Aruba Networking deliver the senior IT manager's desired outcome?

- A. HPE Aruba User Experience Insight (UXI) helps IT determine why data center applications are not performing as well as they should.
- B. HPE Aruba Networking APs and switches rely on the Network Analytics Engine (NAE) to automate the onboarding of devices.
- C. HPE Aruba Networking ClearPass monitors network devices' performance and automatically notifies IT admins of performance issues.
- D. HPE Aruba Networking Central with AI for Networking accelerates IT troubleshooting by providing ML-based, real-time insights, and recommendations.

Answer: D

Explanation:

The correct answer is A because Aruba Central with AI for Networking leverages machine learning-driven analytics and insight to automatically identify and resolve network performance issues. This minimizes the time IT teams spend on manual troubleshooting, allowing them to focus on strategic initiatives.

Relevant extracts from official HPE Aruba Networking documentation:

* "Aruba Central delivers AI-powered insights and prescriptive recommendations that help IT identify and resolve problems faster, reducing troubleshooting time from hours or days to minutes."

* "By applying AI/ML and advanced analytics, Aruba Central proactively detects anomalies and provides root-cause analysis, minimizing downtime and freeing IT resources."

* "AI for IT operations in Aruba Central accelerates troubleshooting with real-time network health insights and automated remediation guidance." Why the other options are incorrect:

* B ClearPass is primarily for secure access control and policy enforcement, not network performance monitoring and troubleshooting.

* C The Network Analytics Engine (NAE) is a built-in feature of Aruba CX switches for custom telemetry and automation, but it is not designed for broad troubleshooting acceleration across the entire network.

* DUXI is a valuable solution for end-user experience monitoring, but it complements rather than replaces AI-driven troubleshooting across the full infrastructure. The senior IT manager's outcome of reducing admin troubleshooting time maps most directly to AI in Aruba Central.
