

First-Grade Peoplecert Valid DevOps-Foundation Exam Fee Are Leading Materials & Correct DevOps-Foundation: PeopleCert DevOps Foundationv3.6Exam

What's more, part of that DumpsActual DevOps-Foundation dumps now are free: <https://drive.google.com/open?id=1-V46qfDFRxpnmvJUGZnPOyNEIHuNsSG3>

In modern society, you cannot support yourself if you stop learning. That means you must work hard to learn useful knowledge in order to survive especially in your daily work. Our DevOps-Foundation study materials are filled with useful knowledge, which will broaden your horizons and update your skills. Lack of the knowledge cannot help you accomplish the tasks efficiently. If you are still in colleges, it is a good chance to learn the knowledge of the DevOps-Foundation Study Materials because you have much time.

Peoplecert DevOps-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Sharing, Shadowing and Evolving: This section of the exam measures the skills of IT operations specialists and covers the collaborative and adaptive elements of DevOps in enterprise settings. It explores leadership, typical barriers and risks, and outlines how organisations can evolve their DevOps practices through continuous learning, peer shadowing, and experience-based transformation.
Topic 2	<ul style="list-style-type: none"> • Key DevOps Practices: This section of the exam measures the skills of DevOps engineers and covers core DevOps practices including Continuous Integration, Continuous Testing, Continuous Delivery, and Continuous Deployment. It explores concepts such as Site Reliability Engineering, DevSecOps, Value Stream Management, Platform Engineering, and modern practices like ChatOps and observability.
Topic 3	<ul style="list-style-type: none"> • Culture, Behaviours, Operating Models: This section of the exam measures the skills of DevOps engineers and covers how to assess and evolve organisational culture in relation to DevOps transformation. It includes concepts such as Cultural Debt, Behavioural Models, and Organisational Maturity, helping professionals understand team dynamics and readiness for change.
Topic 4	<ul style="list-style-type: none"> • Business and Technology Frameworks: This section of the exam measures the skills of IT operations specialists and covers various supporting frameworks that intersect with DevOps. These include Agile and Lean, IT Service Management, Value Stream Management, Site Reliability Engineering, Safety Culture, Learning Organisations, and Continuous Funding models that enable long-term adaptability.

Topic 5	<ul style="list-style-type: none"> Automation, Architecting DevOps Toolchains: This section of the exam measures the skills of IT operations specialists and covers key automation principles within the DevOps toolchain. It focuses on CI CD pipelines, Infrastructure as Code, containerisation, cloud-native architecture, platform engineering, and emerging technologies like Machine Learning and Generative AI in DevOps contexts.
Topic 6	<ul style="list-style-type: none"> Measurement, Metrics, and Reporting: This section of the exam measures the skills of DevOps engineers and covers metrics that help monitor and evaluate the performance of DevOps practices. Topics include speed, quality, culture, change lead time, cycle time, and the use of dashboards, value-driven metrics, and AIOps in reporting and decision-making.
Topic 7	<ul style="list-style-type: none"> Core DevOps Principles: This section of the exam measures the skills of IT operations specialists and covers essential DevOps principles such as the Three Ways, the Theory of Constraints, and Chaos Engineering. It also introduces the concept of learning organisations, showing how systemic thinking supports continuous improvement.

Pass Guaranteed Quiz DevOps-Foundation - PeopleCert DevOps Foundationv3.6Exam Latest Valid Exam Fee

DumpsActual assists people in better understanding, studying, and passing more difficult certification exams. We take pride in successfully servicing industry experts by always delivering safe and dependable exam preparation materials. DumpsActual DevOps-Foundation Exam Questions make it possible to appear in the PeopleCert DevOps Foundationv3.6Exam exam confidently without any fear of failure. DumpsActual has extensive experience in compiling the DevOps-Foundation exam questions for the Peoplecert exam.

Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q44-Q49):

NEW QUESTION # 44

Which of the following MOST accurately describes DevOps?

