

365 Days Of Free Updates To ISTQB ISTQB-CTFL Exam Questions

What's more, part of that Dumpcollection ISTQB-CTFL dumps now are free: https://drive.google.com/open?id=1-rdS-_C4g_3WEAGCtzw11mlGSaMeIUnU

If you attend ISTQB certification ISTQB-CTFL Exams, your choosing Dumpcollection is to choose success! I wish you good luck.

In order to help customers, who are willing to buy our ISTQB-CTFL test torrent, make good use of time and accumulate the knowledge, Our company have been trying our best to reform and update our ISTQB Certified Tester Foundation Level (CTFL v4.0) exam tool. "Quality First, Credibility First, and Service First" is our company's purpose, we deeply hope our ISTQB-CTFL study materials can bring benefits and profits for our customers. So we have been persisting in updating our ISTQB-CTFL Test Torrent and trying our best to provide customers with the latest study materials. More importantly, the updating system we provide is free for all customers. If you decide to buy our ISTQB-CTFL study materials, we can guarantee that you will have the opportunity to use the updating system for free.

Fantastic ISTQB-CTFL Free Sample Questions by Dumpcollection

There may be a lot of people feel that the preparation process for ISTQB-CTFL exams is hard and boring, and hard work does not necessarily mean good results, which is an important reason why many people are afraid of examinations. Today, our ISTQB-CTFL Exam Materials will radically change this. High question hit rate makes you no longer aimless when preparing for the exam, so you just should review according to the content of our ISTQB-CTFL study guide prepared for you.

ISTQB Certified Tester Foundation Level (CTFL v4.0) Sample Questions (Q198-Q203):

NEW QUESTION # 198

Which ONE of the following options BEST describes the third test quadrant (Q3)?

- A. This test quadrant is business-facing and criticizes the system. It contains exploratory testing, usability testing, and user acceptance testing.
- B. This test quadrant contains functional tests, examples, user story tests, user experience prototypes, API testing, and simulations. These tests check the acceptance criteria and can be manual or automated.
- C. This test quadrant is technology-facing and supports the team. These tests should be automated and included in the continuous integration (CI) process.
- D. This test quadrant contains smoke tests and non-functional tests (except usability tests). These tests are often automated.

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation: The Agile Testing Quadrants framework categorizes tests based on their purpose and audience:

- * Quadrant 1 (Q1): Technology-facing tests (unit and component tests).
- * Quadrant 2 (Q2): Business-facing tests supporting development (e.g., BDD tests).
- * Quadrant 3 (Q3): Business-facing tests that critique the system (B).
- * Includes usability testing, exploratory testing, and UAT to ensure software meets user expectations.
- * Quadrant 4 (Q4): Technology-facing tests that critique the system (e.g., performance, security testing).

Option B correctly defines Q3 since it focuses on evaluating the user experience, exploring the system, and validating business expectations.

NEW QUESTION # 199

Which ONE of the following statements BEST applies to checklist-based testing?

- **A. Checklists should contain specific test conditions that can be individually and directly checked.**
- B. Checklists should primarily consist of automated test cases to maximize efficiency.
- C. Checklists should contain general guidelines to ensure that all aspects of the software are covered.
- D. Checklists should be used exclusively for functional testing, as they are unsuitable for non-functional testing.

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Checklist-based testing uses specific test conditions (B) that help testers ensure key aspects are validated. The checklist items can be derived from past defects, requirements, or regulatory standards.

(A) is incorrect because general guidelines lack specificity.

(C) is incorrect because checklists can be used for both manual and automated testing.

(D) is incorrect because checklists are useful for both functional and non-functional testing (e.g., security, performance).

Checklists help ensure completeness without enforcing strictly scripted execution.

NEW QUESTION # 200

Which of the following is a typical potential risk of using test automation tools?

- A. Reduced feedback times regarding software quality compared to manual testing.
- B. Reduced repeatability and consistency of tests compared to manual testing.
- **C. Underestimation of effort required to maintain test scripts.**
- D. Reduced test execution times compared to manual testing.

Answer: C

Explanation:

One of the common risks associated with test automation tools is the underestimation of the effort required to maintain test scripts. Test scripts can become outdated or broken due to changes in the application, requiring significant effort to update and maintain them. This risk is highlighted in the ISTQB CTFL syllabus under the discussion of the benefits and risks of test automation.

NEW QUESTION # 201

The following rules determine the annual bonus to be paid to a salesman of a company based on the total annual amount of the sales made (referred to as TAS).

If the TAS is between 50k€ and 80k€, the bonus is 10%. If the TAS exceeds 80k€ by a value not greater than 40k€, the bonus is 15%. Finally, if the TAS

exceeds the maximum threshold which entitles to a 15% bonus, the bonus is 22%.

Consider applying equivalence partitioning to the TAS (Note: 1k€ = 1000 euros).

Which one of the following answers contain only test cases that belong to the same equivalence partition?

- A. TC1 = 90k€; TC2= 110k€; TC3=125k€; TC4=140k€
- **B. TC1 = 81 k€; TC2= 97k€; TC3=111k€; TC4=118k€**
- C. TC1 = 40k€; TC2= 46k€; TC3=51k€; TC4=53k€

- D. TC1 = 79k€; TC2= 80k€; TC3=81k€; TC4=82k€

Answer: B

Explanation:

This answer is correct because equivalence partitioning is a test design technique that divides the input domain of a system or component into partitions of equivalent data, such that each partition is expected to produce the same output or behavior. Equivalence partitioning aims to reduce the number of test cases by selecting one representative value from each partition. In this case, the input domain of the TAS can be divided into four partitions based on the bonus rules: less than 50k€, between 50k€ and 80k€, between 80k€ and 120k€, and more than 120k€. The test cases in the answer belong to the same partition, which is between 80k€ and 120k€, and they are expected to produce the same output, which is a bonus of 15%. NEW QUESTION # 202

Manager responsibilities in formal review includes all except one of the following:

- A. Determines if the review objectives have been met
- B. Allocate time for review
- C. Planning the review
- D. Decide on the execution of reviews

Answer: A

Explanation:

A formal review is a type of review that follows a defined process with formal entry and exit criteria and roles and responsibilities for participants. A formal review can have various roles involved, such as manager, moderator, author, reviewer and scribe. The manager responsibilities in formal review include all except one of the following:

- * Planning the review (correct responsibility)
- * Determines if the review objectives have been met (incorrect responsibility)
- * Decide on the execution of reviews (correct responsibility)
- * Allocate time for review (correct responsibility) The responsibility of determining if the review objectives have been met belongs to the moderator role, not to the manager role.
