

Nokia 4A0-D01 VCE dumps - Testking 4A0-D01 test

BTW, DOWNLOAD part of VCETorrent 4A0-D01 dumps from Cloud Storage: <https://drive.google.com/open?id=1ByR-y1Nfg7ih-kyT980-v2T-JRvH4Oh8>

We offer you 4A0-D01 study guide with questions and answers, and you can practice it by concealing the answers, and when you have finished practicing, you can cancel the concealment, through the way like this, you can know the deficient knowledge for 4A0-D01 exam dumps, so that you can put your attention to the disadvantages. In addition, we also have the free demo for 4A0-D01 Study Guide for you to have a try in our website. These free demos will give you a reference of showing the mode of the complete version. If you want 4A0-D01 exam dumps, just add them into your card.

How you can gain the 4A0-D01 certification with ease in the least time? The answer is our 4A0-D01 study materials for we have engaged in this field for over ten years and we have become the professional standard over all the exam materials. You can free download the demos which are part of our 4A0-D01 Exam Braindumps, you will find that how good they are for our professionals devote of themselves on compiling and updating the most accurate content of our 4A0-D01 exam questions.

4A0-D01 Practice Exam & 4A0-D01 Best Questions & 4A0-D01 Certification Training

In today's competitive technology sector, the Nokia 4A0-D01 certification is a vital credential. Many applicants, however, struggle to obtain up-to-date and genuine Nokia 4A0-D01 exam questions in order to successfully prepare for the exam. If you find yourself in this circumstance, don't worry since VCETorrent has you covered with their real Nokia 4A0-D01 Exam Questions. Let's look at the characteristics of these Nokia Data Center Fabric Fundamentals Exam test Questions and how they can help you pass the Nokia 4A0-D01 certification exam on the first try.

Nokia 4A0-D01 Exam Syllabus Topics:

Topic	Details
Topic 1	This section of the exam measures skills of a Network Automation Specialist and introduces the principles of Event Driven Automation in SR Linux environments. It covers integration with Kubernetes and explores core use cases such as intent-based automation for fabrics and services, as well as enhanced network observability.

Topic 2	• Nokia DC Fabric Solution: This section of the exam measures skills of a Data Center Network Engineer and covers the architecture and benefits of modern Layer 3 data center networks. It includes an overview of BGP-based routing, VXLAN and EVPN overlays for multi-tenant environments, and key features of the SR Linux operating system. The section also explains how APIs are used for external configuration and introduces the Fabric Services System's management capabilities.
Topic 3	• Module 5 – EDA (Event Driven Automation) Introduction
Topic 4	• SR Linux Configuration and Routing: This section of the exam measures skills of a Network Automation Specialist and focuses on configuring and managing SR Linux systems. It examines the YANG-driven CLI, JSON output, environment variables, and static and dynamic routing. Learners also explore BGP, ECMP, IP-VRF, MAC-VRF, and the use of VXLAN with EVPN to implement both Layer 2 and Layer 3 overlays, including symmetric and asymmetric models.

Nokia Data Center Fabric Fundamentals Exam Sample Questions (Q22-Q27):

NEW QUESTION # 22

Which of the following statements about using BFD with BGP is FALSE?

- A. Using BFD can speed up the BGP advertisement interval.
- B. It can help rapidly detect link failures.
- C. The BFD endpoints agree on the send/receive rate of control packets.
- D. BGP is notified if several BFD control packets are missed.

Answer: A

Explanation:

BFD helps detect link failures rapidly and notifies BGP to trigger route updates quickly, but it does not speed up the BGP advertisement interval itself. BGP advertisement intervals are controlled by BGP timers, not by BFD.

NEW QUESTION # 23

Which of the following statements about next-hop groups is TRUE?

- A. A next-hop-group can only specify one next-hop for forwarding
- B. The next-hop for a next-hop-group must be a local IP address.
- C. CMP destination unreachable message is always sent when blackhole is specified in the next-hop-group.
- D. Multiple static routes can use the same next-hop-group.

Answer: D

Explanation:

Multiple static routes can share the same next-hop group, enabling efficient reuse of next-hop definitions for load balancing or redundancy.

NEW QUESTION # 24

Which of the following statements about multi-homing in EVPN is FALSE?

- A. Type 4 Ethernet Segment (ES) EVPN route is used for designated forwarder (DF) election for an ES.
- B. The ES identifier (ESI) uniquely identifies an ES and it is locally significant for a particular leaf.
- C. The Ethernet Segment (ES) identifies a set of links that connects a host to one or more leafs.
- D. Type 1 Ethernet Auto-Discovery (A-D) EVPN route is used to support EVPN multi-homing.

Answer: B

Explanation:

The Ethernet Segment Identifier (ESI) uniquely identifies an Ethernet Segment (ES) globally across the EVPN domain, not just

locally for a particular leaf.

NEW QUESTION # 25

Which of the following statements about the MAC table shown in the exhibit output is FALSE?

- A. The MAC re-learning rate has exceeded the threshold within the specified time frame.
- **B. The MAC address 00:25:BA:00:00:10 is learnt on more than one interface.**
- C. Mac-duplication detection is enabled in mac-vrf-1.
- D. [interface ethernet-1/10 is configured with the MAC address 00:25:BA:00:00:10.

Answer: B

Explanation:

The MAC address 00:25:BA:00:00:10 is listed as "duplicate," but it appears only once associated with interface ethernet-1/10. Therefore, it is not learned on more than one interface.

NEW QUESTION # 26

A static route is configured in two steps in Nokia's SR Linux. Which of the following items CANNOT be configured in the static-routes container?

- A. IPv4 destination prefix
- B. Next-hop group
- C. Preference value
- **D. blackhole**

Answer: D

Explanation:

The static-routes container in Nokia SR Linux does not support configuring a blackhole route directly; it is used to configure destination prefixes, preference values, and next-hop groups for static routing.

NEW QUESTION # 27

.....

You can contact our service any time as long as you have questions on our 4A0-D01 practice engine. They are available 24-hours for guidance and information to help you solve your problem or confusion on the 4A0-D01 exam braindumps. And they can also give you the fast and professional help as they are trained to deal with matters with high-efficiency on our 4A0-D01 learning guide. And if you buy our 4A0-D01 training materials, you will find you can have it in 5 to 10 minutes.