- A. A standard
- **B. A cultural and professional movement**
- C. A team
- D. A methodology

Answer: B

Explanation:

DevOps is not simply a team, methodology, or standard. The PeopleCert DevOps Foundation v3.6 materials define DevOps as a "cultural and professional movement" that stresses communication, collaboration, integration, and automation to improve workflow between software developers and IT operations professionals. The cultural transformation is fundamental, emphasizing shared responsibilities, breaking down silos, and fostering continuous improvement.

Reference:DevOps Foundation v3.6 syllabus section 1.1; State of DevOps Report; "The Phoenix Project".

NEW QUESTION # 45

Which of the following is NOT an example of a feedback loop?

- A. Peer review of changes
- **B. Product**
- C. Dashboards
- D. Monitoring/event data

Answer: B

Explanation:

Feedback loops are mechanisms that provide information to earlier stages in the process, enabling adjustments and improvements.

* A: Dashboards provide real-time visibility into system health, deployment status, and other key metrics, allowing quick corrective action.

* B: Monitoring and event data supply operational insights (latency, errors, resource utilization) that inform both Dev and Ops.

* C: Peer review of changes allows early detection of issues before integration, improving code quality and reducing defects.

D-Product-is-not-a feedback mechanism. The product is the outcome of development and delivery; while customer feedback on a product can be part of a loop, the "product" itself is not the mechanism delivering actionable information upstream.

Thus, D is the correct choice for "NOT" a feedback loop.

NEW QUESTION # 46

Which Lean tool provides a collaborative board that makes work visible, allows work in progress to be limited, and optimizes flow?

- A. Value Stream Mapping
- B. Continuous Delivery
- C. Kanban
- D. Improvement Kata

Answer: C

Explanation:

Kanban is a Lean visual management method that helps teams control and improve workflow. The board displays tasks in columns representing process stages, enabling:

* Visualization of work items and bottlenecks

* Limiting work in progress (WIP) to improve flow and reduce multitasking

* Tracking throughput and cycle time for continuous improvement

B(Value Stream Mapping) is a Lean analysis tool, not a visual board for ongoing work. C(Improvement Kata) is a structured improvement method, and D(Continuous Delivery) is a software delivery practice, not a visual workflow tool.

Therefore, A-Kanban-is correct.

NEW QUESTION # 47

In the context of DevOps, which is an effective approach when selecting tools?

- A. Establish a toolchain
- B. Standardize on a single vendor's platform
- C. Encourage both Dev and Ops to individually select the best tools for their own needs
- D. Focus on testing first

Answer: A

Explanation:

The most effective approach to tool selection in DevOps is to establish a toolchain-a set of integrated tools that support the end-to-end lifecycle (planning, coding, building, testing, releasing, deploying, operating, and monitoring).

This encourages consistency, automation, and traceability, while still allowing flexibility for teams.

Why not standardize on one vendor?

This reduces flexibility, can cause vendor lock-in, and doesn't support the varied needs of Dev and Ops teams.

Encouraging independent selection (C) increases fragmentation.

Focusing solely on testing (D) ignores the broader lifecycle.

Extract-style reference:

"Establishing an integrated toolchain provides end-to-end visibility and automation across the software delivery pipeline, aligning tools with process and cultural change."

- State of DevOps Report; DevOps Handbook

PeopleCert DevOps Foundation v3.6: Recommends a toolchain approach for supporting collaborative DevOps practices.

NEW QUESTION # 48

An organization wants to use experiments to improve its ITSM processes in support of DevOps practices. Which approach could this organization use to design and implement small, incremental improvements?

- A. Value Stream Mapping
- **B. Improvement Kata**
- C. All of the Above
- D. Agile Service Management

Answer: B

Explanation:

The Improvement Kata is a structured, scientific approach to continuous improvement. It uses small, iterative steps to move from the current state toward a target condition, testing hypotheses along the way.

In the DevOps context, the Improvement Kata helps teams experiment with process changes, measure outcomes, and adapt quickly-reducing risk while fostering a learning culture. It is especially useful for improving ITSM processes incrementally.

And Bare valuable techniques but serve different purposes-Agile Service Management adapts ITSM to Agile principles, and Value Stream Mapping visualizes and analyzes workflow. While they can complement Improvement Kata, it is the direct experimental framework for small, incremental improvement.

Thus, the correct answer is C.
